

## CONTENTS

Certificate	i
Declaration	ii
Preface	iii
Acknowledgements	v
1 Introduction	1
1.1 Metabolic Syndrome	1
1.2 Peroxisome Proliferator Activated Receptors (PPARs) and Metabolic Syndrome	8
2 Designing PPAR agonists	33
3 Results and Discussion	39
3.1 5-phenyl and 5-benzyl 1,3-dioxane-2-carboxylic acid derivatives as PPAR $\alpha$ / $\gamma$ dual agonists	39
3.2 5-Alkyl 1,3-dioxane-2- carboxylic acid derivatives as PPAR $\alpha$ agonist	58
3.3 Modulation of subtype selectivity: Converting PPAR $\alpha$ / $\gamma$ dual agonists to selective PPAR $\alpha$ agonists	65
3.4 Bisoximinoalkanoic acid derivatives as potent and selective PPAR $\alpha$ agonists	71
4 Summary and Conclusions	77
5 Experimental	80
6 Spectra	218
7 References	342
8 Publications	354
9 Vitae	vii
