

LIST OF TABLES

CHAPTER 2 – DIVERSITY AND DISTRIBUTION

2.1	Biogeographical zones of Gujarat, along with biotic provinces and biomes	33
2.2	Localities surveyed during the present study and their Forest Type	42
2.3	Quantification parameters of the rarity for each orchid specie	44
2.4	Comparative account of Orchidaceae in surrounding states	47
2.5	Host Specificity of Epiphytes	116
2.6	List of Orchids of Gujarat with their threat status and Conservation	120

CHAPTER 3 – DNA BARCODING

3.1	Primers and their PCR conditions	148
3.2	PCR Reaction Mixture	148
3.3	Composition of Cycle Sequencing Reaction Mixture	149
3.4	Sequencing Conditions for various primers	149
3.5	Concentration of isolated DNA	150
3.6	Amplification and sequencing success rates for the three loci	152
3.7	Average inter-specific K2P distance and percent species resolution using three loci	163

CHAPTER 5 - PHYTOCHEMISTRY

5.1	Classification of phenolics	215
5.2	Classification of terpenes	217

5.3	Orchids and their phytochemicals	218
5.4	Ethnobotanical importance of Orchids	222
5.5	Popular orchid preparations	229
5.6	Percent area and retention time of peaks in fingerprint profiling at 580 nm	240
5.7	Percent area and retention time of peaks in glycoside analysis at 254 nm	244
5.8	Percent area and retention time of peaks in saponin analysis at 580 nm	246
5.9	Percent area and retention time of peaks in steroidal analysis at 580 nm	248
5.10	Percent area and retention time of peaks in sterols analysis at 254 nm	251
5.11	Percent area and retention time of peaks in flavonoid analysis at 254 nm	253
5.12	Percent area and retention time of peaks in essential oil analysis at 580 nm	257
5.13	Percent area and retention time of peaks in phenolic analysis at 580 nm	261
5.14	Groups of phytochemicals present in the selected species of orchid	262
5.15	Percent area and retention time of peaks in antioxidant study at 580 nm	265
