

## CONTENTS

### CHAPTER 1 : *INTRODUCTION*

1.1 Importance of Pharmaceutical Analysis	1
1.2 Aim of the study	2
1.3 The drugs selected for the study	3
1.4 Literature survey	5
1.5 Techniques involved in the proposed methods	6
1.5.1 Spectrophotometry	7
1.5.2 Flow injection analysis	8
1.5.3 High performance liquid chromatography	10
1.5.4 Fluorimetric analysis	11
1.5.5 Titrimetric methods	12

### CHAPTER 2 : *SPECTROPHOTOMETRIC ANALYSIS*

2.1 Experimental	13
2.2 Methods based on oxidation reactions	18
2.3 Methods based on oxidative coupling reactions	33
2.4 Methods based on redox reactions	38
2.5 Methods based on ion-pair complexation reactions	46
2.6 Methods based on charge transfer complexation reactions	67
2.7 Methods based on complexation with metal ions	86

### CHAPTER 3 : *FLOW INJECTION ANALYSIS*

3.1 Experimental	97
3.2 FIA of DFS, FMD and KTR using DCNP	98
3.3 FIA of FMD using cupric acetate	106
3.4 FIA of DLZ	111

### CHAPTER 4 : *HPLC ANALYSIS*

4.1 Experimental	116
4.2 HPLC method for the determination of DFS	117
4.3 HPLC method for the determination of DLZ	121
4.4 HPLC method for the determination of FMD	125

## CHAPTER 5 : *FLUORIMETRIC AND TITRIMETRIC ANALYSIS*

5.1 Fluorimetric method for the determination of DLZ	132
5.2 Titrimetric method for the estimation of DLZ	137
