<u>Chapter 1</u>	
Introduction to coordination chemistry of Inner transition metal complexes with acylpyrazolone ligands and brief literature review.	1-25
1.1 Introduction	2-3
1.1.1 Progress of coordination chemistry	2
1.1.2 Progress in Inner Transition Metal Coordination Chemistry	3
1.2 Characteristics of Inner Transition Metals	3-7
1.2.1 Complex forming ability of Inner transition metals	4
1.2.2 Absorption and Emission Characteristics	5
1.2.3 Covalency in inner transition metal complexes	7
1.3 Acylpyrazolone: Special class of β-diketone ligands	8-9
1.3.1 β -diketone ligands	8
1.3.2 4-acyl 5-pyrazolones	8
1.3.3 Expansibility of 4-acyl-5-pyrazolones	9
1.4 Brief literature review on inner transition metal complexes	10-15
1.4.1 Recent research work on inner transition metal complexes	10
1.4.2 Complexes of inner transition metals with acylpyrazolones	14
References	16-25
<u>Chapter 2:</u>	
Acylpyrazolone ligands and their Uranyl metal complexes: Synthesis, Characterization and Structural Features.	26-125
Chapter 2 (Part-a):	
Synthesis, Characterization and Crystal Features of Bidentate and Tridentate acylpyrazolone ligands.	26-62
2a.1 Introduction	27
2a.2 Experimental section	28-33
2a.2.1 Materials and Methods	28
2a.2.2 Synthesis of ligands	28
2a.2.3 X-ray crystallographic examination	32
2a.2.4 Physical measurements and characterization techniques	33

Contents

2a.2.5	Computational study	33
2a.3	Results and Discussion	33-57
2a.3.1	FTIR spectral analysis of ligands	33
2a.3.2	¹ H-NMR and ¹³ C-NMR spectroscopic study	36
2a.3.3	Single crystal X-ray diffraction analysis	41
2a.3.4	DFT computational analysis	46
2a.3.5	Hirshfeld surface area analysis	50
2a.4	Conclusions	58
	References	59-62
Chapter 2 (Part-b):		
	Synthesis, Covalency Sequence, and Crystal Features of Pentagonal Uranyl Acylpyrazolone Complexes along with DFT Calculation and Hirshfeld Analysis.	63-98
2b.1	Introduction	64-65
2b.2	Experimental section	65-68
2b.2.1	Materials and Methods	65
2b.2.2	Synthesis of uranium complexes	65
2b.2.3	X-ray crystallographic examination	67
2b.2.4	Physical measurements and characterization techniques	67
2b.2.5	Computational study	68
2b.3	Results and Discussion	68-92
2b.3.1	FTIR spectral analysis	68
2b.3.2	¹ H-NMR spectroscopic study	71
2b.3.3	Thermogravimetric analysis	74
2b.3.4	Molar conductivity measurements	76
2b.3.5	Single crystal X-ray diffraction analysis	76
2b.3.6	DFT computational analysis	82
2b.3.7	Hirshfeld surface area analysis	87
2b.3.8	Electronic spectral analysis	90
2b.3.9	Electrochemical analysis	91
2b.4	Conclusions	93
	References	94-98

Contents

Chapter 2 (Part-c):		
Uranyl(VI) Mixed-ligand complex synthesis and characterization using 4-acylhydrazone-5-pyrazolone and 4-acylpyrazolone: Covalency, crystal assay, DFT study and Hirshfeld analysis.		99-125
2c.1	Introduction	100-101
2c.2	Experimental section	101-102
	2c.2.1 Materials and Methods	101
	2c.2.2 Synthesis of mixed ligand uranyl complex	101
	2c.2.3 X-ray crystallographic examination	102
	2c.2.4 Physical measurements and characterization techniques	102
	2c.2.5 Computational study	102
2c.3	Results and Discussion	103-115
	2c.3.1 FTIR spectral analysis	103
	2c.3.2 ¹ H-NMR spectroscopic study	104
	2c.3.3 Thermogravimetric analysis	105
	2c.3.4 Molar conductivity measurements	106
	2c.3.5 Single crystal X-ray diffraction analysis	106
	2c.3.6 DFT computational analysis	109
	2c.3.7 Hirshfeld surface area analysis	112
	2c.3.8 Electronic spectral analysis	114
	2c.3.9 Electro-chemical studies	115
2c.4	Conclusions	115-116
	References	117-122
	Published papers (Front page) from Chapter 2	123-125
Chapter 3:		
Acylpyrazolone ligands and their Neodymium metal complexes: Synthesis, Characterization and Structural Features.		126-200
Chapter 3 (Part-a):		
Structural Features, Emission Analysis, and Covalency Comparison of Neodymium Acylpyrazolone Complexes using Oscillator Strengths, Covalency and Judd-Ofelt Parameters.		126-164

Contents

3a.1	Introduction	127-128
3a.2	Experimental section	128-131
	3a.2.1 Materials and Methods	128
	3a.2.2 Neodymium-acylpyrazolone Complex Synthesis	128
	3a.2.3 X-ray crystallographic examination	131
	3a.2.4 Physical measurements and characterization techniques	131
3a.3	Results and Discussion	132-155
	3a.3.1 FTIR spectral analysis	132
	3a.3.2 Thermogravimetric analysis	134
	3a.3.3 Single crystal X-ray diffraction analysis	136
	3a.3.4 Hirshfeld surface area analysis	142
	3a.3.5 Absorption and Emission Spectral Analysis	144
3a.4	Conclusions	155-156
	References	157-164
Chapter 3 (Part-b):		
	Neodymium based acylpyrazolone complexes: Synthesis and physicochemical characterizations.	165-200
3b.1	Introduction	166
3b.2	Experimental section	166-169
	3b.2.1 Materials and Methods	166
	3b.2.2 Neodymium-acylpyrazolone Complex Synthesis	166
	3b.2.3 X-ray crystallographic examination	169
	3b.2.4 Physical measurements and characterization techniques	169
3b.3	Results and Discussion	169-190
	3b.3.1 FTIR spectral analysis	169
	3b.3.2 Thermogravimetric analysis	172
	3b.3.3 Single crystal X-ray diffraction analysis	174
	3b.3.4 Hirshfeld surface area analysis	178
	3b.3.5 Optical transition property	181
3b.4	Conclusions	191-192
	References	193-198
	Published papers (Front page) from Chapter 3	199-200

Contents

Chapter 4:

Dysprosium Acylpyrazolone complexes: Synthesis, Structural Features, Fluorescence and Electronic properties. 201-232

4.1	Introduction	202-203
4.2	Experimental section	203-205
	4.2.1 Materials and Methods	203
	4.2.2 Synthesis of Dysprosium-acylpyrazolone complexes	203
	4.2.3 Physical measurements and characterization techniques	205
4.3	Results and Discussion	206-225
	4.3.1 Mass spectrometric analysis	206
	4.3.2 FTIR spectral analysis	209
	4.3.3 Thermogravimetric analysis	213
	4.3.4 Single crystal X-ray diffraction analysis	216
	4.3.5 Hirshfeld surface area analysis	220
	4.3.6 Electronic spectral analysis	222
	4.3.7 Fluorescence emission analysis	223
4.4	Conclusions	225-226
	References	227-231
	Published papers (Front page) from Chapter 4	232

Chapter 5:

Terbium Acylpyrazolone complexes: Synthesis, Structural Features, Fluorescence and Electronic properties. 233-257

5.1	Introduction	234-235
5.2	Experimental section	235-237
	5.2.1 Chemical provisions	235
	5.2.2 Complex synthesis	235
	5.2.3 Physical measurements and characterization techniques	236
5.3	Results and discussion	237-252
	5.3.1 Mass spectral analysis	237
	5.3.2 FTIR spectral analysis	239
	5.3.3 Thermogravimetric analysis	241

Contents

5.3.4	Single crystal X-ray analysis	243
5.3.5	Hirshfeld Surface (HS) analysis	247
5.3.6	Photophysical analysis	249
5.4	Conclusions	253
	References	254-257
Chapter 6:		
Thorium Acylpyrazolone Complexes: Synthesis, Covalent Character, and Crystal Features.		258-281
6.1	Introduction	259-260
6.2	Experimental section	260-262
6.2.1	Materials and Methods	260
6.2.2	Synthesis of thorium complexes	260
6.2.3	Physical measurements and characterization techniques	262
6.3	Results and Discussion	262-277
6.3.1	FTIR spectral analysis	262
6.3.2	¹ H-NMR spectroscopic study	265
6.3.3	Thermogravimetric analysis	267
6.3.4	Molar conductivity measurements	269
6.3.5	Single crystal X-ray diffraction analysis	269
6.3.6	Hirshfeld surface analysis	272
6.3.7	Electronic spectral analysis	275
6.4	Conclusions	277
	References	278-281
	Published papers (Front page) from Chapter 6	282
Published papers, conferences, seminars, and workshops		283-285
