

TABLE OF CONTENTS

TITLE	Page no.
ABSTRACT	1
<hr/> CHAPTER 1	4
<hr/> INTRODUCTION	4
1.1. Introduction	5
1.1. The ubiquitin proteasome pathway	6
1.2. Ubiquitin activating enzyme (E1)	8
1.2.1. Transfer of ubiquitin to E2: interaction of E1 with E2	8
1.2.2. Transferring ubiquitin: interaction of E2 with E3	10
1.3. Ubiquitin conjugating enzymes (E2s)	11
1.4. Classification of E2s	12
1.4.1. Breakdown of E2s	13
1.4.1.1. UBC domain	13
1.4.1.2. UBC domain of all E2 enzymes: Class I enzymes with only UBC domain and domains flanking UBC domain in other E2s	15
1.4.1.3. C-Terminal Domain of Class II E2 enzymes	17
1.4.1.4. N-terminal domain of Class III E2 enzymes	18
1.4.1.5. Class IV E2s with both N- and C-terminal domains	19
1.4.2. Ubiquitin enzyme variants (UEVs)	20
1.5. Models for ubiquitin chain assembly	20
1.5.1. Sequential model	22
1.5.2. Indexation model	23
1.5.3. Seesaw model	23

1.5.4. Hybrid model	24
1.6. Significance of ubiquitination	25
1.7. Physiological significance of E2s	26
1.8. Rationale for selecting yeast ubiquitin conjugating enzymes as the research problem and yeast as model system	30
1.9. Brief introduction to chapters	30
CHAPTER 2	33
<hr/>	
CONSTRUCTION, EXPRESSION AND PURIFICATION OF UBC1	
<hr/>	
AND C-UBC1 FOLLOWED BY THEIR STRUCTURAL-FUNCTIONAL ANALYSIS	33
2.1. Introduction	34
2.2. Materials and methods	36
2.2.1. Comparison of linker sequence of UBC1 (<i>Saccharomyces cerevisiae</i>) with other organisms.	36
2.2.2. Strain used for in vivo studies	36
2.2.2.1. Bacterial strains and media	37
2.2.1.2. Construction of yeast vectors carrying genes for wild type UBC1 and c-UBC1 by site directed mutagenesis	37
2.2.3. Phenotype analysis	40
2.2.3.1. Effect of c-UBC1 on Growth of Yeast Cells	40
2.2.3.2. Heat stress test	40
2.2.3.3. Antibiotic sensitivity test	40
2.2.3.4. Thermotolerance test	41
2.2.4. In vitro studies	41
2.2.4.1. Construction of plasmids carrying <i>UBC1</i> and <i>c-UBC1</i> genes in bacterial expression vector pET-28 a	41
2.2.4.2. Purification of UBC1 and c-UBC1	43

2.2.4.3. Circular dichroism and fluorescence spectroscopy of UBC1 and c-UBC1	44
2.2.4.4. In vitro analysis to check polyubiquitination by c-UBC1	44
2.3. Results	47
2.3.1. Theoretical analysis of homologs of UBC1 sequences of various phyla	47
2.3.2. Construction of plasmids carrying genes encoding the proteins UBC1 and c-UBC1 in <i>Saccharomyces cerevisiae</i>	48
2.3.3. Functional evaluation of chimeric protein c-UBC1 in <i>S. cerevisiae</i>	50
2.3.3.1. Effect of c-UBC1 expression on the growth of <i>S. cerevisiae</i>	50
2.3.3.2. Complementation of c-UBC1 under heat stress	51
2.3.3.3. Complementation of c-UBC1 under thermotolerance	52
2.3.3.4. Complementation of c-UBC1 under protein translation inhibitors	53
2.4. Construction of <i>UBC1</i> and <i>c-UBC1</i> in bacterial expression vector for structural studies	54
2.4.1. Expression, purification and dialysis of UBC1 and c-UBC1	55
2.4.1.1. Circular dichroism and fluorescence spectra	57
2.4.1.3. Polyubiquitination assay	62
2.5. Discussion	63
CHAPTER 3	67
CONSTRUCTION AND CHARACTERIZATION OF UBC4 MUTANTS WITH SINGLE RESIDUES SWAPPED FROM UBC5	67
3.1. Introduction	68
3.2. Materials and Methods	70
3.2.1. In silico analysis of the binding partners of UBC4 and UBC5	70
3.2.2. Theoretical analysis for the variants of UBC4	71
3.2.3. Strains used for in vivo studies	71

3.2.4. Plasmids and plasmid construction/Construction of yeast vectors with variants of UBC4 gene generated by swapping with codons from UBC5	73
3.2.5. Testing the expression levels and stabilities of UBC4 WT and its variants	74
3.2.6. Effect of mutations on growth of cells	74
3.2.7. Heat stress test	75
3.2.8. Antibiotic sensitivity test	75
3.3. Results	76
3.3.1. In silico analysis of binding partners of UBC4 and UBC5	76
3.3.2. In silico analysis of protein stability of UBC4 variants in comparison to UBC4 wild type	93
3.3.3. Construction of UBC4 variants	94
3.3.4 Analysis of expression levels and stabilities of UBC4 WT and its variants at various time points in the time period of 24 h	99
3.3.5. Effect of expression of UBC4 variants on the growth of <i>S. cerevisiae</i>	100
3.3.6 Complementation of MHY508 Cells of <i>S. cerevisiae</i> by UBC4 variants under heat stress	102
3.3.7. Complementation by UBC4 variants under protein translation inhibitors	104
3.4. Discussion	106
SUMMARY	109
BIBLIOGRAPHY	115
List of publications	129
List of presentations done during Ph.D.	129
Conferences attended during Ph.D. tenure	130
