

INDEX

Chapter I – Introduction

Page #

Diabetes mellitus

1 - 84

- History
- Classification of diabetes mellitus
- Diagnostic criteria for diabetes mellitus
- Diabetic animal models

Insulin

- Insulin secretion
- Biological effects of insulin
- Insulin receptor
- Insulin signalling

Consequences of insulin deficiency/ resistance (Diabetes mellitus)

Oxidative Stress and diabetes mellitus

Polyol Pathway

Free Radicals

- Reactive Oxygen Species
- Reactive Nitrogen Species
- Antioxidant defense system
- Superoxide dismutase (SOD)
- Catalase (CAT)
- Glutathione peroxidase (GPx)
- Reduced glutathione (GSH)
- Microangiopathy
- Macroangiopathy

Diabetic Angiopathy

Atherosclerosis

Diabetic Retinopathy

Diabetic Nephropathy

Diabetic Neuropathy

Dyslipidemia

- Lipids
- Digestion and absorption
- Lipoproteins
- Apolipoproteins
- Important enzymes involved in lipid and lipoprotein metabolism
- Causes of dyslipidemia
- Dyslipidemia and atherosclerosis
- Dyslipidemia and diabetes

Therapies for diabetes mellitus

Hypoglycemic Drugs

- Sulphonylureas
- Meglitinides
- Biguanides
- Thiazolidinediones
- Alpha-glucosidase inhibitors
- Insulin
- Gene and Islet therapy

Other additive therapies

- Exercise
- Vitamin E and α -Lipoic acid
- Chromium species
- Magnesium
- Vanadium

Hypolipidaemic Drugs

- Statins (HMG-CoA reductase inhibitors)
- Bile acid sequestrants
- Nicotinic acid
- Fibrates
- MTP Inhibitors

- Dietary and biliary cholesterol absorption inhibitor
- ACAT inhibitor

Combination therapy

Herbal therapy

- *Allium* species
- *Aloe vera*
- *Coccinia indica*
- *Ginkgo biloba*
- *Ginseng species*
- *Gymnema sylvestre*
- *Momordica charantia*
- *Ocimum sanctum*
- *Silibum marianum*
- *Trigonella foenum-graceum* Linn
- *Curcuma longa* Linn
- *Emblica officinalis* Gaertn.
- *Enicostemma littorale* Blume

Aims and objectives of the study

84

Chapter II - Materials and methods

87

Chemicals

Plant material and extract preparation

Animals

Assays

Glycemic parameters –

- Blood glucose
- Glycosylated Haemoglobin (Gly Hb)
- *In-vitro* insulin release
- Insulin estimation

Lipid parameters –

- Hypercholesterolemic Diet
- Serum Total Cholesterol & HDL Cholesterol
- Serum Triglycerides
- Tissue Lipids extraction
- Tissue Cholesterol & Triglycerides
- HMG Co A reductase activity

Antioxidant parameters –

- DPPH free radical scavenging
- Superoxide radical scavenging
- Hydroxyl radical scavenging
- Nitric oxide radical scavenging
- *Ex-vivo* antioxidant experiments
- Reduced Glutathione (GSH)
- Protection of GSH auto-oxidation
- Lipid peroxidation (LPO)
- Inhibition of lipid peroxides
- Catalase (CAT)
- Superoxide dismutase (SOD)
- Glutathione peroxidase (GPx)

Toxicity parameters –

- Glutamate pyruvate transaminase (GPT)
- Alkaline phosphatase (ALP)
- Creatinine

Statistical analyses

Chapter III – Clinical evaluation of antidiabetic efficacy of *E. littorale* aqueous extract in insulin-dependent diabetes mellitus (IDDM) and non-insulin dependent diabetes mellitus (NIDDM) patients.

- Introduction

- Experimental design
- Results
- Discussion
- Summary

Chapter IV – To study the hypoglycemic effect of aqueous extract of herbal combination (*C. longa*, *E. officinalis*, *T. foenum-graecum*, *E. littorale*) in alloxan-induced diabetic rats.

141

- Introduction
- Experimental design
- Results
- Discussion
- Summary

Chapter V – To study the antioxidant and hypolipidaemic effect of aqueous extract of herbal combination (*C. longa*, *E. officinalis*, *T. foenum-graecum*, *E. littorale*) in alloxan-induced diabetic rats.

159

- Introduction
- Experimental design
- Results
- Discussion
- Summary

Chapter VI – To study the comparative antioxidant and hypolipidaemic effect of aqueous extracts of *E. littorale* and herbal combination (*C. longa*, *E. officinalis*, *T. foenum-graecum*, *E. littorale*) in cholesterol fed rats.

190

- Introduction
- Experimental design
- Results
- Discussion

- Summary

Chapter VII - Summary

Conclusions
