

Table of Content

Chapter 1.....	1
1.1 Introduction.....	1
1.2 Need for the study.....	4
1.3 Proposed research strategy.....	6
1.4 Aim of the proposed work.....	10
1.5 Rationale.....	10
1.6 Hypothesis.....	11
1.7 Research Plan and objectives.....	11
1.8 Expected Outcome.....	12
1.9 Plan of Work.....	13
1.10 Graphical overview.....	14
1.11 References.....	15
Chapter 2.....	19
2.1 Ovarian Cancer.....	20
2.2 Liposomes as a drug delivery carrier.....	26
2.3 Cyclodextrins as a drug delivery carrier.....	28
2.3.1 Cyclodextrin Complexation with Anticancer Drugs.....	31
2.3.2 “Drug in Cyclodextrin in Liposome” as a drug delivery carrier.....	32
2.4 Targeted therapeutics for cancer.....	33
2.5 Follicle Stimulating Hormone Receptor.....	41
2.6 Antibody and Engineered Fragments.....	46
2.6.1 Immunoliposomes.....	49
2.7 Drug Profile.....	52
2.8 References.....	58
Chapter 3.....	70
3.1 Introduction.....	70
3.2 Methods.....	72
3.2.1 Estimation of Paclitaxel by RP-HPLC method.....	72
3.2.2 Estimation of total phospholipid content by Stewart method.....	73

3.2.3 Estimation of plasma proteins by BCA protein estimation method	74
3.2.4 Estimation of cell lysate protein by Bradford method	76
3.2.5 Estimation of Cysteine by Ellman's Assay.....	77
3.2.6 Estimation of coumarin-6 by spectrofluorometer.....	79
3.2.7 Estimation of Paclitaxel from plasma samples by RP-HPLC method.....	80
3.3 Result and Discussion	80
3.3.1 Estimation of Paclitaxel by RP-HPLC method.....	80
3.3.2 Estimation of total phospholipid content by Stewart method.....	83
3.3.3 Estimation of plasma proteins by BCA protein estimation method.....	85
3.3.4 Estimation of cell lysate protein by Bradford method	86
3.3.5 Estimation of cysteine by Ellman's Assay.....	87
3.3.6 Estimation of 6-coumarin by spectrofluorometer.....	89
3.3.7 Estimation of Paclitaxel from plasma samples by RP-HPLC method.....	90
3.4 References.....	94
Chapter 4.....	94
4.1 Introduction	95
4.2 Materials and Instruments.....	100
4.3 Methods	101
4.3.1 Preparation of PTX ICs.....	101
4.3.2 Characterization of PTX ICs.....	101
4.4 Result and Discussion	103
4.4.1 Preparation of PTX ICs.....	103
4.4.2 Characterization of PTX ICs.....	105
4.5 Reference.....	112
Chapter 5.....	117
5.1 Introduction	117
5.2 Material and Instruments.....	124
5.3 Methods	126
5.3.1 Preparation of conventional liposomes (CLs) by thin film hydration method.	126

5.3.2 Preparation of PEGylated conventional liposomes (PLs).....	128
5.3.3 Preparation of Double loaded PEGylated liposomes (DLPLs)	129
5.3.4 Characterization of PEGylated conventional and double loaded liposomes....	129
5.3.4.1 Particle size analysis.....	129
5.3.4.2 Zeta potential analysis.....	130
5.3.4.3 Entrapment efficiency and drug loading.....	130
5.3.4.4. Cryo-TEM.....	131
5.3.4.5 In vitro drug release.....	131
5.3.5 Additional characterization for PEGylated double loaded liposomes (DLPLs)	131
5.3.5.1 DSC and FTIR.....	131
5.3.5.2 Olympus microscopy.....	132
5.3.5.3 Sodium sulphate induced flocculation or electrolyte induced flocculation study	132
5.3.5.4 In vitro serum protein adsorption/ opsonisation study	132
5.3.5.5 Liposome membrane integrity test.....	135

5.3.6 Lyophilization of PLs and DLPLs.....	135
5.3.7 Stability Studies.....	137
5.3.8 Statistical Analysis.....	139
5.4 Result and Discussion.....	140
5.4.1 Preparation of conventional liposomes.....	140
5.4.2 Preparation of PEGylated conventional liposomes.....	157
5.4.3 Preparation of Double loaded PEGylated liposomes.....	159
5.4.4 Characterization of PEGylated Conventional and double loaded liposomes...	161
5.4.4.1 Particle size and Zeta Potential analysis.....	161
5.4.4.2 Cryo-TEM.....	163
5.4.4.3 Entrapment efficiency and drug loading.....	164
5.4.4.4 In vitro drug release study.....	164
5.4.5 Additional characterization for PEGylated double loaded liposomes.....	165
5.4.5.1 DSC and FTIR.....	165
5.4.5.2 Olympus microscopy:.....	169
5.4.5.3 Sodium Sulphate induced flocculation.....	170
5.4.5.4 In vitro serum protein adsorption study/opsonization study.....	172
5.4.5.5 Liposome membrane integrity test.....	174
5.4.6 Lyophilization of PLs and DLPLs.....	176
5.4.7 Stability studies.....	178
5.4.8 Statistical analysis.....	178
5.5 References.....	182

Chapter 6.....	190
6.1 Introduction.....	190
6.2 Materials and Instruments.....	197
6.3 Methods.....	198
6.3.1 Preparation of functionalized PEGylated double loaded liposomes.....	198
6.3.2 Fragmentation of Monoclonal Antibody.....	200
6.3.3 Preparation of Immunoliposomes.....	202
6.3.4 Characterization of Immunoliposomes.....	203
6.4 Result and Discussion.....	207
6.4.1 Preparation of functionalized PEGylated double loaded liposomes.....	207
6.4.2 Fragmentation of Monoclonal Antibody.....	210
6.4.3 Preparation of Immunoliposomes.....	213
6.4.4 Characterization of Immunoliposomes.....	214
6.5 References.....	217
 Chapter 7.....	 219
7.1 Introduction.....	219
7.2 Materials and Instruments.....	221
7.3 Methods.....	222
7.3.1 General Methods and Preparations.....	222
7.3.2 Determination of Follicle Stimulating Hormone Receptor (FSHR) Expression	225
7.3.2.1 Confocal microscopy.....	225

7.3.2.2 Flow cytometry analysis.....	226
7.3.3 Immunoreactivity of prepared Fab' fragments and Immunoliposomes	227
7.3.4 In vitro cytotoxicity assay (MTT study).....	229
7.3.5 In vitro cell uptake study.....	231
7.3.5.1 Preparation of 6-coumarin loaded liposomes.....	231
7.3.5.2 Cell uptake study using confocal microscopy.....	231
7.3.5.3 Cell uptake study using flow cytometry.....	232
7.3.6 Wound scratch assay	233
7.3.7 Cell death analysis using flow cytometry	234
7.3.8 Cell cycle analysis.....	235
7.4 Result and Discussion	237
7.4.1 Determination of Follicle Stimulating Hormone Receptor (FSHR) Expression	237
7.4.1.1 Confocal microscopy.....	237
7.4.1.2 Flow cytometry analysis.....	238
7.4.2 Immunoreactivity of prepared Fab' fragments and Immunoliposomes.....	240
7.4.3 In vitro cytotoxicity assay (MTT study).....	243
7.4.4 In vitro cell uptake study.....	248
7.4.4.1 Preparation of 6-coumarin loaded liposomes.....	248
7.4.4.2 Cell uptake study using confocal microscopy.....	248
7.4.4.3 Cell uptake study using flow cytometry.....	250
7.4.5 Wound scratch assay	251
7.4.6 Cell death analysis using flow cytometry	253
7.4.7 Cell cycle analysis.....	258
7. 5 References	268
Chapter 8.....	270
8.1 Introduction	270
8.1.1 Hemolysis Study.....	270
8.1.2 Pharmacokinetic study.....	270
8.1.3 Acute Toxicity Study.....	271

8.2 Materials and Instruments.....	273
8.3 Methods	274
8.3.1 Hemolysis Study.....	274
8.3.2 Pharmacokinetic study.....	274
8.3.3 Acute Toxicity Study.....	275
8.4 Result and Discussion	275
8.4.1 Hemolysis study	275
8.4.2 Pharmacokinetic study.....	276
8.4.3 Acute Toxicity Study.....	278
8.5 References.....	280
Chapter 9.....	282
