

CONTENTS

Title	Page Number
Synopsis	1
Chapter 1 Introduction	17
Chapter 2 Insulin and sulfonylurea treatments of the human diabetics. Effects on erythrocyte membrane and serum enzymes.	77
Chapter 3 Insulin and sulfonylurea treatments of the human diabetics. Effects on erythrocyte membrane structure-function relationships.	116
Chapter 4 Effect of alloxan-diabetes on erythrocyte membrane structure function in male and female rats.	151
Chapter 5 Effect of alloxan-diabetes on the kinetic attributes of erythrocyte membrane enzymes in the male and female rats.	180
Chapter 6 Effect of alloxan-diabetes on the kinetic attributes of serum butyrylcholinesterase in male and female rats.	206
Chapter 7 Effect of alloxan-diabetes on the substrate kinetics of cardiac butyrylcholinesterase in male and female rats.	229
Chapter 8 Effect of alloxan-diabetes on the temperature kinetics of cardiac butyrylcholinesterase in male and female rats.	259
Summary	275
