List of Figures	vi
List of Tables	x
List of Abbreviations	xi
Abstract	xii
1 Introduction	1
2 Eigenvalue Estimates for Fractional Sturm-Liouville Boundary Value Problem	6
2.1 Introduction	7
2.2 Preliminaries	8
2.3 Main result	9
2.4 Applications	15
2.5 Conclusion	16
3 Fractional modelling of Breast Cancer Dynamics	17
3.1 Introduction	18
3.2 Fractional order mathematical modelling and analysis of Breast cancer epidemiology under control parameters	21
3.2.1 Introduction	21
3.2.2 Preliminaries	21
3.2.3 Model formulation in Caputo sense	22
3.2.4 Equilibria	24

3.2.5	Qualitative analysis	26
3.2.6	Numerical algorithm	33
3.2.7	Numerical simulation and Discussion	35
3.2.8	Conclusion	38
3.3	Transmission dynamics of Breast cancer through Caputo Fabrizio fractional derivative operator with real data	39
3.3.1	Introduction	39
3.3.2	Preliminaries	40
3.3.3	Model formulation	40
3.3.4	Qualitative analysis	42
3.3.5	Stability analysis	45
3.3.6	Numerical algorithm	48
3.3.7	Numerical simulation and Discussion	49
3.3.8	Conclusion	60
3.4	Fractional mathematical modelling of Breast cancer stages with true data from Saudi Arabia	61
3.4.1	Introduction	61
3.4.2	Preliminaries	61
3.4.3	Model formulation in fractional frameworks	62
3.4.4	Equilibria	65
3.4.5	Qualitative analysis	68
3.4.6	Global stability analysis	72
3.4.7	Numerical method	74
3.4.8	Numerical simulation and Disucssion	76
3.4.9	Conclusion	83
4	Novel Fractional Mathematical Models for Chikungunya Virus Dynamics	84
4.1	Introduction	85
4.2	Model formation	86
4.2.1	Chikungunya virus model with adoptive immune response	86

4.2.2	Chikungunya virus model with latently infected cells	87
4.3	Preliminaries	88
4.4	Fractional Chikungunya virus model with qualitative and stability analysis	89
4.4.1	Fractional Chikungunya virus model with adoptive immune response	89
4.4.2	Existence and uniqueness of fractional Chikungunya virus model with adoptive immune response	90
4.4.3	Stability analysis of fractional Chikungunya virus model with adop- tive immune response	91
4.4.4	Fractional Chikungunya virus model with latently infected cells .	96
4.4.5	Existence and uniqueness of fractional Chikungunya virus model with latently infected cells	97
4.4.6	Stability analysis of fractional Chikungunya virus model with la- tently infected cells	104
4.5	Methodology	107
4.5.1	Methodology for fractional Chikungunya virus model with adoptive immune response	109
4.5.2	Methodology for fractional Chikungunya virus model with latently infected cells	109
4.6	Result and Discussion	110
4.7	Conclusion	117
5	Quantifying Cancer Risk from Smoking: A Fractional Mathematical Approach	118
5.1	Introduction	119
5.2	Model formation	121
5.3	Preliminaries	123
5.4	Existence and Uniqueness	124
5.5	Stability analysis	128
5.5.1	Local stability	128
5.5.2	Global stability	132
5.6	Numerical results and Discussion	134

5.7	Conclusion	140
6	Hard Water-Induced Renal Disease: A Fractional-Order Model	142
6.1	Introduction	143
6.2	Preliminaries	145
6.3	Fractional hard water model	145
6.4	Qualitative analysis	146
6.5	Stability analysis	151
6.5.1	Local stability	151
6.5.2	Global stability	154
6.6	Adomian Decomposition General Transform Method	156
6.7	Results and Discussion	158
6.8	Conclusion	163
7	Qualitative Analysis of Fractional modelling of Pancreatic Cancer Dynamics	165
7.1	Introduction	166
7.2	Mathematical analysis of a Pancreatic cancer with Caputo derivative	169
7.2.1	Preliminaries	169
7.2.2	Model formulation in Caputo sense	170
7.2.3	Qualitative analysis	171
7.2.4	Stability analysis	176
7.3	Mathematical analysis of a Pancreatic cancer with Atangana-Baleanu derivative	179
7.3.1	Preliminaries	179
7.3.2	Model formulation in Atangana-Baleanu-Caputo sense	180
7.3.3	Qualitative analysis	180
7.3.4	Stability analysis	187
7.4	Conclusion	190
8	Advanced Fractional Mathematical Model for Tumor Growth Dynamics	191

8.1	Introduction	192
8.2	Preliminaries	193
8.3	Mathematics in cancer biology	193
8.4	Existence and Uniqueness	198
8.5	Stability analysis	199
8.6	Numerical algorithm	200
8.7	Simulations and Experimental results	201
8.8	Conclusion	206
	Overall Conclusion	208
	Future scope	210
	References	211
