

## LIST OF TABLES

### CHAPTER 1

Table 1.1	Artemisinin content in different organs of <i>A. annua</i> grown in greenhouse and field	12
-----------	--	----

### CHAPTER 2

Table 2.1	Experimental design details of each plot	38
Table 2.2	Layout plant for plant population density	44
Table 2.3	Dose details of treatments applied.	45
Table 2.4	Composition of Murashige and Skoog's basal medium (1962)	54

### CHAPTER 3

Table 3.1	Effect of different treatments on plant height	59
Table 3.2	Effect of different treatments on plant height	60
Table 3.3	Effect of different treatments on plant height	60
Table 3.4	Effect of different treatment on <i>A.annua</i> leaves yield & Artemisinin %	66
Table 3.5	Effect of fertility levels and sulphur on quality parameters & Artemisinin yield performance	66
Table 3.6	Effect of fertility levels and sulphur on <i>A.annua</i> leaves yield & Artemisinin % performance	67
Table 3.7	Effect of different treatments on dry leaf/stem ratio, leaves harvest index and Artemisinin yield performance	67
Table 3.8	Effect of fertility levels, and sulphur on <i>A.annua</i> growth	68
Table 3.9	Effect of different treatments on dry leaf/stem ratio, leaves harvest index, Artemisinin yield.	68
Table 3.10	Effect of plant population density on <i>A.annua</i> plant height.	75
Table 3.11	Effect of plant population density on <i>A.annua</i> plant height.	76

Table 3.12	Effect of plant population density on <i>A.annua</i> plant height.	76
Table 3.13	Effect of plant population density on <i>A. annua</i> yield & Artemisinin % performance	77
Table 3.14.	Effect of plant population density on quality parameters & Artemisinin yield performance.	77
Table 3.15	Effect of plant population density on yield and artemisinin %	78
Table 3.16.	Effect of plant population density on quality parameters & Artemisinin yield performance.	78
Table 3.17	Effect of plant population density on <i>A. annua</i> leaves yield & Artemisinin % performance	78
Table 3.18	Effect of plant population density on quality parameters & artemisinin yield performance.	79
Table 3.19.	Effect of growth regulators and stress on <i>A.annua</i> growth	82
Table 3.20	Effect growth regulators and stress on <i>A.annua</i> leaves yield & Artemisinin % performance.	83
Table 3.21	Effect of growth regulators and stress on quality parameters & Artemisinin yield performance	84
Table 3.22	Effect of growth regulators and stress on <i>A.annua</i> growth	85
Table 3.23	Effect growth regulators and stress on <i>A. annua</i> leaves yield & Artemisinin % performance.	86
Figure.3.24	3 Weeks old culture showing brownish callus.	87
Table 3.25	Effect of growth regulators and stress on <i>A.annua</i> growth	88
Table 3.26.	Effect growth regulators and stress on <i>A.annua</i> leaves yield & Artemisinin % performance	89
Table 3.27	Effect of growth regulators and stress on quality parameters & Artemisinin yield performance	90
Table 3.28	Effect of growth regulators on Artemisinin content and trichome index of <i>A.annua</i> .	95
Table 3.29	Effect of growth regulators on Artemisinin content and trichome index of <i>A.annua</i> .	95
Table 3.30	Effect of growth regulators on Artemisinin content and trichome index of <i>A.annua</i> .	96

Table 3.31	Effect of planting time on growth, biomass and Artemisinin yield.	99
Table 3.32	Effect of planting time on growth, biomass and Artemisinin yield.	100
Table 3.33	Effect of planting time on growth, biomass and Artemisinin yield	100
Table 3.34	GC-MS Analysis data of n-hexane extract of <i>A. annua</i> (Leaves) collected from different locations of India	109
Table 3.35	Major components identified through GC-MS	112
Table 3.36	Quantity of extracted <i>Artemisia</i> leaves generated	118
Table 3.37	Quantity of coal used in industry	118
Table 3.38	Production of briquette using extracted <i>Artemisia</i> leaves and other waste	121
Table 3.39	Comparative cost of fuel used in boiler	121
Table 3.40	Estimated annual saving Comparison of calorific value and cost saving	122
Table 3.41	Comparison of calorific value and cost saving	122
Table 3.42	Cost of Briquette/Ton with Briquette machine	123
Table 3.43	Validation parameters for quantification of Scopoletin	126
Table 3.44	Calibration curve parameters for quantification of Scopoletin in <i>A.annua</i> extract	128
Table 3.45	Effect of growth regulators of in vitro shoot induction in <i>A.annua</i> L. from leaf explants on MS medium	133

## CHAPTER 4

Table 4.1	Estimated area and production of <i>A.annua</i> cultivation in the country	149
Table 4.2	Loss on drying, Yield and Artemisinin % in different states.	149
Table 4.3	Socio-economic and resource structure of <i>A.annua</i> farmers in the study area	152
Table 4.5	Economics of production of <i>A.annua</i>	153
Table 4.6	The expenditure of <i>A.annua</i> cultivation	153

Figure. 1.1	Global pattern of malaria distribution	3
Figure 1.2	Extraction process of Artemisinin	10
Figure 1.3	Chemical structure of Artemisinin	11
Figure 1.4	Artemisinin imports into India	17
Figure 1.5	Demand and Production of <i>A.annua</i>	19

## CHAPTER 2

Figure 2.1	Methodology of cultivation of <i>A.annua</i>	42
------------	--	----

## CHAPTER 3

Figure 3.1	Different stages of cultivation of <i>A.annua</i>	61
Figure 3.2	Experimental plot view of <i>A.annua</i>	62
Figure 3.3	Experimental plot view of <i>A. annua</i>	63
Figure 3.4	Harvesting and drying of <i>A.annua</i>	64
Figure 3.5	HPTLC plate, arrow showing Artemisinin bands	69
Figure.3.6	(a) HPTLC chromatogram of standard Artemisinin (Rf: 0.09) (b) Calibration curve of standard Artemisinin at 540 nm.	70
Figure. 3.7	HPTLC chromatogram of <i>A. annua</i> L leaf sample.	71
Figure.3.8	3D view of HPTLC chromatogram of <i>A. annua</i> L. leaf extract.	71
Figure 3.9	Experimental field view of plants treated with different elicitors.	91
Figure: 3.10	Ventral leaf surface with glandular and non-glandular trichomes.	94
Figure 3.11	Minimum and maximum temperatures in different months.	102

Figure 3.12	Comparison of Artemisinin % and moisture content in shade dried and oven dried plants.	105
Figure 3.13	Identified components in the samples collected from different geographical area and their percentage content in extracts	113
Figure 3.14	Total ion chromatogram of sample A1, A2, A3 and A4	114
Figure 3.15	Total ion chromatogram of sample A5 and A6	115
Figure 3.16	GC/EI-MS	116
Figure. 3.17	GC/EI-MS	117
Figure 3.18	Brick machine and briquettes.	119
Figure 3.19:	Chemical structure of Scopoletin	125
Figure 3.20	<i>A. annua</i> extract showing identical peak with standard Scopoletin	126
Figure 3.21	Spectral comparison for the peaks of standard Scopoletin and <i>A.annua</i> extract	127
Figure. 3.22	Calibration curve of peak area versus concentration for Scopoletin	127
Figure. 3.23	Leaf explant placed on direct shoot induction medium.	134
Figure.3.24	3 Weeks old culture showing brownish callus.	134
Figure.3.25	4 Weeks old culture showing greenish callus.	134
Figure. 3.26.	Multiple shoots on multiplication medium after 2 weeks.	135
Figure 3.27	<i>A. annua</i> L. plantlets on elongation medium.	135
Figure. 3.28	Tissue culture	136

## CHAPTE R 4

Figure 4.1	<i>A.annua</i> cultivation in different parts of the country	142
Figure 4.2	Integrated approach for artemisinin production	145
Figure 4.3	Public-private-farmer partnership for sustainable cultivation of <i>Artemisia annua</i> against fighting malaria.	151
Figure 4.4	Different stages of cultivation in <i>Artemisia</i> crop from seed to plant.	154
Figure 4.5	Cultivation done by farmers in Madhya Pradesh.	155
Figure 4.6	Cultivation done by farmer in Uttarakhand.	156
Figure 4.7	Cultivation done by farmers in Gujarat	157
