REVIEW OF LITERATURE		
2.1	Stock of food grain: 1951 to 1974	12
2.2	Level of buffer stock vs norms for rice and wheat	12
2.3	Trend of indian population and production indices 1980-81=100	13
2.4	Poverty reduction 1990-2011	16
2.5	Expenditure on food as a percentage of consumer expenditure	16
2.6	Average per capita intake of cereal by expenditure classes	17
2.7	Time trends in food intake as percentage of RDI	18
2.8	Time trends in nutrient intake as percentage of RDA	18
2.9	Intra-family differences in energy intake.	19
2.10	Intra-family differences in the nutritional status	20
2.11	Current nutritional status AHS CAB survey (2015)	23
2.12	Current nutritional status DLHS 4 (2014)	24
2.13	Time trends in the prevalence of under-nutrition in preschool children	25
2.14	Time trends in the prevalence of under-nutrition in under-three-year children	25
2.15	Frequency distribution in height-for-age and BMI-for-age in under-three children NFHS surveys	27
METHODOLOGY		
3.1	Map of Delhi showing locale of study	37
3.2	Study Design Flow Chart	42
3.3	Assessing Intra family difference in joint family	44
3.4	Assessing Intra family difference in nuclear family	44
3.5	Round variation in height measurements	56
3.6	Individual's variation	56
RESULT AND DISCUSSION		
4.1	Educational status of parent of under-five child	73
4.2	Working status of parent of under-five child	73
4.3	Sleeping (in minutes) in different aged groups	77
4.4	Sedentary activity (in minutes) in different aged groups	78
4.5	Moderate activity (in minutes) in different aged groups	78
4.6	Nutritional status of preschool and school-age children (cross-sectional)	81
4.7	Variation in over-nutrition rates in different age group due to differences in BAZ cut-off	82
4.8	Nutritional status of parent	84
4.9	Nutritional status of other women & men	85
4.10	Effect in maternal nutrition status on child under-nutrition (6539 pairs)	86
4.11	Under- nutrition rates in pre-school children in relation to maternal	87

	Height tertiles (6539 pairs)	
4.12	Effect in paternal nutritional status (BMI tertiles) on Child under-nutrition (636 pairs)	88
4.13	Under- nutrition rates in pre-school children in relation to paternal height tertiles (636 pairs)	89
4.14	Comparison of nutritional status between under-five and other women (2054 pairs)	90
4.15	Comparison of nutritional status between under-five and other men (670 pairs)	91
4.16	Nutritional status differences between elder and younger under five siblings (1590 pairs)	91
4.17	Nutritional status differences 0-4 years and 5-9 years siblings (931 pairs)	92
4.18	Nutritional status differences between 0-4 years and 10-18 years siblings (472 pairs)	92
4.19	Comparison of nutritional status of parents of under five (636 pairs)	93
4.20	Comparison of nutritional status of mother and other women (1689 pairs)	94
4.21	Comparison of nutritional status of mother and other men (670 pairs)	95
4.22	Nutritional status of all family members	95
