

ACKNOWLEDGEMENT

I utilize this opportunity to express my indebtedness to many who motivated me and helped me in my research.

At the outset I would like to express my deepest sense of gratitude to Professor A.K.Rakshit, who supervised me throughout this work. His guidance, valuable suggestions and constructive criticisms were really worthy to be acknowledged. I also owe him for all the personal attention I received from him.

I owe Professor A.C.Shah, Head of the Department, for providing me all the necessary facilities in the department to carry out this research.

I also thank the other staff members of the department for their co-operation and help.

I harbour a sense of obligation to my colleagues Mr. Ajith S., Dr.Roychen Joseph and Dr.Veena Vanganu for their unfailing encouragement, support and help all through the work right from the beginning.

Thanks are equally due to all my friends in the department and in the V.S.Hall of M.S.University for their encouragement and support during my stay in Baroda.

I recollect gratefully all the help, particularly at the beginning, from Mr.Saji Thomas, Department of Archaeology, who prompted me to come to Baroda for my Ph.D.

I am thankful to my friends in the IPCL, Baroda, for helping me to gather the references from the IPCL Library.

I acknowledge sincerely the financial support received from Oil and Natural Gas Commission (ONGC), India, throughout the tenure of this work. I am also thankful to the Director, I.R.S., ONGC, Ahmedabad and many others at the Tertiary Laboratory, IRS, for the measurements of Interfacial tension.

I owe my parents, my brother and sister as well as all my relatives more than the words can confine, for their encouragement, love and care during my research work.

Finally I thank Mr.T.C.Titus for the effort he has taken to bring this thesis to its final form.

(AJITH CHERIAN JOHN)
