

ACKNOWLEDGMENT

I am deeply indebted to my guide Prof. D.B. Desai, Head, Centre of Advanced Study in Education, for his inspiring guidance. His help and encouragement have always been of immense value.

My sincere thanks are due to the subjects of the experiment, the B.Ed students of the Faculty of Education and Psychology of the year 1980-81.

But for the sympathetic co-operation that was extended from the Principal, Staff and students of Jeevan Sadhna School, Baroda, the experimental part of this work would not have been completed.

I will not mention here those who helped me at various phases of the research in various form as friends

I thank Mr B. D. Mistry for the technical assistance he extended in completing this endeavour.
