

List of Tables

Table 1.1. Biofuel production, pharmaceutical, and nutraceutical application of a few microalgal species	7
Table 1.2. Recent advances to improve the bioenergy yield in microalgae.....	17
Table 1.3. Conventional biochemical methods versus new-age biophysical techniques used for the analysis of biomolecules in microalgae	32
Table 2.1. Gene-specific primers designed for quantitative real-time PCR	74
Table 3.1. Growth parameters and biomass yield of <i>C. reinhardtii</i> grown under hetero/mixotrophy	134
Table 4.1. Raman peak assignments of starch, protein, chlorophyll, carotenoid, and lipids for <i>C. reinhardtii</i>	184
Table 4.2. Mean Nile red fluorescence intensity and normalized Raman intensity measured at 1063 cm^{-1} across a population of ~100 <i>C. reinhardtii</i> cells.	187
Appendices	
Table A1.1. Composition of stock solutions for TAP medium.....	237
Table A1.2. Composition of Phosphate Buffer II.....	237
Table A1.3. Composition of Solution A.....	237
Table A1.4. Composition of Hutner's Trace Elements (HTE) solution.....	238
