

LIST OF FIGURES

Figure 1: Eight biogeographic realms and 14 biomes according to terrestrial ecoregions of the world: a New Map of Earth (Olson et al., 2001).....	3
Figure 2: Tropical forests are shown in dark green colour. The occurrence between the tropic of Cancer and tropic of Capricorn. Source: http://earthobservatory.nasa.gov/	3
Figure 3: Location of the study regions in Madhya Pradesh state, Central India.	21
Figure 4: Seasonal variation of different weather parameters in KNP (2010-2014).	22
Figure 5: Seasonal variation of weather parameters in BNP (2010-2014).	25
Figure 6: Seasonal variation of weather parameters in MNP (2010-2014).	27
Figure 7: Methodology followed in the present study.	29
Figure 8: An elementary sample unit is delineated as a 31.62mx31.62m.....	31
Figure 9: Sample plots and their geographic locations in a) Kanha National Park, b) Bandhavgadh National Park, and c) Madhav National Park.....	32
Figure 10: (a) Tree girth at breast height (GBH) being measured using Vernier callipers and (b) tree height being measured using electronic clinometer at one of the sample plots in KNP.	33
Figure 11: Agro-Meteorological Station (AMS) and Automatic Weather Station (AWS) with different instruments mounted at different heights.	34
Figure 12: Steps followed in satellite data based forest type classification.	41
Figure 13: Development and validation of radiation model.	50
Figure 14: Climate variability in KNP for the period 2011-2014.	52
Figure 15: Effect of atmospheric correction, a-b) uncorrected (TOA) and corrected Landsat scene, c-d) histograms of red and NIR band before and after atmospheric correction.	54
Figure 16: Multi-date Landsat satellite images coinciding with key phenological phases of deciduous forest in KNP.	55
Figure 17: Forest cover map of Kanha National Park.	55
Figure 18: Spatial variability of NPP over KNP for the period 2011-2014.	58
Figure 19: Scatter plot describing the correlation between fields measured NPP and CASA derived NPP over KNP for the period 2011-2014.	60
Figure 20: Climate variability in BNP during the study period.	65
Figure 21: Effect of atmospheric correction, a-b) uncorrected (TOA) and corrected Landsat scene, c-d) histograms of red and NIR band before and after atmospheric correction.	67
Figure 22: Multi-date Landsat 5 TM satellite images coinciding with key phenological phases of deciduous forests in BNP.	68
Figure 23: Forest cover map of Bandhavgadh National Park.	68
Figure 24: Spatial variability of NPP over BNP for the period 2011-2014.	71
Figure 25: Scatter plot describing the correlation between fields measured NPP and CASA derived NPP over BNP for the period 2011-2014.	72
Figure 26: Climate variability in MNP during the study period.	78
Figure 27: Effect of atmospheric correction, a-b) uncorrected (TOA) and corrected Landsat scene, c-d) histograms of red and NIR band before and after atmospheric correction.	79
Figure 28: Multi-date Landsat 5 TM satellite images coinciding with key phenological phases in MNP.	80
Figure 29: Forest cover map of Madhav National Park.	80
Figure 30: Spatial variability of NPP over MNP for the period 2011-2014.	83
Figure 31: Scatter plot describing the correlation between fields measured NPP and CASA derived NPP over MNP for the period 2011-2014.	84

Figure 32: Relation between NPP and different climate factors obtained over KNP, BNP and MNP for the period 2011-2014..... 86

LIST OF APPENDIX

Appendix 1: List of tree species recorded in KNP	151
Appendix 2: List of mammals recorded in KNP	154
Appendix 3: Percent contribution of different species recorded at biomass sample plots in KNP	155
Appendix 4: Percentage of trees showed increment in DBH, and values in parenthesis indicate an average annual increment in DBH (cm year ⁻¹)	157
Appendix 5: Relative deviation (%) in AGB compared to AGB in the initial year of the study (i.e. 2010)	157
Appendix 6: List of tree species recorded in BNP	158
Appendix 7: List of mammals recorded in BNP	169
Appendix 8: Percent contribution of different tree species recorded at biomass sample plots in BNP	170
Appendix 9: Percentage of trees showed increment in DBH, and values in parenthesis indicate an average annual increment in DBH (cm year ⁻¹)	172
Appendix 10: Relative deviation (RD%) in AGB compared to AGB in the initial year of the study (i.e. 2010)	172
Appendix 11: List of tree species recorded in MNP	173
Appendix 12: List of mammals recorded in MNP	176
Appendix 13: Percent contribution of different species recorded at biomass sample plots in MNP	177
Appendix 14: Percentage of trees showed increment in DBH, and values in parenthesis....	178
Appendix 15: Relative deviation (RD%) in AGB compared to AGB in the initial year of the study (i.e. 2010)	178
Appendix 16: Volumetric Equation of tree species occurring in the study area.....	179
Appendix 17: Specific gravity of tree species occurring in the study area.....	180
