## **Appendix 13: Scoring Pattern**

### **Scoring Pattern Reaction Scale for Students and Teachers**

#### ***Procedure of Scoring***

The data were scored manually by the students and teachers separately for the reaction scales. For scoring the statements on reaction scale, the five alternatives to each statement on “Multimedia Instructional Software Package” were scored in the following manner.

<b>ALTERNATIVES</b>	<b>SCORE GIVEN ITEM EXPRESSING</b>	
	<b>POSITIVE ATTITUDE</b>	<b>NEGATIVE ATTITUDE</b>
STRONGLY AGREE (SA)	5	1
AGREE (A)	4	2
UNDECIDED (UD)	3	3
DISAGREE (DA)	2	4
STRONGLY DISAGREE (SA)	1	5

The scores on each item of the reaction scale were then added up to give total reaction score.

Respected Principal,

This is to introduce Fr. Rayappan Irudayam.S.J, who is a student of Ph.D studies (2010-11). He has designed and developed a Computer based Multimedia Software Package to Teach Biology for the students of English Medium Schools following Gujarat Board. For this he needs to implement the prepared multimedia package in 12<sup>th</sup> standard and therefore he will need to take required number of classes for collecting data for his study.

We will be greatly obliged if you would kindly help him in granting the required number of classes in your esteemed school, so that he may be able to complete his data collection. We assure you that the data collected will be kept fully confidential and only used for his study purpose alone.

Thanking you in anticipation for your kind co-operation.
