

# INDEX

Chapter No.	Name of Section	Page No.
1	Introduction	1-13
	· Introduction	
	· Aims and Objectives	
	· Rationale	
	· Plan of Work	
	· Hypothesis	
2	Literature Survey	14-99
	· Cancer	
	· Breast cancer	
	· Current treatment approaches	
	· Chemotherapy for metastatic breast cancer	
	· Doxorubicin	
	· Limitations of Chemotherapy	
	· Nanotechnology in cancer therapy	
	· Inorganic nanoparticles	
	· Role of CuO NP in cancer therapy	
	· Role of ZnO NP in cancer therapy	
	· Mesoporous silica nanoparticles	
	· Synthesis of MSNs	
	· Functionalization of MSNs	
· MSNs based drug delivery systems for cancer therapy		

	<ul style="list-style-type: none"> <li>Stimuli responsive MSNs</li> <li>Multifunctional MSNs for theranostic applications</li> <li>Biodegradation and clearance of MSNs</li> <li>Safety and toxicity of MSNs</li> </ul>	
<b>3</b>	<p>Analytical Methods</p> <ul style="list-style-type: none"> <li>Analytical Methods for doxorubicin</li> <li>Analytical Methods for metal content determination</li> <li>Estimation of surface conjugated amino groups (Ninhydrin Test)</li> <li>Estimation of folic acid conjugated to chitosan</li> <li>Lab scale method development for determination of soluble silica (silicic acid) as degradation product</li> </ul>	100-121
<b>4</b>	<p>Synthesis and Characterization of Mesoporous Silica Nanoparticles</p> <ul style="list-style-type: none"> <li>Synthesis of mesoporous silica nanoparticles</li> <li>Synthesis of metal oxide loaded mesoporous silica nanoparticles</li> <li>Characterizations</li> <li>Results and Discussion</li> </ul>	122-158
<b>5</b>	<p>Biocompatibility, Toxicity Profiling and Degradation of Nanoparticles</p> <ul style="list-style-type: none"> <li>Hemolysis study</li> <li>In vivo toxicity studies</li> <li>Degradation of MSNs</li> <li>Results and discussion</li> </ul>	159-200
<b>6</b>	<p>Surface Functionalizations, Drug Loading and Evaluations of Nanoparticles</p> <ul style="list-style-type: none"> <li>Synthesis of amino functionalized nanoparticles (MSN-NH<sub>2</sub> and CuO-MSN-NH<sub>2</sub>)</li> <li>Synthesis of MSN-COOH and CuO-MSN-COOH</li> </ul>	201-228

	<ul style="list-style-type: none"> <li>· Synthesis of chitosan-folic acid conjugate</li> <li>· Drug loading and determination of entrapment efficiency</li> <li>· Formulation of DOX-MSN-SS-CH-FA and DOX-CuO-MSN-SS-CH-FA</li> <li>· In vitro stimuli mediated drug release study</li> <li>· Hemolysis study</li> <li>· Results and discussions</li> </ul>				
<b>7</b>	Cell Line Studies	229-251			
	<ul style="list-style-type: none"> <li>· Cytotoxicity studies</li> <li>· Estimation of reactive oxygen species (ROS) generation</li> <li>· Estimation of change in the mitochondrial membrane potential (MMP)</li> <li>· Clonogenic assay</li> <li>· Scratch Assay</li> <li>· Detection of apoptosis</li> <li>· Results and discussion</li> </ul>				
	In Vivo Anticancer Studies		252-287		
	<ul style="list-style-type: none"> <li>· Introduction</li> <li>· Cell line</li> <li>· Ethical Statement</li> <li>· Animals</li> <li>· Experimental design and tumor cell transplantation</li> <li>· Measurement of tumor growth and Evaluation of toxicity</li> <li>· Statistical analysis</li> <li>· Results and Discussions</li> </ul>				
	<b>8</b>				
	<b>9</b>			Summary and Conclusions	288-298
