

❖ **List of Contents:**

<b>Sr. No,</b>	<b>Content</b>	<b>Page No.</b>
1	Introduction	01-27
2	Chapter 1: Diversity and Distribution of Mullet	28-59
3	Chapter 2: Environmental and Biological Aspects of <i>Mugil cephalus</i> (Linnaeus 1758)	60-156
4	Chapter 3: Status and Potential assessment of Mullet culture	157- 197
5	Conclusion and Future Recommendations	197- 203
6	Bibliography	204- 243
7	Publication and Presentations	

❖ **List of Figures:**

Figure No.	Title	Page No.
1	A cross section of the ocean from the shoreline to the deep sea, showing the location of major marine habitats. (Source: Levinton 2017)	05
2	Physicochemical parameters influencing the occurrence, distribution and movements of fish – <i>Mugil cephalus</i> in tropical and subtropical estuaries	20
1.1	Map of collection sites of mullets from the major fish landing centres of Gujarat Coast, India	33
1.2	Representation of typical mullet's morphological features used for identification	34
1.3	Illustration of molecular steps involved in identification of the mullets collected from Gujarat coast	35
1.4	PCR conditions for Fish BCL and Fish BCH	37
1.5	Condition for PCR clean-up (ExoSAP-IT®)	38
1.6	Cycle sequencing conditions	39
1.7	Specimen of <i>Crenimugil seheli</i> (Fabricius, 1775) collected from Diu	43
1.8	<i>Mugil cephalus</i> Linnaeus, 1758 collected from Jakhau, Gujarat (a) Specimen examined in the laboratory, (b) Lateral head view, (c) Dorsal head view	44
1.9	<i>Planiliza parsia</i> (Hamilton, 1822) collected from Diu, Gujarat	45
1.10	<i>Planiliza planiceps</i> (Valenciennes, 1836) collected from Khambhat, Gujarat (a) Specimen examined in the laboratory, (b) Lateral head view, (c) Dorsal head view	47
1.11	<i>Planiliza tade</i> (Forsskål, 1775) collected from Sikka, Gujarat	48
1.12	Specimen of <i>Planiliza subviridis</i> (Valenciennes, 1836) collected from Sikka, Gujarat	50
1.13	<i>Rhinomugil corsula</i> (Hamilton, 1822) collected from Narmada, Gujarat (a) Specimen examined in the laboratory, (b) Lateral head view, (c) Dorsal head view	51
1.14	Electrophoresis Gel Image of PCR product of COI of Mulletts	52
1.15	Phylogenetic tree of Mulletts with its species	55
1.16	Overall Phylogeny Tree of Mulletts	56
1.17	Distribution of Mulletts in India (Bhatt & Mankodi 2023)	58

2.1	Study Site Location on GIS Map – Map showcasing the geographical locations of the collection points (upstream, midstream and downstream) of the selected study sites from Diu Lagoon and Narmada Estuary of Gujarat, India	71
2.2	Illustration of the sample collection and methodology of sample collection for physico-chemical parameters of water and length-weight relationship, condition factor, gonadosomatic index and hepatosomatic index of <i>M. cephalus</i> from Diu lagoon and Narmada estuary	72
2.3	Representative image of <i>M. cephalus</i> (Linnaeus, 1758) showing morphometric measurements taken for biological aspects study	78
2.4	Gonads of <i>M. cephalus</i> (a) Male (b) Female	79
2.5 (a, b)	A graphical representation illustrating the dynamic changes in pH over the course of each month at Diu Lagoon: (a) from December-2020 to November-2021, (b) from December-2021 to November-2022	81
2.5 (c, d)	A graphical representation illustrating the dynamic changes in pH over the course of each month at Narmada Estuary – Bharuch Site: (c) from December-2020 to November-2021, (d) from December-2021 to November-2022	82
2.5 (e, f)	A graphical representation illustrating the dynamic changes in pH over the course of each month at Narmada Estuary – Bhadbhut Site: (e) from December-2020 to November-2021, (f) from December-2021 to November-2022	83
2.5 (g, h)	A graphical representation illustrating the dynamic changes in pH over the course of each month at Narmada Estuary – Ambetha Site: (g) from December-2020 to November-2021, (h) from December-2021 to November-2022	84
2.6 (a, b)	A graphical representation illustrating the dynamic changes in Temperature (°C) over the course of each month at Diu Lagoon: (a) from December-2020 to November-2021, (b) from December-2021 to November-2022	86
2.6 (c, d)	A graphical representation illustrating the dynamic changes in Temperature (°C) over the course of each month at Narmada Estuary – Bharuch Site: (c) from December-2020 to November-2021, (d) from December-2021 to November-2022	87

---

2.6 (e, f)	A graphical representation illustrating the dynamic changes in Temperature (°C) over the course of each month at Narmada Estuary – Bhadbhut Site: (e) from December-2020 to November-2021, (f) from December-2021 to November-2022	88
2.6 (g, h)	A graphical representation illustrating the dynamic changes in Temperature (°C) over the course of each month at Narmada Estuary – Ambetha Site: (g) from December-2020 to November-2021, (h) from December-2021 to November-2022	89
2.7 (a, b)	A graphical representation illustrating the dynamic changes in Salinity (PPT) over the course of each month at Diu Lagoon: (a) from December-2020 to November-2021, (b) from December-2021 to November-2022	91
2.7 (c, d)	A graphical representation illustrating the dynamic changes in Salinity (PPT) over the course of each month at Narmada Estuary – Bharuch Site: (c) from December-2020 to November-2021, (d) from December-2021 to November-2022	92
2.7 (e, f)	A graphical representation illustrating the dynamic changes in Salinity (PPT) over the course of each month at Narmada Estuary – Bhadbhut Site: (e) from December-2020 to November-2021, (f) from December-2021 to November-2022	93
2.7 (g, h)	A graphical representation illustrating the dynamic changes in Salinity (PPT) over the course of each month at Narmada Estuary – Ambetha Site: (g) from December-2020 to November-2021, (h) from December-2021 to November-2022	94
2.8 (a, b)	A graphical representation illustrating the dynamic changes in Dissolved Oxygen (mg/l) concentrations over the course of each month at Diu Lagoon: (a) from December-2020 to November-2021, (b) from December-2021 to November-2022	96

---

2.8 (c, d)	A graphical representation illustrating the dynamic changes in Dissolved Oxygen (mg/l) concentrations over the course of each month at Narmada Estuary – Bharuch Site: (c) from December-2020 to November-2021, (d) from December-2021 to November-2022	97
2.8 (e, f)	A graphical representation illustrating the dynamic changes in Dissolved Oxygen (mg/l) concentrations over the course of each month at Narmada Estuary – Bhadbhut Site: (e) from December-2020 to November-2021, (f) from December-2021 to November-2022	98
2.8 (g, h)	A graphical representation illustrating the dynamic changes in Dissolved Oxygen (mg/l) concentrations over the course of each month at Narmada Estuary – Ambetha Site: (g) from December-2020 to November-2021, (h) from December-2021 to November-2022	99
2.9 (a, b)	A graphical representation illustrating the dynamic changes in Total Dissolved Solids (mg/l) over the course of each month at Diu Lagoon: (a) from December-2020 to November-2021, (b) from December-2021 to November-2022	101
2.9 (c, d)	A graphical representation illustrating the dynamic changes in Total Dissolved Solids (mg/l) over the course of each month at Narmada Estuary – Bharuch Site: (c) from December-2020 to November-2021, (d) from December-2021 to November-2022	102
2.9 (e, f)	A graphical representation illustrating the dynamic changes in Total Dissolved Solids (mg/l) over the course of each month at Narmada Estuary – Bhadbhut Site: (e) from December-2020 to November-2021, (f) from December-2021 to November-2022	103
2.9 (g, h)	A graphical representation illustrating the dynamic changes in Total Dissolved Solids (mg/l) over the course of each month at Narmada Estuary – Ambetha Site: (g) from December-2020 to November-2021, (h) from December-2021 to November-2022	104
2.10 (a, b)	Logarithmic Representation of Length-Weight Relationship in Male <i>M. cephalus</i> from Diu Lagoon: (a) Dec 2020 - Nov 2021, and (b) Dec 2021 - Nov 2022	110
2.10 (c, d)	Logarithmic Representation of Length-Weight Relationship in Female <i>M. cephalus</i> from Diu Lagoon: (c) Dec 2020 - Nov 2021, and (d) Dec 2021 - Nov 2022	111

2.10 (e, f)	Logarithmic Representation of Length-Weight Relationship in <i>M. cephalus</i> Population from Diu Lagoon: (e) Dec 2020 - Nov 2021, and (f) Dec 2021 - Nov 2022	112
2.11 (a, b)	"Logarithmic Representation of Length-Weight Relationship in Male <i>M. cephalus</i> from Bharuch, Narmada Estuary: (a) Dec 2020 - Nov 2021, and (b) Dec 2021 - Nov 2022	114
2.11 (c, d)	Logarithmic Representation of Length-Weight Relationship in Female <i>M. cephalus</i> from Bharuch, Narmada Estuary: (c) Dec 2020 - Nov 2021, and (d) Dec 2021 - Nov 2022	115
2.11 (e, f)	Logarithmic Representation of Length-Weight Relationship in <i>M. cephalus</i> Population from Bharuch, Narmada Estuary: (e) Dec 2020 - Nov 2021, and (f) Dec 2021 - Nov 2022	116
2.12 (a, b)	Logarithmic Representation of Length-Weight Relationship in Male <i>M. cephalus</i> from Bhadbhut, Narmada Estuary: (a) Dec 2020 - Nov 2021, and (b) Dec 2021 - Nov 2022	118
2.12 (c, d)	Logarithmic Representation of Length-Weight Relationship in Female <i>M. cephalus</i> from Bhadbhut, Narmada Estuary: (c) Dec 2020 - Nov 2021, and (d) Dec 2021 - Nov 2022	119
2.12 (e, f)	Logarithmic Representation of Length-Weight Relationship in <i>M. cephalus</i> Population from Bhadbhut, Narmada Estuary: (e) Dec 2020 - Nov 2021, and (f) Dec 2021 - Nov 2022	120
2.13 (a, b)	Logarithmic Representation of Length-Weight Relationship in Male <i>M. cephalus</i> from Ambetha, Narmada Estuary: (a) Dec 2020 - Nov 2021, and (b) Dec 2021 - Nov 2022	122
2.13 (c, d)	Logarithmic Representation of Length-Weight Relationship in Female <i>M. cephalus</i> from Ambetha, Narmada Estuary: (c) Dec 2020 - Nov 2021, and (d) Dec 2021 - Nov 2022	123
2.13 (e, f)	Logarithmic Representation of Length-Weight Relationship in <i>M. cephalus</i> Populations from Ambetha, Narmada Estuary: (e) Dec 2020 - Nov 2021, and (f) Dec 2021 - Nov 2022	124
2.14 (a, b, c)	Fulton's Condition Factor ( <i>K</i> ) Analysis of <i>M. cephalus</i> in Diu Lagoon: (a) Male, (b) Female, and (c) Population from December 2020 to November 2021	128

2.15 (a, b, c)	Fulton's Condition Factor ( $K$ ) Analysis of <i>M. cephalus</i> in Bharuch, Narmada Estuary: (a) Male, (b) Female, and (c) Population from December 2020 to November 2021	129
2.16 (a, b, c)	Fulton's Condition Factor ( $K$ ) Analysis of <i>M. cephalus</i> in Bhadbhut, Narmada Estuary: (a) Male, (b) Female, and (c) Population from December 2020 to November 2021.	130
2.17 (a, b, c)	Fulton's Condition Factor ( $K$ ) Analysis of <i>M. cephalus</i> in Ambetha, Narmada Estuary: (a) Male, (b) Female, and (c) Population from December 2020 to November 2021.	131
2.18 (a, b)	(a) Gonadosomatic Index ( $I_g$ ) and (b) Hepatosomatic Index ( $I_h$ ) of Male <i>M. cephalus</i> in Diu lagoon from December 2020 to November 2022	136
2.19 (a, b)	(a) Gonadosomatic Index ( $I_g$ ) and (b) Hepatosomatic Index ( $I_h$ ) of Female <i>M. cephalus</i> in Diu lagoon from December 2020 to November 2022	137
2.20 (a, b)	(a) Gonadosomatic Index ( $I_g$ ) and (b) Hepatosomatic Index ( $I_h$ ) of Male <i>M. cephalus</i> in Bharuch, Narmada Estuary from December 2020 to November 2022	138
2.21 (a, b)	(a) Gonadosomatic Index ( $I_g$ ) and (b) Hepatosomatic Index ( $I_h$ ) of Female <i>M. cephalus</i> in Bharuch, Narmada Estuary from December 2020 to November 2022	139
2.22 (a, b)	(a) Gonadosomatic Index ( $I_g$ ) and (b) Hepatosomatic Index ( $I_h$ ) of Male <i>M. cephalus</i> in Bhadbhut, Narmada Estuary from December 2020 to November 2022	140
2.23 (a, b)	(a) Gonadosomatic Index ( $I_g$ ) and (b) Hepatosomatic Index ( $I_h$ ) of Female <i>M. cephalus</i> in Bhadbhut, Narmada Estuary from December 2020 to November 2022	141
2.24 (a, b)	(a) Gonadosomatic Index ( $I_g$ ) and (b) Hepatosomatic Index ( $I_h$ ) of Male <i>M. cephalus</i> in Ambetha, Narmada Estuary from December 2020 to November 2022	142
2.25 (a, b)	(a) Gonadosomatic Index ( $I_g$ ) and (b) Hepatosomatic Index ( $I_h$ ) of Female <i>M. cephalus</i> in Ambetha, Narmada Estuary from December 2020 to November 2022	143
3.1	Thematic representation of proximate content analysis methodology	165
3.2	Methodology for aquaculture potential study	170
3.3	Monthly variation in Moisture Content (%) analysis of (a) Male and (b) Female <i>Mugil cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	172
3.4	Monthly variation in Ash Content (%) analysis of (a) Male and (b) Female <i>Mugil cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	174

---

3.5	Monthly variation in Lipid Content (%) analysis of (a) Male – Muscle tissue and (b) Male – Liver tissue of <i>Mugil cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	176
3.6	Monthly variation in Lipid Content (%) analysis of (a) Female – Muscle tissue and (b) Female – Liver tissue of <i>Mugil cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	178
3.7	Monthly variation in Protein Content (%) analysis of (a) Male – Muscle tissue and (b) Male – Liver tissue of <i>Mugil cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	180
3.8	Monthly variation in Protein Content (%) analysis of (a) Female – Muscle tissue and (b) Female – Liver tissue of <i>Mugil cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	182
3.9	Monthly variation in Carbohydrate Content (%) analysis of (a) Male – Muscle tissue and (b) Male – Liver tissue of <i>Mugil cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	184
3.10	Monthly variation in Carbohydrate Content (%) analysis of (a) Female – Muscle tissue and (b) Female – Liver tissue of <i>Mugil cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	186
3.11	Organoleptic Study of <i>Mugil cephalus</i> based on hedonic scale of five points	188
3.12	Observations of freshness index on Day-1	189
3.13	Observations of freshness index on Day-2	190
3.14	Observations of freshness index on Day-3	191

---

❖ **List of Tables:**

<b>Table No.</b>	<b>Title</b>	<b>Page No.</b>
1.1	Final concentration of PCR reagents in reaction mixture (20 µl)	37
1.2	Primer list with sequence	38
1.3	PCR clean-up reaction mixture	38
1.4	Cycle Sequencing reagent and concentration	39
1.5	Capillary electrophoresis parameters	41
1.6	Pair Wise distance analysis COI sequence of Mulllets	53
2.1	Minimum and maximum pH values recorded from up, mid and down streams of Diu lagoon and Narmada estuary: Bharuch, Bhadbhut and Ambetha, Gujarat, India from December-2020 to November-2022	80
2.2	Minimum and maximum Temperature values recorded from up, mid and down streams of Diu lagoon and Narmada estuary: Bharuch, Bhadbhut and Ambetha, Gujarat, India from December-2020 to November-2022	85
2.3	Minimum and maximum Salinity values recorded from up, mid and down streams of Diu lagoon and Narmada estuary: Bharuch, Bhadbhut and Ambetha, Gujarat, India from December-2020 to November-2022	90
2.4	Minimum and maximum Dissolved Oxygen (mg/l) values recorded from up, mid and down streams of Diu lagoon and Narmada estuary: Bharuch, Bhadbhut and Ambetha, Gujarat, India from December-2020 to November-2022	95
2.5	Minimum and maximum Total Dissolved Solids (mg/l) values recorded from up, mid and down streams of Diu lagoon and Narmada estuary: Bharuch, Bhadbhut and Ambetha, Gujarat, India from December-2020 to November-2022	100
2.6	Correlation matrix among physico-chemical parameters of water from Diu Lagoon region, Gujarat, India	106
2.7	Correlation matrix among physico-chemical parameters of water from Bharuch, Narmada Estuary, Gujarat, India	106
2.8	Correlation matrix among physico-chemical parameters of water from Bhadbhut, Narmada Estuary, Gujarat, India	106
2.9	Correlation matrix among physico-chemical parameters of water from Ambetha, Narmada Estuary, Gujarat, India	106
2.10	Statistical analysis of Length-Weight Relationship (LWR) of <i>M. cephalus</i> from Diu Lagoon	109
2.11	Statistical analysis of Length-Weight Relationship (LWR) of <i>M. cephalus</i> from Bharuch, Narmada Estuary, Gujarat, India	113

2.12	Statistical analysis of Length-Weight Relationship (LWR) of <i>M. cephalus</i> from Bhadbhut, Narmada Estuary, Gujarat, India	117
2.13	Statistical analysis of Length-Weight Relationship (LWR) of <i>M. cephalus</i> from Ambetha, Narmada Estuary, Gujarat, India	121
2.14	The minimum and maximum Fulton's Condition Factor ( <i>K</i> ) values recorded of male <i>M. cephalus</i> from Diu lagoon and Narmada estuary, Gujarat, India	126
2.15	The minimum and maximum Fulton's Condition Factor ( <i>K</i> ) values recorded of female <i>M. cephalus</i> from Diu lagoon and Narmada estuary, Gujarat, India	127
2.16	The minimum and maximum Fulton's Condition Factor ( <i>K</i> ) values recorded of <i>M. cephalus</i> population from Diu lagoon and Narmada estuary, Gujarat, India	127
2.17	The minimum and maximum Gonadosomatic Index ( <i>I<sub>g</sub></i> ) values recorded of male <i>M. cephalus</i> population from Diu lagoon and Narmada estuary, Gujarat, India	133
2.18	The minimum and maximum Gonadosomatic Index ( <i>I<sub>g</sub></i> ) values recorded of female <i>M. cephalus</i> population from Diu lagoon and Narmada estuary, Gujarat, India.	133
2.19	The minimum and maximum Hepatosomatic Index ( <i>I<sub>h</sub></i> ) values recorded of male <i>M. cephalus</i> population from Diu lagoon and Narmada estuary, Gujarat, India	135
2.20	The minimum and maximum Hepatosomatic Index ( <i>I<sub>h</sub></i> ) values recorded of female <i>M. cephalus</i> population from Diu lagoon and Narmada estuary, Gujarat, India	135
3.1	Total Moisture content (%) analysis of male and female <i>M. cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	171
3.2	Total Ash content (%) analysis of male and female <i>M. cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	173
3.3	Total Lipid content (%) analysis from muscle and liver tissues of Male <i>M. cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India	175
3.4	Total Lipid content (%) analysis from muscle and liver tissues of Female <i>M. cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India.	177
3.5	Total Protein content (%) analysis from muscle and liver tissues of Male <i>M. cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India.	179
3.6	Total Protein content (%) analysis from muscle and liver tissues of Female <i>M. cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India.	181

---

3.7	Total Carbohydrate content (%) analysis from muscle and liver tissues of Male <i>M. cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India.	183
3.8	Total Carbohydrate content (%) analysis from muscle and liver tissues of Female <i>M. cephalus</i> from Diu lagoon and Narmada estuary of Gujarat, India.	185
3.9	Initial and final changes in growth of <i>M. cephalus</i> reared in various salinity range (10ppt, 20ppt, 30ppt) tanks for the period of six months.	192
3.10	Proximate content analysis of <i>M. cephalus</i> reared in various salinity range (10ppt, 20ppt, 30ppt) tanks for the period of six months	193

---
