

List of Tables

Table No.	Title of Table	Page No.
2.1	Structure of some common and uncommon polyamines	8
2.2	Developmental roles of polyamines in various plant species	18
2.3	Polyamine roles during various abiotic stress conditions	22
2.4	Polyamine roles during biotic stress conditions	26
3.1	Primers used for semi-quantitative RT-PCR and qRT-PCR analysis	37
3.2	PCR strategy for generating amiRNA-SolyACL5	46
3.3	Primers used for PCR	48
4.1	Characteristics of polyamine biosynthetic genes in tomato	65
4.2	Putative cis-regulatory elements identified in the promoter sequences of tomato polyamine biosynthetic genes	70
5.1	Important expression domains of identified polyamine biosynthetic genes during development and stress responses in tomato	147
