My aspiration to gain PhD has become a reality after six years of learning in our lab. During this journey, several people have tremendously helped, encouraged and extended their arms to achieve the goal. At the end of this incredible journey and accomplishment, I am grateful to express my deepest sense of thanks to each and every one.

First and foremost, I take this opportunity to express my deep sense of gratitude and appreciation for my mentor and PhD supervisor **Dr Desh Deepak Singh** for his never ending support, encouragement and invaluable guidance throughout my research career. I am very grateful to him for having faith in my hard work and accommodating me in his research group. My journey from a dissertation trainee to PhD work under him was immense pleasurable and joyful. The transition of my forte from computational biology to structural biology would not be possible without him. With sound scientific advice, good teaching and lots of good ideas, he has also taught us other valuable principles of life and always treated us as his childrens. Apart from an excellent guide and researcher, I found him as a wonderful person with high principle and willingness to always help students. It was a blessing to work under his supervision. He has always tried to make me learn broad horizon regarding research skill development and communication skills. Today whatever I have learned as a researcher, the credit goes to my guide.

I am highly indebted to **Dr Anju Pappachan**, Assistant Professor, Department of Bioinformatics and Structural Biology, IIAR for being so kind, helpful and motivating. Her suggestions and personal guidance have provided an excellent basis for the present thesis.

I wish to express my warm and sincere thanks to my co-guide **Prof. Sarita Gupta**, HOD, Dept. of Biochemistry, for supporting my PhD candidature in Department of Biochemistry, The M. S. University of Baroda. Her comprehensive knowledge and logical inputs to my work have been a great value for me. Her constant support and guidance in my study are invaluable.
