

## ACKNOWLEDGEMENTS

*I bow down and devote every bit of mine to the supreme Soul.*

The work presented in this thesis would not have been feasible without the inspiration and support of number of wonderful individuals, my thanks and appreciation to all of them for being part of this long though challenging, interesting and at times daunting journey. They were always there when I needed them the most and I take this opportunity to acknowledge them and extend my sincere gratitude for helping me make this Ph.D. thesis possible.

I owe deepest gratitude to my supervisor Prof. (Dr.) N.S.R. Krishnayya. I first started working in his lab as a master's student, inculcating interest in plant resilience against diverse ecological conditions. It sowed the seeds for my doctoral research work. My doctoral research endeavor was delightful. Prof. Krishnayya constantly helped me to remain focus on achieving my goal while going through some rough patches. Without his enthusiasm, encouragement, optimism and continuous support this thesis would hardly have been completed.

I express my heart-felt gratitude to Prof. (Dr.) Ramanjulu Sunkar, my second mentor for providing me the opportunity to work as a visiting scientist at his laboratory, Department of Biochemistry and Molecular Biology, Nobel Research Center, Oklahoma State University, Stillwater, U.S.A. Right from my landing at Stillwater, I was fortunate to receive his moral and emotional support. Under his guidance I could learn many skills related to plant miRNA research. He has been a source of motivation and inspired every bit of me towards new possibilities in life. I deeply appreciate the support and help received from the lab mates' Smitha Jose, Dr. Yong-Fang Li and Dr. Guru Jagadeeswaran. During my stay at Stillwater, I hardly felt home sick due to very warm support from Dr. Sunkar's family (Kanchana Gowdu and their kids), Harshad uncle, Mukta anty, Bharti anty, Manhar uncle and my room mates. I was very privileged to receive unconditional support from Prof. (Dr.) Vikram Mistry (Department Head, South Dakota State University, U.S.A) and Dr. Jai Rohila

---

(Associate Professor, South Dakota State University, U.S.A), who inspite of been far away took constant care of my well being.

I am very thankful for the financial assistance provided by M.S. University of Baroda. I acknowledge the support provided by Dr. Sanjay Ingle and Dr. Ketan Patel of Microbiology department, M.S. University of Baroda.

Special thanks to Prof. (Mrs.) Sandhya K. Garge (Head, Department of Botany) and Prof. Arun Arya (Ex-Head, Department of Botany) for providing facilities during the course of the study. I appreciate the support and encouragement provided by Prof. Arya especially during the late working hours. I express my gratitude to Prof. (Mrs.) Neeta R. Pandya for her advice and help during the entire research work. I am glad to receive help and support from all the teaching staff from the department through out the research journey.

Big thank you to my lab members Binal di, Dinakaran, Dhaval, Nirav, Alka di, Shivangi di, Krishna di, Bhavna di, Aparna, Shrena, Divya, Manjit and Rashmi for always helping me and bearing with me the good and bad times during my days of research work. They made the lab a great place to work joyfully. My special thanks goes to Nirav for helping me with the thesis and the official work. I would like to acknowledge my close friends Ashwini, Usha, Shree stuti, Darshini, Kiran, Ruchi and Shikha for being with me in thicks and thins of life.

I appreciate the help extended by Mr. Hasmukh bhai for looking after the financial requirements of the research and Mr. Sharmaji and Mr. Prakash bhai for their consistent support and help for all the official task. I am also thankful to all the lab technicians, non-teaching staff members of the Department of Botany for their generous support and help. I recognize the liberal help provided by Mr. Sailesh bhai and his works for the greenhouse experiments carried out in Botanical garden.

Lastly, though most important I am indebted for the support, encouragement and love provided by my family. To my Mom and Dad; I am thankful that you cared a lot about your daughter's education right from the childhood and always being source of

my strength. To my parents-in-law, bother and sister-in-law; for supporting and bearing with my tough and tedious working hours. To my nephew; who has always been a reason of joy and helped me revive the child hidden in me. To my husband Kishan, you are pillar of my strength. You have always been like a friend, rendering a shoulder to cry on and giving words of comfort and advice. You never stopped believing in me, even when I stopped believing in myself. Your love and support has pulled me through everything.

Lastly, I thank each and every one in my life whose silent blessings helped me complete this Ph.D. thesis
