

## C O N T E N T S

- I. INTRODUCTION ... .. 1-47
1. What are chelates? ; 2. Existence of a chelate ring ; 3. Evidence for the existence of the chelate rings ; 4. Chelate rings and "organic" rings ; 5. Metal chelates and salts ; 6. Metal chelates and metal complexes ; 7. Metal chelates and inner complex salts ; 8. Polydentate chelates ; 9. Types of chelate rings ; 10. Ring size and chelation ; 11. Stability of the metal chelates ; 12. Stereochemistry of 4-coordinate metal chelates ; 13. Chelation and magnetism ; 14. Applications of chelation ; 15. Chemistry of oximes ; 16. Preparation of oximes ; 17. Properties of oximes ; 18. Structure of oximes ; 19. Metal chelates of dioximes ; 20. Oximes as analytical reagents ; 21. Aim of present investigations.
- II. EXPERIMENTAL ... .. 48-70
1. Preparation of  $\alpha$ -oximino acetoacetamides ; 2. Preparation of  $\alpha$ - $\beta$ -dioximino acetoacetamides ; 3. Preparation of the nickel chelates of the dioximes ; 4. Preparation of the copper chelates of the dioximes ; 5. Preparation of the cobalt chelates of the dioximes ; 6. Preparation of the palladium chelates of the dioximes ; 7. Absorption spectra ; 8. Magnetic measurements ; 9. Solubility of the oximes ; 10. pH of incipient and complete precipitation ; 11. Qualitative analysis ; 12. Gravimetric estimation of palladium by the dioximes ; 13. Gravimetric estimation of copper by the dioximes ; 14. Gravimetric estimation of nickel by the dioximes.

III. RESULTS ... .. 71-126

Tables: 1. Monoximes ; 2. Dioximes ; 3. Nickel chelates ;  
4. Copper chelates ; 5. Cobalt chelates ; 6. Palladium  
chelates ; 7-10. Absorption spectra of the monoximes ;  
11-13. Absorption spectra of the dioximes ; 14. Magnetic  
measurements of the metal chelates ; 15. Solubility of  
the oximes in water ; 16. pH of incipient precipitation ;  
17. pH of complete precipitation ; 18. Detection of metallic  
ions ; 19-23. Gravimetric estimation of palladium by the  
dioximes ; 24-28. Gravimetric estimation of copper by the  
dioximes ; 29-33. Gravimetric estimation of nickel by the  
dioximes.

IV. DISCUSSION ... .. 127-183

1. Structure and stereoisomerism of the monoximes ; 2.  
Structure and isomerism of the dioximes ; 3. Absorption  
spectra of the oximes ; 4. Chelation ; 5. Structure of the  
metal chelates ; 6. Stereochemistry of the metal chelates  
and magnetism ; 7. Oximes and inorganic analysis.

V. BIBLIOGRAPHY ... .. 184-197

VI. SUMMARY ... .. 198-202

FIGURES ... 57a, 147a, 148a, 150a, 151a, 152a, 153a and 155a.

Figures : 1. Gouy's magnetic balance ; 2-5. Absorption  
spectra of the monoximes ; 6-8. Absorption  
spectra of the dioximes.
