

# Index

Sr. No.	Chapters with Contents	Page No.
1	<b>Introduction</b> <ul style="list-style-type: none"><li>➤ Brain tumor</li><li>➤ Current treatment approaches for brain tumor</li><li>➤ Limitations to current therapy</li><li>➤ Nanoformulations for treatment of brain cancer</li><li>➤ Targeting brain tumors</li><li>➤ Simultaneous therapy and imaging for brain tumors (Theranostic Nanoparticles)</li><li>➤ Intranasal route for targeting brain tumor</li><li>➤ Polyethylenimine</li><li>➤ Lenalidomide</li><li>➤ Aims and objectives</li><li>➤ Hypothesis</li><li>➤ Plan of work</li></ul>	1-32
2	<b>Literature Review</b> <ul style="list-style-type: none"><li>➤ Nanoparticles in cancer therapy</li><li>➤ Methods for synthesis of metal nanoparticles/ alloy nanoparticles</li><li>➤ Drug profile</li><li>➤ Magnetic nanoparticles</li><li>➤ Hyperthermia</li><li>➤ Photothermal therapy</li><li>➤ FePt alloy nanoparticles</li><li>➤ Polyethylenimine</li><li>➤ Review of literature</li></ul>	33-92
3	<b>Analytical Method</b> <ul style="list-style-type: none"><li>➤ Materials and equipments</li><li>➤ Estimation and method development of Lenalidomide (LND) by UV Visible Spectrophotometer</li><li>➤ Estimation of Iron by UV Visible Spectrophotometer</li></ul>	93-106

## Index

	<ul style="list-style-type: none"> <li>➤ Estimation of LND by Spectrofluorimetry in plasma</li> <li>➤ Interference study by UV Visible Spectrophotometer</li> </ul>	
4	<b>Materials and Protocols</b> <ul style="list-style-type: none"> <li>➤ Sources of chemicals</li> <li>➤ Instruments used</li> <li>➤ Characterization techniques</li> <li>➤ Protocols for cell cultures</li> </ul>	107-119
5	<b>Experimental</b> <ul style="list-style-type: none"> <li>➤ Synthesis of FePt nanoparticles</li> <li>➤ Phase transfer of oleic acid coated FePt nanoparticles</li> <li>➤ Surface modification of FePt nanoparticles</li> <li>➤ Synthesis of Fe<sub>2</sub>O<sub>3</sub>@FePt nanoparticles</li> <li>➤ Optimization of FePt core using Quality by Design (QbD)</li> <li>➤ Characterization and evaluations of synthesized nanoparticles</li> <li>➤ Stability studies</li> </ul>	120-145
6	<b>Result and Discussion</b>	146-206
7	<b>Cell Line Studies</b> <ul style="list-style-type: none"> <li>➤ Cell viability assay</li> <li>➤ <i>In vitro</i> NIR triggered photothermal, magnetophotothermal and chemo-magnetophotothermal measurement</li> <li>➤ Cell viability assay of surface modified alloy nanoparticles</li> <li>➤ <i>In vitro</i> BBB passage/ Flux study</li> <li>➤ Estimation of ROS generation</li> <li>➤ Colony forming assay</li> <li>➤ Estimation of intracellular uptake</li> <li>➤ Cellular uptake mechanism studies</li> <li>➤ Mitochondrial localization</li> <li>➤ Fluorescence analysis of isolated mitochondria</li> <li>➤ Detection of changes in mitochondrial membrane potential</li> <li>➤ Intracellular ATP level detection</li> </ul>	207-236

## Index

---

	➤ Analysis of respiration chain enzymatic activity	
8	Animal Studies <ul style="list-style-type: none"><li>➤ Pharmacokinetic study</li><li>➤ Nasal penetration study</li><li>➤ <i>In vivo</i> nose to brain transfer of M-SPANs</li><li>➤ Nasal toxicity studies</li><li>➤ Biodistribution studies and transfer of <sup>177</sup>M-SPANs to brain after nasal administration</li><li>➤ <i>In vivo</i> mitochondrial accumulation of M-SPANs</li><li>➤ <i>In vivo</i> toxicity of M-SPANs</li><li>➤ Interaction studies</li></ul>	237-260
9	Summary and Conclusions	261-273
