

LIST OF PLATES

<u>PLATE</u>		<u>Page No.</u>
1 - (a) <u>Arenicolites variabilis</u>		
(b) <u>Arenicolites variabilis</u>	...	53
2 - (a) <u>Arenicolites statheri</u>		
(b) <u>Arenicolites statheri</u>	...	57
3 - (a) <u>Arenicolites sparsus</u>		
(b) <u>Arenicolites sparsus</u>	...	59
4 - (a) <u>Arenicolites nodosa</u>		
(b) <u>Arenicolites nodosa</u>	...	61
(c) <u>Arenicolites nodosa</u>	...	62
5 - <u>Lanicodichna metulata</u>	...	65
6 - (a) <u>Diplocraterion parallelum</u>		
(b) <u>Diplocraterion habichi</u>	...	67
7 - <u>Diplocraterion polyupsilon</u>	...	73
8 - (a) <u>Rizocorallium jenense</u>		
(b) <u>Rizocorallium irregularie</u>	...	75
9 - (a) <u>Spongeliomorpha paradoxica</u>		
(b) <u>Spongeliomorpha suerica</u>	...	80
10 - <u>Spongeliomorpha nodosa</u>	...	86
11 - <u>Enteropneusta burrows</u>	...	89
12 - (a) <u>Spirophyton</u> Sp.		
(b) <u>Spirophyton</u> Sp.	...	91
13 - (a) <u>Skolithos verticalis</u>		
(b) <u>Skolithos verticalis</u>	...	94
14 - <u>Monocraterion</u> Sp.	...	98
15 - (a) <u>Ophiomorpha nodosa</u>		
(b) <u>Ophiomorpha bornensis</u>	...	101

PLATE		Page No.
16	(a) <u>Cylindrichnus</u> Sp.	
	(b) <u>Cylindrichnus concentrichnus</u> ...	105
17	<u>Thalassinoides</u> Sp. ...	110
18	<u>Thalassinoides suevicus</u> ...	112
19	(a) <u>Scovenia gracilis</u>	
	(b) <u>Scovenia gracilis</u> ...	115
20	(a) <u>Munesteria</u> Sp. (Form A)	
	(b) <u>Munesteria</u> Sp. (Form B) ...	120
21	(a) <u>Munesteria</u> Sp. (Form C)	
	(b) <u>Munesteria</u> Sp. ...	122
22	<u>Taenidium serpentinum</u> ...	124
23	(a) <u>Taenidium kutchnesis</u>	
	(b) <u>Taenidium kutchnesis</u> ...	126
24	(a) <u>Planolites beverleyensis</u>	
	(b) <u>Planolites vulgaris</u> ...	130
25	(c) <u>Planolites annularis</u> ...	133
26	(a) <u>Planolites montanus</u>	
	(b) <u>Planolites montanus</u> ...	135
27	<u>Planolites montanus</u> (Tiny form) ...	137
28	Pyrite tubes ...	140
29	(a) <u>Paleophycus tubularis</u>	
	(b) <u>Paleophycus tubularis</u> ...	143
30	(a) <u>Paleophycus striatus</u>	
	(b) <u>Paleophycus striatus</u> ...	145
31	<u>Paleophycus alternatus</u> ...	147
32	(a) <u>Chondrites</u> Sp. A.	
	(b) <u>Chondrites</u> Sp. B. ...	151

<u>PLATE</u>		<u>Page No.</u>
33	(a) <u>Chondrites</u> Sp. C. (b) <u>Chondrites</u> Sp. D.	153
34	(a) <u>Phycodes palmatum</u> (b) <u>Phycodes coronatum</u>	155
35	(a) <u>Asterosoma radiciforme</u> (b) <u>Asterosoma radiciforme</u>	158
36	<u>Gyrophyllites</u> Sp.	161
37	<u>Gyrolithus polonicus</u>	164
38	(a) <u>Teichichnus rectus</u> (b) <u>Teichichnus repandus</u>	167
39	<u>Rosselia socialis</u>	174
40	<u>Zoophycos circinnatus</u>	177
41	(a) <u>Gyrochorte comosa</u> (b) <u>Gyrochorte comosa</u>	180
42	(a) <u>Helmintoida crassa</u> (b) <u>Helmintoida crassa</u>	184
43	(a) <u>Helminithopsis abeli</u> (b) <u>Helminithopsis abeli</u>	187
44	(a) <u>Neonerites uniserialis</u> (b) <u>Nereites</u> Sp.	189
45	<u>Curvolithos</u> Sp.	193
46	<u>Didymaulichnus</u> Sp.	195
47	<u>Scalari tuba missouriensis</u>	197
48	(a) <u>Scolicia parkerensis</u> (b) <u>Scolicia parkerensis</u>	201
49	<u>Scolicia prisca</u>	203

<u>PLATE</u>		<u>Page No.</u>
50- -	<u>Scolicia lata</u> ...	206
51 -	<u>Laminites kaitiensis</u> ...	208
52 -	<u>Spirophycus bicornis</u> ...	211
53 -	(a) <u>Echinoid & Holothuroid Trails</u> ...	214
	(b) <u>Echinoid & Holothuroid Trails</u> ...	214
54 -	<u>Lophoetenium ramosus</u> ...	217
55 -	<u>Pelecypodichnus</u> Sp. ...	220
56 -	<u>Paleodicton</u> Sp. ...	221
57 -	<u>Laevicyclus</u> Sp. ...	224
58 -	<u>Bergueria perata</u> ...	227
59 -	(a) <u>Crossopodia</u> Sp. ...	231
	(b) <u>Crossopodia</u> Sp. ...	231
60 -	<u>Walcottia</u> Sp. ...	234
61 -	Box Work burrows ...	237
62 -	Intense burrowing and Sedimentary record. ...	330
63 -	Relationship between burrowing Lithification, Scouring and Sedimentation at Omission Surfaces. ...	332
64 -	Repeated Phases of erosion and Sedimentation indicated by Ophiomorpha. ...	334
65 -	Preservation Pattern of mine- ralized <u>Thalassinoides</u> tubes. ...	335
66 -	Beds revealing complex series of erosional and depositional events. ...	337

<u>PLATE</u>		<u>Page No.</u>
67	- Formation of "Hiatus Concretions" due to interplay of deposition, scouring and lithification by organisms. ...	339
68	- <u>Cylindrichnus</u> burrows oriented in Paleocurrent direction. ...	340
69	- Pelecypod tracks on the hummocks indicating time of crisis. ...	341
70	- Shell <u>Coquiana</u> indicating episodic event of storm. ...	343
71	- Large scale ripple surfaces with traces of <u>Scolicia</u>	345
72	- Upper Astarte bed. Bed formation suggest storm effect. ...	346
73	- Crawling trails of <u>Gyrochorte</u> on rippled sandstones. ...	348
74	- Upper Astarte bed indicating a repeated episode of storm event ...	349
75	- Desiccation cracks in delta plain environment. ...	361
76	- Columnar structures in delta plain environment. ...	362
77	- Large Oysters in protected bay or lagoonal environments. ...	363
