

ACKNOWLEDGEMENT

It was a situation in which I had reconciled to the idea that this endeavour was not within my reach in the then existing circumstances. Then Dr. Sukh Dev encouraged me, offered a place in his illustrious research school, meticulously planned my work and supervised it all along bearing my lapses with patience. He, like Dakṣhināmūrti, taught me many things even without the use of words.

Words are poor vehicles of thoughts, but they are the only ones. I borrow them from Bhavabhūti and express my feelings towards Śri Sukh Dev in the following verse:

व्यतिषजति पदार्थानन्तरः कोपि हेतु-
 र्न रवक्रु बहिरुपाधीन् प्रीतयस्संभ्रयन्ते।
 विकसति हि पतङ्गस्यौद्वये पुण्डरीकं
 द्रवति च हिमरश्मावुद्धते चन्द्रकान्तः॥

It is my pleasant duty to express grateful and sincere thanks to Dr. H.P.S. Chawla. His practical suggestions were immensely useful for maintaining the pace of my work. He was available at all times to show me the way. To him goes my heartfelt gratitude.

I am also grateful to Dr. D.R. Sridhar, General Manager, I.D.P.L. Research Centre, Hyderabad for sanctioning me study leave.

I wish to thank Śri. K.N. Trivedi, Head, Dept. of Chemistry, M.S. University of Baroda for his co-operation.

I wish to thank Dr. N.P. Damodaran, Group Leader, MRC, Dr. R.S. Prasad, Maryland University, Sri. K. Srinivasa Rao and Sri. C.R. Sarma, I.D.P.L. for their co-operation. I thank Dr. C.L. Bhagchandani, Sri. J.T. Bhanvadia, Sri. M.S. Patel and Sri. M.C. Pant for spectral data, Sri. V.K. Kulkarni for GLC, Dr. S. Satish, IPCL for ^{13}C -NMR and Sri. S. Madhava Rao, M.S. University for elemental analysis. I would like to acknowledge the moral support of my colleagues who made my stay at MRC pleasant.

Financial assistance by Malti-Chem Research Centre is gratefully acknowledged. Finally, I owe much to my wife for her forbearance during the time that was required to complete this work.
