

# Contents

## Summary

### **Chapter 1 General** **1 - 35**

- Oxygenases
- Model Studies
- The Reaction Pathway
- Termination
- Factors Responsible
- Asymmetric Epoxidation
- Binuclear metal complexes as catalysts
- Present work
- References

### **Chapter 2 Manganese(III) mannich-base complexes** **36 - 49**

- Experimental
- Results and Discussion
- References
- Tables

### **Chapter 3 Iron(III) and Chromium(III) mixed ligand complexes** **50 - 66**

- Experimental
- Results and Discussion
- References
- Tables

### **Chapter 4 Photo-assisted Reaction** **67 - 73**

- Experimental
- Results and Discussion
- References
- Table

**Chapter 5 Macrocyclic ligand complexes** **74 - 82**

Experimental  
Results and Discussion  
References  
Tables

**Chapter 6 Isomerization Reaction** **83 - 107**

Experimental  
Results and Discussion  
References  
Tables

**List of Publications** **108**
