

## List of Figures

<u>No.</u>	<u>Title</u>	<u>Page no.</u>
<b>Chapter 1</b>	<b>Introduction</b>	<b>1-104</b>
1.1	Schematic diagram of Necrosis and Apoptosis	3
1.2	Pathways leading to cell death	4
1.3	Calcium-mediated programmed necrosis	8
1.4	Schematic representation of apoptotic events	16
1.5	The extrinsic pathway	18
1.6	Regulation of Apoptosis by FADD and FLIP proteins	19
1.7	Mitochondrial involvement in apoptosis	23
1.8	Activation of executioner caspases	26
1.9	Structural properties of caspases, paracaspases, and metacaspases	28
1.10	Poly(ADP-ribose) polymerase 1 (PARP-1)	32
1.11	Structural and Functional Organization of PARP-1 and PARP-2	35
1.12	Evolutionary conservation of functional domains in AIF family proteins	46
1.13	PARP-1 overactivation leads to cell death	47
1.14	Life cycle of <i>D. discoideum</i>	63
1.15	Signaling during initiation of <i>D. discoideum</i> development	65
<b>Chapter 2</b>	<b>Materials and Methods</b>	<b>107-119</b>
2.1	Formation of fluorescent Compound DCF by ROS	113
<b>Chapter 3</b>	<b>Mechanism of cadmium (Cd<sup>2+</sup>) induced cell death in <i>Dictyostelium discoideum</i></b>	<b>120-156</b>
3.1.1	Dose dependent effect Cd <sup>2+</sup> induced cell death by Trypan blue exclusion test and PS-PI dual staining	123
3.1.2	Cd <sup>2+</sup> induced intracellular ROS production monitored by fluorometry and fluorescence microscopy	124
3.1.3	Effect of GSH on Cd <sup>2+</sup> induced cell death	126
3.1.4	Effect of GSH on Cd <sup>2+</sup> induced ROS production	126
3.1.5	Cd <sup>2+</sup> induced DNA damage assayed using anti-H2AX	127
3.1.6	Effect of Cd <sup>2+</sup> on PARP activation in <i>D. discoideum</i>	128

3.1.7	Effect of Cd <sup>2+</sup> on cellular NAD <sup>+</sup> levels	129
3.1.8	Cd <sup>2+</sup> induced changes in MMP monitored by DiOC <sub>6</sub> using fluorometry and fluorescence microscopy	130
3.1.9	Effect of GSH on Cd <sup>2+</sup> induced changes in MMP by fluorometry and fluorescence microscopy	131
3.1.10	Effect of GSH on Cd <sup>2+</sup> induced developmental changes	133
3.2.1	Dose and time dependent effect of cumene H <sub>2</sub> O <sub>2</sub> on cell death by Trypan Blue Exclusion test and PS-PI dual staining	134
3.2.2	Effect of H <sub>2</sub> O <sub>2</sub> on ROS production detected by fluorimetry and fluorescence microscopy	135
3.2.3	Effect of H <sub>2</sub> O <sub>2</sub> induced PARP activation in <i>D. discoideum</i>	137
3.2.4	Effect of H <sub>2</sub> O <sub>2</sub> on cellular NAD <sup>+</sup> levels	138
3.2.5	Effect of H <sub>2</sub> O <sub>2</sub> induced changes in MMP by fluorometry and fluorescence microscopy	139
<b>Chapter 4</b>	<b>The role of poly (ADP-ribose) polymerase during Cd<sup>2+</sup> induced cell death</b>	<b>157-205</b>
4.1.0	Dose dependent effect of NAD <sup>+</sup> supplementation on <i>D. discoideum</i> cell death	160
4.2.1	Effect of NAD <sup>+</sup> supplementation on Cd <sup>2+</sup> induced cell death	161
4.2.2	Effect of PARP inhibition on Cd <sup>2+</sup> induced cell death	161
4.2.3	Effect of gallotannin on Cd <sup>2+</sup> induced cell death	162
4.2.4	Effect of NAD <sup>+</sup> supplementation on H <sub>2</sub> O <sub>2</sub> induced cell death	163
4.2.5	Effect of PARP inhibition on H <sub>2</sub> O <sub>2</sub> induced cell death	163
4.2.6	Effect of PARG inhibition on H <sub>2</sub> O <sub>2</sub> induced cell death	164
4.2.7	Effect of Calpain inhibition on H <sub>2</sub> O <sub>2</sub> induced cell death	164
4.3.1	Effect of NAD <sup>+</sup> on Cd <sup>2+</sup> induced ROS production	165
4.3.2	Effect of PARP inhibition on Cd <sup>2+</sup> induced ROS production	166
4.3.3	Effect of gallotannin on Cd <sup>2+</sup> induced ROS production	166
4.3.4	Effect of NAD <sup>+</sup> supplementation on H <sub>2</sub> O <sub>2</sub> induced ROS production	166
4.3.5	Effect of benzamide on H <sub>2</sub> O <sub>2</sub> induced ROS production	167
4.3.6	Effect of gallotannin on H <sub>2</sub> O <sub>2</sub> induced ROS production	167
4.3.7	Effect of ALLN on H <sub>2</sub> O <sub>2</sub> induced ROS production	168
4.4.1	Effect of NAD <sup>+</sup> supplementation on Cd <sup>2+</sup> induced PARP activation	169

4.4.2	Effect of benzamide on Cd <sup>2+</sup> induced PARP activation	170
4.4.3	Effect of gallotannin on Cd <sup>2+</sup> induced PARP activation	171
4.4.4	Effect of NAD <sup>+</sup> supplementation on H <sub>2</sub> O <sub>2</sub> induced PARP activation	172
4.4.5	Effect of benzamide on H <sub>2</sub> O <sub>2</sub> induced PARP activation	173
4.4.6	Effect of gallotannin on H <sub>2</sub> O <sub>2</sub> induced PARP activation	174
4.4.7	Effect of ALLN on H <sub>2</sub> O <sub>2</sub> induced PARP activation	175
4.5.1	Effect of exogenous addition of 10 mM NAD <sup>+</sup> on Cd <sup>2+</sup> induced NAD <sup>+</sup> depletion	176
4.5.2	Effect of PARP inhibition on Cd <sup>2+</sup> induced NAD <sup>+</sup> depletion	177
4.5.3	Effect of PARG inhibition on Cd <sup>2+</sup> induced NAD <sup>+</sup> depletion	177
4.5.4	Effect of exogenous addition of NAD <sup>+</sup> on H <sub>2</sub> O <sub>2</sub> induced NAD <sup>+</sup> depletion	178
4.5.5	Effect of PARP inhibition on H <sub>2</sub> O <sub>2</sub> induced NAD <sup>+</sup> depletion	178
4.5.6	Effect of PARG inhibition on H <sub>2</sub> O <sub>2</sub> induced NAD <sup>+</sup> depletion	179
4.6.1	Effect of exogenous addition of NAD <sup>+</sup> on Cd <sup>2+</sup> induced MMP changes by fluorometry and fluorescence microscopy	180
4.6.2	Effect of benzamide on Cd <sup>2+</sup> induced changes in MMP by fluorometry and fluorescence microscopy	181
4.6.3	Effect of gallotannin on Cd <sup>2+</sup> induced changes in MMP by fluorometry and fluorescence microscopy	183
4.6.4	Effect of exogenous addition of NAD <sup>+</sup> on H <sub>2</sub> O <sub>2</sub> induced MMP changes by fluorometry and fluorescence microscopy	184
4.6.5	Effect of PARP inhibition on H <sub>2</sub> O <sub>2</sub> induced MMP changes by fluorometry and fluorescence microscopy	186
4.6.6	Effect of ALLN pre treatment on H <sub>2</sub> O <sub>2</sub> induced MMP changes by fluorometry and fluorescence microscopy	187
4.7.1	Heterologous expression of Sf-1 caspase in <i>D. discoideum</i>	191
4.7.2	Development of <i>D. discoideum</i> cells transfected with pA15-GFP	191
