

**List of tables in Results**

- A. Variation in leaf & leaflet size and plant height amongst the sites of Nandesari & IPCL and Mevli & Goral**
- B. (1-3) - Results of diversity indices of the sampled sites for the years 2001-03**
  - B1 -Results of diversity indices of the sampled sites for the year 2001**
  - B2 -Results of diversity indices of the sampled sites for the year 2002**
  - B3 -Results of diversity indices of the sampled sites for the year 2003**
- C. (1-4) - Variation observed in plant height, leaf (leaflet) size and reproductive out put amongst the plants growing in Baroda and Savli region**
  - C1 -Variations observed in the height (range difference 40-30%), leaf (leaflet) size and reproductive out put amongst the plants growing in Baroda and Savli region**
  - C2 -Variations observed in the height (range difference 29-20%), leaf (leaflet) size and reproductive out put amongst the plants growing in Baroda and Savli region**
  - C3 -Variations observed in the height (range difference 19-5%), leaf (leaflet) size and reproductive out put amongst the plants growing in Baroda and Savli region**
  - C4 -Variations observed in leaf (leaflet) size amongst the climbers and prostrate trailers growing in Baroda and Savli region**
- D. Comparative account of population size and land use pattern for Baroda and Savli urban areas**
- E. (1-3) - Plant species with different range of metapopulation**
  - E1 -Plant species with broad range of metapopulation**
  - E2 -Plant species with moderate range of metapopulation**
  - E3 -Plant species with narrow range of metapopulation**
- F. Variation in land use pattern for Baroda region**
- G. Variation in land use pattern for Savli region**
- H. Observation of changes in reproductive period of herbaceous plants noted for various years of study**
- I. List of plant species reported as a new record for Baroda and environs**
