

Page Index

Name of the Topic	Page Number(s)
<u>Chapter – I: Introduction</u>	
• Fluorescence	1
• Applications of Fluorescence	2-4
• Phosphorescence	4
• Types of Luminescence	5-7
• Mechanism of Luminescence	7-10
• Doping	10-11
• Thermoluminescence (TL) or TSL	12-15
• Configuration Co-ordination curve model	15-17
• Applications of Thermoluminescence	18-30
• Lamps and Phosphors	30
• Phosphor Research past and present	30-33
• New Phosphor Blends	33-34
• Energy Levels of Defects in Solids	35
• Rare earth Ions and their Thermoluminescence Properties	36-44
• About the present work	45-46
• References	46-48
<u>Chapter – II: Phosphor synthesis</u>	
• Solid State diffusion process	49-53
• Synthesis	53-54
• Phosphor parameters	54-56
• Synthesis of BAM phosphors	56-57
• Preparation of BAM Phosphors	57-64
• References	65-66

Name of the Topic	Page Number(s)
-------------------	-------------------

Chapter –III: Instrumentation

• Optical system of spectrofluoro photometer	67-75
• Thermoluminescence (TL) Glow Curve Recorder	75-80
• TL Emission spectra Recorder	80-81
• X-ray diffractometer	82-83
• Furnace for heating of specimens and Radio active sources for irradiation	84
• References	84-85

Chapter – IV: Characterization, Thermoluminescence and Photoluminescence studies of BAM doped phosphors and Results and discussions

• Preparation of the phosphor	86
• Characterization of the phosphor using X-ray diffraction	87-98
• Thermoluminescence Studies (Gama – irradiation)	99-119
• Thermoluminescence (TL) emission spectra	119-122
• Thermoluminescence studies of beta irradiation	123-140
• The effect of particle grain size on the Thermoluminescence	141-143
• Fluorescence (Photoluminescence studies) and discussion	144-158
• Discussion and summary of TL studies of Beta irradiated samples	159-160
• Discussion and summary of TL studies of Gama irradiated samples	160-167
• References	168-172

Chapter –V: Thermoluminescence studies of X-ray irradiated phosphors

- Introduction 173-175
- Thermoluminescence of X-ray irradiated Phosphors:
Results and discussions 176-180
- Low Temperature Thermoluminescence of X-ray irradiated
Phosphors: Results and discussions 180-186
- References 187

Chapter-VI

- Conclusions and suggestions for the future research work 188-192
