

## LIST OF TABLES

<b>Table No.</b>	<b>Title</b>	<b>Page No.</b>
<b>Table 1</b>	Vegetative characteristics of shrub species growing at (a) control site and (b) experimental site	<b>55</b>
<b>Table 2</b>	Vegetative characteristics of herb species growing at (a) control site and (b) experimental site	<b>56</b>
<b>Table 3</b>	Phenotypic variations (leaf traits) observed in selected wild and cultivated species growing at control and experimental site. Tables (a) and (b) represents variations in wild species growing at control and experimental site respectively; and Tables (c) and (d) represents variations in cultivated species growing at control and experimental site respectively. Data are $\pm$ SD (n=10).	<b>59-60</b>
<b>Table 4</b>	Phenotypic variations (floral traits) observed in <i>I. campanulata</i> and <i>J. pentantha</i> growing at control and experimental site. Data are $\pm$ SD (n=10)	<b>60</b>
<b>Table 5</b>	Chlorophyll, anthocyanin and MDA concentration in <i>I. campanulata</i> and <i>J. pentantha</i> growing at control and experimental site. Data are $\pm$ SD (n=3).	<b>62</b>
<b>Table 6</b>	Chlorophyll, anthocyanin and MDA concentration in <i>I. campanulata</i> and <i>J. pentantha</i> growing under control and drought- stressed pots. Data are $\pm$ SD (n=3).	<b>73</b>
<b>Table 7</b>	<p><b>a.</b> Statistics of small RNA sequences/reads from control and drought stressed libraries of <i>I. campanulata</i> (Ic)</p> <p><b>b.</b> Statistics of small RNA sequences/reads from control and drought stressed libraries of <i>J. pentantha</i> (Jp)</p>	<b>82</b>
<b>Table 8</b>	<p><b>a.</b> Analogous miRNA families identified in the two Convolvulaceae species and their expression</p> <p><b>b.</b> Alien miRNA families identified solely in <i>I.</i></p>	<b>88-89</b>

*campanulata* or *J. pentantha* and its expression (“-“ indicates lack of expression)

<b>Table 9</b>	Abundantly expressed miRNAs in <i>I. campanulata</i> , <i>J. pentantha</i> or either of the control libraries; and their conserved putative targets and functional annotation as identified in <i>Arabidopsis</i>	<b>92-93</b>
<b>Table 10</b>	Drought responsive miRNAs identified in (a) <i>I. campanulata</i> and (b) <i>J. pentantha</i>	<b>96</b>
