

## LIST OF TABLES

Table No	Title	Page No
	<b>Chapter I, Introduction</b>	
1	Clinical subtypes of vitiligo	2
2	Clinical classification of vitiligo	3
3	Endogenous and exogenous sources of ROS	16
4	Sources of epidermal/systemic $H_2O_2$ generation/accumulation in vitiligo	25
5	SOD levels in vitiligo	26
6	Catalase levels in vitiligo	26
7	Glutathione peroxidase levels in vitiligo	26
8	GSH levels in vitiligo	27
9	LPO levels in vitiligo	27
10	Vitamin E levels in vitiligo	27
11	Antigens recognized by vitiligo autoantibodies	29
12	Genes that contribute to vitiligo susceptibility	39
13	Allelic variants in the catalase gene in vitiligo	41
14	HLA associations reported in vitiligo	46
15	Susceptibility loci for vitiligo	47
	<b>Chapter II, Vitiligo: Clinical profiles in Vadodara, Gujarat</b>	
1	Age and sex distribution of patients with various clinical types of vitiligo	80
2	Clinico demographic profiles of vitiligo patients	81
3	Family history of vitiligo patients	82
4	Association of vitiligo with other diseases	82
5	Precipitating factors	83
6	Association of Koebner phenomenon and leukotrichia with vitiligo	83
	<b>Chapter III A, The antioxidant status of vitiligo patients of different age groups</b>	
1	Systemic antioxidant status in non segmental vs segmental vitiligo patients in 16-25 years of age group	109
2	Systemic antioxidant status of active vs stable vitiligo patients in 16-25 years of age group	109

	<b>Chapter III B, Study on the antioxidant status of vitiligo patients of different clinical types</b>	
1	Summary of the antioxidant status in different clinical types of vitiligo compared to controls	128
	<b>Chapter IV A, Association of <i>catalase</i> T/C exon 9 polymorphism in relation to catalase activity and oxidative stress with vitiligo susceptibility in Gujarat population</b>	
1	Distribution of genotypes and alleles for the T/C SNP in <i>CAT</i> exon 9 in vitiligo patients and control population	136
	<b>Chapter IV B, Association of glutathione peroxidase codon 200 polymorphism in relation to its activity and oxidative stress with vitiligo susceptibility in Gujarat population</b>	
1	Distribution of genotypes and alleles for the T/C SNP in <i>GPX 1</i> exon 2 in vitiligo patients and control population	148
