

Table of Contents

Contents.....	I-VIII
List of Tables.....	IX
List of Figures.....	X-XVI
List of Abbreviations.....	XVII-XX
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	9
2.1. THE NORMAL BREAST TISSUE	9
2.1.1. Gross and functional anatomy of breast	9
2.1.2. Blood and Lymphatic supply to the breast	11
2.2. BREAST CANCER.....	13
2.2.1. Types of breast cancer	14
2.2.2. Traditional system of classification	16
2.2.3. Newer classification (Molecular classification)	24
2.2.4. Risk factors	25
2.2.5. Diagnosis and screening	28
2.2.6. Breast cancer treatment.....	30
2.2.7. Models to study breast cancer.....	32
2.2.7.1. <i>In-vitro</i> studies.....	32
2.2.7.2. <i>In- vivo</i> studies.....	33
2.2.8. Newer targets of breast cancer.....	34
3. PLANT PROFILE.....	39
3.1. <i>Butea monosperma</i>	39

3.2.	<i>Lycopersicon esculentum</i>	44
3.3.	<i>Cassia fistula</i>	47
4.	MATERIALS AND METHOD	51
4.1.	Materials	51
4.1.1.	Procurement of drug and powdered part of plant	51
4.1.2.	Preparation of extracts	51
4.1.3.	Chemicals and kits	51
4.1.4.	Cell line and cell culture	52
4.2.	<i>In-vitro</i> cytotoxicity assay (MTT Assay)	52
4.3.	<i>In-vivo</i> evaluation of extracts (AEBM, MEBM, EAELE, MELE, AECF and MECF) in MNU induced mammary carcinogenesis.....	53
4.3.1.	Animals	53
4.3.2.	Dose fixation	54
4.3.3.	MNU induced mammary carcinogenesis.....	54
4.4.1	Growth rate	55
4.4.2	Feed consumption efficiency	55
4.4.3	Tumor parameters	55
4.4.4	Estrogen and Progesterone receptor expression studies by immunohistochemistry.....	56
4.4.5	Nucleic acid contents (DNA and RNA)	56
4.4.6	Antioxidant enzyme status.....	57
4.4.	<i>In-vitro</i> assay of angiogenesis (Chick Choriollantoic Membrane Assay).....	62

4.5.	<i>In-vitro</i> assay of apoptosis (Annexin V FITC/PI binding assay)	62
4.6.	<i>In-vitro</i> assay of cell motility (Scratch Motility Assay).....	63
4.7.	<i>In-vivo</i> evaluation of extracts (MEBM, EAELE and AECF) in EAC induced solid mammary tumors	63
4.7.1.	Animals	63
4.7.2.	Dose fixation	64
4.7.3.	EAC induced solid mammary tumors.....	64
4.7.4.	Body weight	65
4.7.5.	Tumor parameters ^{278, 279}	65
4.7.6.	Liver weight	66
4.7.7.	Liver enzymes	66
4.7.8.	Blood count.....	67
4.7.9.	Cytokines levels	67
4.7.10.	Lysosomal enzyme: β -glucosidase	70
4.7.11.	Vascular Endothelial Growth Factor (VEGF).....	72
4.7.12.	Immunohistochemistry of p53 Gene	73
4.7.13.	Caspase-9.....	74
4.7.14.	Histopathology.....	75
4.8.	Statistical Analysis	76
5.	RESULTS	77
5.1.	Effect of extracts on MCF-10A human breast epithelial cell line by MTT assay.....	77

5.2. Effect of extracts on cell proliferation of MCF-7, MDA-MB-453, MDA-MB-231 human breast cancer cell lines by MTT Assay	79
5.3. Comparison of IC ₅₀ values of various extracts of <i>Butea monosperma</i> flowers, <i>Lycopersicon esculentum</i> fruits and <i>Cassia fistula</i> pods	89
5.4. <i>In-vivo</i> evaluation of extracts of <i>Butea monosperma</i> flower (MEBM and AEBM) in Methylnitrosourea (MNU) induced mammary carcinogenesis.	92
5.4.1. Effect of MEBM and AEBM on growth rate and relative organ weight in MNU induced mammary carcinogenesis.....	92
5.4.2. Effect of MEBM and AEBM on feed consumption efficiency in MNU induced mammary carcinogenesis.....	92
5.4.3. Effect of MEBM and AEBM on tumor parameters in MNU induced mammary carcinogenesis	96
5.4.4. Effect of MEBM and AEBM on hematological parameters in MNU induced mammary carcinogenesis	99
5.4.5. Effect of MEBM and AEBM on nucleic acid contents in MNU induced mammary carcinogenesis	99
5.4.6. Effect of MEBM and AEBM on lipid peroxidation (MDA) and antioxidant enzyme levels in MNU induced mammary carcinogenesis...	101
5.4.7. Comparison between MEBM and AEBM in MNU induced mammary carcinogenesis.....	105
5.4.8. Effect of MEBM and AEBM on estrogen and progesterone receptor expressions in MNU induced mammary carcinogenesis.....	106

5.5. <i>In-vivo</i> evaluation of extracts of <i>Lycopersicon esculentum</i> fruits (EAELE and MELE) in Methylnitrosourea (MNU) induced mammary carcinogenesis	109
5.5.1. Effect of EAELE and MELE on growth rate and relative organ weight in MNU induced mammary carcinogenesis.....	109
5.5.2. Effect of EAELE and MELE on feed consumption efficiency in MNU induced mammary carcinogenesis.....	109
5.5.3. Effect of EAELE and MELE on tumor parameters in MNU induced mammary carcinogenesis	113
5.5.4. Effect of EAELE and MELE on hematological parameters in MNU induced mammary carcinogenesis	116
5.5.5. Effect of EAELE and MELE on nucleic acid contents in MNU induced mammary carcinogenesis	116
5.5.6. Effect of EAELE and MELE on lipid peroxidation (MDA) and antioxidant enzyme levels in MNU induced mammary carcinogenesis...	118
5.5.7. Comparison between EAELE and MELE in MNU induced mammary carcinogenesis.....	122
5.5.8. Effect of EAELE and MELE on estrogen and progesterone receptor expressions in MNU induced mammary carcinogenesis.....	124
5.6. <i>In-vivo</i> evaluation of AECF and MECF in Methylnitrosourea (MNU) induced mammary carcinogenesis	127
5.6.1. Effect of AECF and MECF on growth rate and relative organ weight in MNU induced mammary carcinogenesis.....	127
5.6.2. Effect of AECF and MECF on feed consumption efficiency in MNU induced mammary carcinogenesis.....	127

5.6.3. Effect of AECF and MECF on tumor parameters in MNU induced mammary carcinogenesis	131
5.6.4. Effect of AECF and MECF on hematological parameters in MNU induced mammary carcinogenesis	134
5.6.5. Effect of AECF and MECF on nucleic acid contents in MNU induced mammary carcinogenesis	134
5.6.6. Effect of AECF and MECF on lipid peroxidation (MDA) and antioxidant enzyme levels in MNU induced mammary carcinogenesis...	136
5.6.7. Comparison between AECF and MECF in MNU induced mammary carcinogenesis.....	140
5.6.8. Effect of AECF and MECF on estrogen and progesterone receptor expressions in MNU induced mammary carcinogenesis.....	142
5.7. Effect of extracts (MEBM, AEBM, EAELE, MELE, AECF and MECF) on angiogenesis (Chick Chorioallantoic Membrane Assay)	144
5.8. Effect of extracts (MEBM, AEBM, EAELE, MELE, AECF and MECF) on apoptosis (Annexin V-FITC PI double staining assay).....	146
5.9. Effect of extracts (MEBM, AEBM, EAELE, MELE, AECF and MECF) on cell inhibition on Scratch Motility Assay	149
5.10. Effect of extracts (MEBM, AEBM, EAELE, MELE, AECF and MECF) on oxidative stress (ROS generation) (DCFH-DA Assay).....	152
5.11. Comparison between two potent extracts studied in MNU induced mammary carcinogenesis and in <i>in-vitro</i> mechanistic studies.....	153
5.12. <i>In-vivo</i> evaluation of MEBM, EAELE and AECF in Ehrlich ascites carcinoma (EAC) induced solid tumors.....	155

5.12.1.	Effect of MEBM, EAELE and AECF on body weight in EAC induced solid tumors	155
5.12.2.	Effect of MEBM, EAELE and AECF on tumor parameters in EAC induced solid tumors	155
5.12.3.	Effect of MEBM, EAELE and AECF on liver weight in EAC induced solid tumors	159
5.12.4.	Effect of MEBM, EAELE and AECF on liver enzymes in EAC induced solid tumors	159
5.12.5.	Effect of MEBM, EAELE and AECF on hematological parameters in EAC induced solid tumors	160
5.12.6.	Effect of MEBM, EAELE and AECF on cytokine levels in EAC induced solid tumors	161
5.12.7.	Effect of MEBM, EAELE and AECF on Lysosomal enzyme levels (β -Glucosidase) in EAC induced solid tumors	161
5.12.8.	Effect of MEBM, EAELE and AECF on Vascular endothelial growth factor (VEGF) levels in EAC induced solid tumors.....	163
5.12.9.	Effect of MEBM, EAELE and AECF on p53 gene expression (immunohistochemistry) in EAC induced solid tumors	164
5.12.10.	Effect of MEBM, EAELE and AECF on CASPASE-9 in EAC induced solid tumors	166
5.12.11.	Effect of MEBM, EAELE and AECF on histopathology of organs in EAC induced solid tumors	167
5.13.	Preventive studies in MNU induced mammary carcinogenesis	173
5.14.	<i>In-vitro</i> mechanistic assays	177
5.15.	Curative studies in EAC induced solid mammary cancer.....	179

6. DISCUSSION	183
7. SUMMARY AND CONCLUSION	215
7.1. Aim of study	215
7.2. Work Plan	216
7.3. <i>In-vitro</i> cell line study (MTT assay).....	217
7.4. <i>In-vivo</i> MNU induced mammary carcinogenesis and <i>in-vitro</i> mechanistic studies.....	218
7.5. Curative proficiency of MEBM, EAELE and AECF in EAC induced mammary carcinogenesis	220
8. REFERENCES.....	223
9. ANNEXURES.....	253
