

ACKNOWLEDGEMENTS

There are few occasions in life when language seems to be crippled in expressing our emotions and feelings and I am going through the same feeling while writing this acknowledgment. This thesis is the result of work whereby I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my gratitude to all of them.

I know that it is impossible for a 'Shishya' to repay the debt of ones 'Guru', though I herewith like to express my sincere feelings. I consider myself fortunate to have worked under the able guidance of **Dr. M. R. Yadav**. It is beyond words that I express my profound gratitude to him for his pivotal role in providing me with excellent guidance, constructive criticism, unstinted help and critical evaluation of the work without which I could not have been able to accomplish this work. Every time, I meet him, I can feel the fire in the belly. Apart from the technical and scientific guidance, I highly admire his systematic style of working, unbiased nature and perpetual encouragement. I am greatly indebted to him for his moral support and constant creative motivation throughout my studies. ***"He never pushed me too hard, just enough to make me fly"***.
