Chapter	Title	Page
	SYNOPSIS	I
	LIST OF TABLES	XI
	LIST OF FIGURES	XVI
1	INTRODUCTION	1 - 5
2.0.0	LITERATURE SURVEY	6 - 37
2.1.1	Effective interfacial areas in columns.	6
2.2.0	Mass transfer coefficients for gas absorption.	14
2.3.0	Other design parameters.	23
2.4.0	Correlations for interfacial areas in packed columns	27
2.5.0	Correlations for mass transfer coefficients in packed columns.	31
2.6.0	Distillation in packed columns.	34
2.7.0	Summary.	35
3.0.0	NUMERICAL METHODS AND OPTIMIZATION TECHNIQUES.	38 - 50
3.1.0	Multiple linear regression.	39
3.2.0	Unconstrained optimization.	41
3.3.0	Salient features of the software developed in this investigation.	49
4.0.0	GENERAL CONSIDERATIONS.	51 - 62
4.1.0	Estimation of k_G from $K_G a$ data for absorption without chemical reaction.	51
4.2.0	Estimation of $k_L a$ from $K_G a$ data for absorption with chemical reaction.	53
4.3.0	Estimation of different parameters.	54
4.4.0	Estimation of HETP from $k_L a$, k_V and a_d .	60

5.0.0	DATA TABLES.	63 - 100
	Data tables for effective interfacial areas.	66
	Data tables for mass transfer coefficients.	77
6.0.0	MATHEMATICAL MODELLING OF INTERFACIAL AREAS AND MASS TRANSFER COEFFICIENTS.	101 - 120
6.1.0	Interrelationships between static area and interfacial areas.	101
6.2.0	Parameters affecting static area.	106
6.3.0	Mathematical modelling of static area (a_{st}).	110
6.4.0	Interrelationships between mass transfer coefficients with chemical reaction and without chemical reaction.	111
6.5.0	Prediction of $k_L a$ by mathematical modelling.	119
7.0.0	RESULTS AND DISCUSSION FOR INTERFACIAL AREA.	121 - 199
7.1.0	Results and discussion for wetted surface area (a_w).	121
7.2.0	Results and discussion for effective interfacial area during physical absorption (a_p).	136
7.3.0	Results and discussion for effective interfacial area during chemical absorption (a_c).	152
7.4.0	Results and discussion for static area (a_{st}).	170
7.5.0	Prediction of interfacial areas.	197
8.0.0	RESULTS AND DISCUSSION FOR MASS TRANSFER COEFFICIENTS.	200 - 324
8.1.0	Results and discussion for volumetric liquid side mass transfer coefficient ($k_L a$).	200
8.2.0	Results and discussion for true gas side mass transfer coefficient.	224
8.3.0	Results and discussion for true liquid side mass transfer coefficient.	266
8.4.0	Results and discussion for volumetric liquid side mass transfer coefficient with chemical reaction ($k_L a$).	290
8.5.0	Prediction of mass transfer coefficients.	322

9.0.0	DISTILLATION IN PACKED COLUMNS.	325 - 351
9.1.0	Model development for HETP.	325
9.2.0	Data bank for the HETP values,	329
9.3.0	Results for the predicted value of HETP.	330
9.4.0	Comparison between the experimental values based on data bank and the predicted values of HETP.	338
10.0	CONCLUSIONS.	352 - 364
10.1.	Some observations/concluding remarks for numerical methods and optimization techniques.	352
10.2.	Conclusions for effective interfacial areas.	353
10.3.	Conclusions for mass transfer coefficients.	358
10.4	Conclusions for distillation in packed columns.	363
	NOTATION	365
	REFERENCES	371
	APPENDIX - 1 : Sample Calculations.	385
	APPENDIX - 2 : Computer program's.	398
