

INDEX

LIST OF FIGURES	I
LIST OF TABLES	IV
LIST OF ABBREVIATIONS	V
Chapter 1. Introduction	1
I. INTRODUCTION	2
II. AIM	6
III. OBJECTIVES	6
IV. HYPOTHESIS	7
V. REFERENCES	8
Chapter 2. Literature review	12
I. HYPOTHYROIDISM	13
A. Hypothyroidism- Types, Prevalence and Diagnosis	13
B. Pathogenesis of autoimmune hypothyroidism	14
C. Treatment and Management of hypothyroidism	15
D. Gene therapy for autoimmune hypothyroidism- Current Perspective	16
II. GENE DELIVERY VECTORS	16
III. BARRIERS AND STRATEGIES TO IMPROVE TRANSFECTION EFFICIENCY	17
A. Extracellular barriers	17
1. Serum stability	19
B. Intracellular barriers	19
1. Endo-lysosomal barrier	19
2. Transport through cytoplasm	20
3. Nuclear localization	20
4. Unpackaging	21
IV. POLYETHYLENEIMINE AS GENE DELIVERY VECTOR	21

V. POLYETHYLENEIMINE MEDIATED CYTOTOXICITY	22
VI. LOW MOLECULAR WEIGHT PEI AND ITS MODIFICATIONS	23
VII. REFERENCES	24
Chapter 3. Autoimmunity and Hypothyroidism: Anti-TPO antibodies in Hypothyroid Patients in Gujarat Population	33
I. INTRODUCTION	34
II. SUBJECTS AND METHODS	35
A. Subjects	35
B. Estimation of anti-Thyroid Peroxidase (anti-TPO) antibodies levels	36
III. RESULTS AND DISCUSSION	37
A. Anti-TPO antibody levels in hypothyroidism patients and controls	37
B. Anti-TPO antibody levels in autoimmune hypothyroidism patients and Gender biasness	38
C. Anti-TPO antibody levels in different age of onset groups of autoimmune hypothyroidism patients	39
IV. CONCLUSION	40
V. REFERENCES	41
Chapter 4. Association of Cytotoxic T-Lymphocyte Antigen 4 (CTLA4) and Thyroglobulin (TG) genetic variants with autoimmune hypothyroidism	43
I. INTRODUCTION	44
II. SUBJECTS AND METHODS	45
A. Subjects	45
B. Genotyping of <i>CTLA4</i> gene exon 1 +49A/G and 3' UTR CT60A/G polymorphisms and <i>TG</i> gene exon 33 polymorphism	46
C. Determination of s <i>CTLA4</i> , fl <i>CTLA4</i> and <i>GAPDH</i> mRNA expression	48
1. Total RNA extraction and cDNA synthesis	48

2.	Real-time PCR	48
D.	Statistical analysis	48
III.	RESULTS AND DISCUSSION	50
A.	Analysis of association between <i>CTLA4</i> gene exon 1 +49A/G polymorphism and susceptibility to autoimmune hypothyroidism	50
B.	Analysis of association between 3' UTR <i>CTLA4</i> gene CT60A/G polymorphism and susceptibility to autoimmune hypothyroidism	54
C.	Analysis of association between <i>TG</i> gene E33 polymorphism and susceptibility to autoimmune hypothyroidism	54
D.	Linkage disequilibrium (LD) and haplotype analyses	55
E.	The expression of fl <i>CTLA4</i> and s <i>CTLA4</i> transcripts	56
F.	Genotype-phenotype correlations for fl <i>CTLA4</i> and s <i>CTLA4</i> in autoimmune hypothyroidism patients and controls	57
G.	Ratio of s <i>CTLA4</i> and fl <i>CTLA4</i> mRNA expression in autoimmune hypothyroidism patients and controls	59
IV.	CONCLUSION	64
V.	REFERENCES	65

Chapter 5. Modifications of Polyethyleneimine with Short Chain Aliphatic acids and ω -Amino Aliphatic acids as Gene Carrier

I.	INTRODUCTION	69
II.	MATERIALS AND METHODS	71
A.	Materials	71
B.	Preparation and Characterization of Short Chain Aliphatic Lipids and ω -Amino Aliphatic acids Substituted PEI 10KDa Polymers	72
1.	Synthesis and characterization of hexanoic acid and octanoic acid conjugated PEI	72
2.	Synthesis and characterization of ω -amino hexanoic acid and ω -amino octanoic acid conjugated PEI	73

3.	TNBS assay	74
4.	Buffer capacity and pKa	75
5.	Hemolysis assay	75
C.	Selection, Amplification and Purification of pDNA	76
1.	Preparation of competent cells	76
2.	Transformation of competent cells	76
3.	pDNA isolation and purification	77
4.	Determination of pDNA yield and purity	78
D.	Preparation of polyplexes using HA-PEI, OA-PEI, ω -amino-HA-PEI AND ω -amino-OA-PEI	79
E.	Physicochemical characterization of polyplexes:	79
1.	Dynamic Light Scattering (DLS)	79
2.	Transmission Electron microscopy	79
3.	Laser Doppler Anemometry/ Electrophoresis/ velocimetry	79
4.	Agarose Gel Retardation Assay	80
F.	<i>In Vitro</i> characterization of polyplexes	80
1.	MTT cytotoxicity assay	80
2.	Fluorescence microscopy	81
3.	Confocal microscopy	82
4.	Gene expression analysis by flow cytometry	83
5.	Determination of <i>mCTLA4-IGHG1</i> mRNA expression	83
G.	<i>In vivo</i> efficacy studies	85
III.	RESULTS AND DISCUSSION	88
A.	Preparation and characterization of short chain aliphatic lipids substituted PEI 10KDa polymers	88
B.	Selection of therapeutic gene for autoimmune hypothyroidism, its amplification and purification	99
1.	pAL119-mCTLA4-IGHG1	99

2.	pEGFP-N1	103
C.	Physicochemical characterization of polyplexes	106
1.	Size and morphology of polyplexes	106
2.	Laser Doppler Anemometry/ Electrophoresis/ velocimetry	111
3.	Agarose Gel Retardation Assay	112
4.	Hemolysis assay	113
D.	<i>In vitro</i> characterization of polyplexes	115
1.	<i>In vitro</i> cytotoxicity and viability	115
2.	<i>In vitro</i> cellular uptake and transfection efficiency	118
E.	<i>In vivo</i> efficacy	134
IV.	CONCLUSION	139
V.	REFERENCES	140
	Chapter 6. Summary and Conclusion	147
	APPENDIX
