

*Dedicated to my
loving family...*

ACKNOWLEDGEMENTS

I am profoundly grateful as I embark on this significant task of acknowledging the invaluable support and inspiration that have shaped the trajectory of my doctoral journey. Completing this Ph.D. thesis has been a challenging yet rewarding endeavour, and I owe a debt of gratitude to the many individuals who have been involved in making this academic pursuit possible. In expressing my heartfelt thanks, I recognize that this achievement is the result of collective efforts, and I am privileged to stand on the shoulders of those who have supported me along the way. I begin with heartfelt gratitude, praising and thanking God for His abundant blessings that has led my research to its successful fruition. Special acknowledgment is reserved for my religious and spiritual guide, Syedna Mufaddal Saifuddin, whose blessings and prayers have been a constant source of strength for me.

A profound debt of gratitude is owed to my research supervisor, Prof. Rajesh Singh, whose unwavering support, and exceptional guidance have been instrumental throughout this research endeavour. Prof. Singh's enthusiasm, dynamic vision, sincerity, and motivational spirit have not only kept me focused but also deeply inspired me. Working under his guidance has been a great privilege and honour, and I am extremely grateful for the invaluable lessons he imparted on research methodology and effective presentation.

I extend sincere thanks to my parents, whose love, prayers, and sacrifices have been the bedrock of my education and preparation for the future. Their unwavering support has been my constant, and I cannot express enough gratitude for their enduring love. A special mention goes to my baby sister, Ajab, for her uplifting presence and the joyous moments we've shared. I'm also grateful to my extended family and cousins for their continuous support, delightful family gatherings, and shared moments of joy.

Special appreciation goes to Prof. Jason Cannon for his warm hospitality and enthusiastic inspiration during my visiting scholarship at Purdue University, USA. I express my heartfelt thanks to the Dean, Faculty of Science, Head of the Department, Prof. C. Ratna Prabha, other faculty members, Prof. Sashikant Acharya, Dr. Jayshree Pohnerkar, Prof. Pushpa Robin, Dr. Laxmi Nampoothiri, Dr. Devesh Suthar, Dr. Sanjeev Upadhyay and Departmental Research Committee (DRC) - Dr. Ravi Vijayvargia, and Dr. Ratika Srivastava for their guidance and support. Acknowledgment is also due to senior faculty members, Prof. Sarita Gupta, Prof. G Naresh Kumar, and Prof. Rasheedunnisa Begum for sharing their scientific experiences and providing valuable insights.

The Ph.D. journey has been made infinitely more colourful and joyous by the presence of my dearest friends. I extend heartfelt appreciation to my best friends and lab mates, Anjali, and Jyoti, for always lifting my mood and being a constant source of encouragement. Our daily coffee outings have been a cherished ritual, creating the perfect backdrop for shared laughter. A special note of gratitude goes to the other dedicated members of our lab—Dr. Kritarth, Dr. Milton, Dr. Dhruv, Shatakshi, Shani, Nisha, Minal, Saranga, Dr. Hitesh and Dr. Bhoomika. Their support throughout my research journey has been invaluable, with their readiness to assist whenever I needed it. The lab life, punctuated by frequent lab parties, lengthy and enthusiastic discussions, and stress-relieving trips, has been an incredible journey shared with these wonderful individuals.

I would like to express my sincere thanks to my dissertation students, Piyush, Riddhi, and Shivani, who have played a crucial role in assisting me with the various aspects of my Ph.D. work.

Pragya, my steadfast companion of over a decade, has been an invaluable pillar of support. My closest friends from my master's days— Dishant, Ravi, Mirag, Akanksha, and my hostel mates, Jayalakshmi and Parul, have been constants throughout this journey. Our shared moments of fun and adventure trips are treasures that I will always cherish. In the face of challenges, it was their companionship that saw me through, and the memories we've created have been a source of strength and resilience.

The friendships I forged during my OVDF tenure not only eased my transition into a new country but also resulted in lifelong connections. Tuhin, my best friend, emerged as my unwavering support system, acting as my backbone during times of stress. His ability to bring laughter to my lowest moments, engage in deep and meaningful conversations, and offer constant motivation has been invaluable. Abhay, Murthy, and Arya, have consistently had my back, creating memories of shared experiences—from late-night parties and dinners to exploring different corners of the United States. In the Cannon lab, my lab mates Josephine and Dr. Tauqeer Syeda stand out as kind and beautiful souls. Their assistance in helping me acclimate to the new lab, generously sharing their knowledge, and demonstrating patience have made my research journey smoother. I appreciate the support from other lab members, Dr. Shreesh Sammi, Reeya, and undergraduate students, Matthew, and Sofia. Working with them has not only been productive but also fun.

I express my sincere gratitude to the non-teaching staff of the Biochemistry Department— Akshita Mam, Rameshbhai Nare, Shailesh Bhai, Manish Bhai, Sandip Bhai, Anilbhai, Kiranbhai, and Balwantbhai—for their invaluable assistance and the provision of facilities whenever I needed them. A special thanks goes to Milind dada, Chirag bhai, Mukesh bhai, Mayur Bhai, and Neeta Madam for their friendly support and assistance in navigating university protocols. Their contributions have made the administrative aspects of my academic journey much more manageable.

I extend my appreciation to the DBT-ILSPARE instrument facility at the Dr. Vikram Sarabhai Institute of Cell and Molecular Biology. I am indebted to the funding agencies DST, Govt. of India, for their support through the INSPIRE Junior Research and Senior Research Fellowships. Without this financial backing, my research work would not have been possible, and I extend my heartfelt thanks for their investment in my academic pursuits. A profound thank you is also extended to SERB, Govt. of India, for granting me the Overseas Visiting Doctoral Fellowship (OVDF) that facilitated my research work at Purdue University, USA. Their support has opened doors to invaluable opportunities and enriched my academic journey in immeasurable ways.

In conclusion, my heartfelt thanks go to all those who have played a role in making my Ph.D. study a fulfilling and enriching experience.
