

## LIST OF TABLES

| TABLE NO. | TITLE  | PAGE NO. |
|-----------|--|----------|
| 1.        | Recommendations for Working Surface Height in the Kitchen.   | 37<br>54 |
| 2.        | Bad Postures Versus Probable Site of Pain.   | 54       |
| 3.        | Comparative Data on Anthropometric Dimensions as Proportion of Stature.                                | 63       |
| 4.        | Anthropometric Measurements of Indian Housewives.  | 69       |
| 5.        | Comparative Analysis of Anthropometric Measurements.   | 70       |
| 6.        | Instruments to Measure Anthropometric variables and Reaches and Existing Kitchen Condition.            | 116      |
| 7.        | The Personal Characteristics of the Respondents.   | 134      |
| 8.        | Family characteristics of the selected Respondents.  | 136      |
| 9.        | Educational Background of the Respondents and Head of the Family.                                      | 137      |
| 10.       | Occupation of Respondents and their Spouses or Head of the Family.                                     | 138      |
| 11.       | Place of Origin of Respondents.  | 139      |
| 12.       | Statistical Analysis of Anthropometric Measurements.   | 141      |
| 13.       | Percentile Values of Anthropometric Measurements.  | 143      |
| 14.       | Mean Vertical Reaches of Women.  | 147      |
| 15.       | Correlation co-efficient and Percentage Relationship of Anthropometric Variables and Vertical Reaches. | 150      |

|   | PAGE No. |
|---|----------|
| 16. Stepwise Multiple Regression Analysis of Vertical Reaches and Anthropometric Variables.                                     | 153      |
| 17. Mean Shelf Height and depth Reaches.  | 157      |
| 18. Correlation co-efficient and Percentage Relationship of Anthropometric Variables and Shelf Reaches.                         | 161      |
| 19. Stepwise Multiple Regression Analysis of Shelf Reaches and Anthropometric Variables.  | 163      |
| 20. Mean Horizontal Reaches.  | 166      |
| 21. Correlation co-efficient and Percentage Relationship of Anthropometric Variables and Horizontal Reaches.                    | 175      |
| 22. Stepwise Multiple Regression Analysis of Horizontal Reaches and Anthropometric Variables.                                   | 177      |
| 23. Tenure of Housing of Respondents.   | 182      |
| 24. Homemakers' Participation in Giving Specifications for the Designing of Kitchen and Storage while Building their Own House. | 183      |
| 25. Types of Houses Occupied by the Respondents.  | 183      |
| 26. Types of Kitchens in the Selected Households.   | 184      |
| 27. Problems Faced by Homemakers Regarding Existing Work counter in the Kitchen.  | 185      |
| 28. Problems Faced by Homemakers Regarding Existing Storage.  | 186      |
| 29. Problems Faced by Homemakers Regarding Existing Kitchen.  | 187      |

|  | PAGE No. |
|--|----------|
| 30. Opinions of the Respondents Regarding the Adequacy of the Work counter Dimensions. | 188      |
| 31. Opinions of the Respondents Regarding the Storage Design.                          | 189      |
| 32. Opinion of the Respondents Regarding the Kitchen Design.                           | 191      |
| 33. Respondents' Opinion on their Features of the Kitchen.                             | 192      |
| 34. Opinion and Willingness to Give Suggestions for Better Kitchen Design.             | 192      |
| 35. User's Suggestions for Improvements in the Kitchen Design.                         | 194      |
| 36. Percentage of Types of Kitchen Based on the Shape of the Work counter.             | 195      |
| 37. Existing Kitchen size.   | 196      |
| 38. Location of Light Switch in the Kitchen.   | 197      |
| 39. Height of the Light Switch and Plug Point in the Kitchen.                          | 198      |
| 40. Work counter Surface Finish in the Selected Households.                            | 199      |
| 41. Length of the Existing Work counter in Kitchen.                                    | 200      |
| 42. Distribution of Households by Work counter Heights.                                | 201      |
| 43. Percentage of Depth of the Existing Work counter in the Households.                | 202      |
| 44. Types of Shelves in the Kitchen.   | 203      |
| 45. Location of Storage Shelves in the Kitchen.  | 203      |
| 46. Height and Depth of Shelves Under the Work counter.                                | 205      |
| 47. Height and Depth of Shelves Away or Beside the Work counter.                       | 207      |

|  | PAGE No. |
|--|----------|
| 48. Height and Depth of Kitchen Storage Shelves.   | 209      |
| 49. Types of Cooking Appliances Possessed by Respondent's Families.  | 210      |
| 50. Existing Number of Windows in the Kitchen of Selected Households.  | 211      |
| 51. Mean Height and Breadth of Existing Windows in the Kitchen.  | 211      |
| 52. Suggested Standards for Vertical Fittings in Relation to Stature Based on Vertical Reaches.                    | 214      |
| 53. Suggested Standards for Shelf Height and Depth in Relation to Stature Based on Shelf Height and Depth Reaches. | 216      |
| 54. Suggested Standards for Work counter Dimensions in Relation to Elbow Height Based on Horizontal Reaches.       | 220      |
| 55. Correlation Regression Analysis Between Age and Anthropometric Variables.                                      | 225      |
| 56. F-ratio for Effect of Marital Status on Anthropometric Measurements.   | 227      |
| 57. Critical Difference for Marital Status Groups on Anthropometric Measurements.                                  | 228      |
| 58. Correlation Regression Analysis Between Number of Children and Anthropometric Measurements.                    | 230      |
| 59. F-ratio for Effect of Food Habit on Anthropometric Measurements.   | 232      |
| 60-a. Intercorrelation Matrix of Anthropometric Characteristics.   | 234      |
| 60-b. Intercorrelation Matrix of Anthropometric Characteristics.   | 235      |
| 60-c. Intercorrelation Matrix of Anthropometric Characteristics.   | 237      |

|  | PAGE No. |
|--|----------|
| 61. t-Values Showing Differences in Existing Work counter Height and Standards Evolved.    | 239      |
| 62. t-Values Showing Differences in Existing Work counter Depth and Standards Evolved.     | 240      |
| 63. t-Values Showing Differences in Existing Shelf Heights and Standards Evolved.          | 242      |
| 64. t-Values Showing Differences in Existing Shelf Depth and Standards Evolved.            | 243      |
| 65. Percentile Distribution for Vertical Reaches with Reference to Stature.                | 316      |
| 66. Stepwise Regression of Vertical Reaches and Anthropometric Characteristics.            | 317      |
| 67. Percentile Distribution for Shelf Height and Depth Reaches with Reference to Stature.  | 318      |
| 68. Stepwise and Multiple Regression for Shelf Reaches and Anthropometric Characteristics. | 319      |
| 69. Percentile Distribution for Horizontal Reaches.  | 320      |
| 70. Stepwise Regression for Horizontal Reaches and Anthropometric Characteristics.         | 321      |
| 71. Analysis of Variance for Effect of Marital Status on Anthropometric Measurements.      | 323      |
| 72. Analysis of Variance of Effect of Food Habit on Anthropometric Measurements.           | 325      |
