- श्रीमद्भगवद्गीता 2.47

[In the Bhagavad Gita, Lord Krishna tells Arjuna – You only have a right to action (karma) and not to the fruits of your karma. Do not become a person who constantly meditates upon (gets attached to) the results of one's karma. Do not get attached to inactivity (no karma). - Srimad Bhagavad Gita 2.47]

“None of us got to where we are alone. Whether the assistance we received was obvious or subtle, acknowledging someone's help is a big part of understanding the importance of saying thank you.”

I am deeply grateful for the love, guidance, and unwavering support of my parents, Mr. Mukeshbhai Bhatt and Mrs. Jagrutiben Bhatt, throughout my entire academic journey. Their presence in my life has been an immense source of strength and inspiration. First and foremost, I want to acknowledge the fundamental role they played in my existence. Without their genetic materials and blessings, I would not have embarked on this incredible journey of life. Their unwavering belief in my potential and their sacrifices have shaped me into the person I am today. I am forever indebted to them for their boundless devotion and sacrifices. They have tirelessly provided me with everything I needed to pursue my education, whether it was financial support, emotional encouragement, or simply a listening ear. Their unwavering faith in me has been a constant source of motivation, pushing me to overcome challenges and strive for excellence.

I would like to express my sincere gratitude and praise to the almighty GOD, who showered his/her grace in the form of knowledge and wisdom and every other way for completing this work.

[My Salutations to that Guru who revealed to me that Truth, which is unfragmented, infinite, timeless divinity, and which pervades the entire universe – movable or unmovable.]

*It gives me enormous contentment to express my gratitude to my research supervisor **Dr. Pradeep C. Mankodi** (Professor and Ex. Head, Department of Zoology, Faculty of Science, The Maharaja Sayajirao University of Baroda, Vadodara) who introduced me to the marvellous world of the ichthyology and accepting me as his Ph.D. research student. It is legitimate incident to pay thanks to him, who gave me utter support, enormous enthusiasm and motivation every time. I am thankful to him for his positive co-operation and involvement in my research work, I remain owing a favour of him for such venerable involvement, imposing support and motivation. Everything you know about this project, from its methods to its history, can be traced back to him. The highs and lows of daily routine were shared by both of us. At the time of weakest phase of work, he performed the role of mitochondria and recharged me with the power of provoking thoughts. In addition, we experienced both the joy of accomplishment and the disappointment of failure together. He was able to teach me the true concept of teamwork, and in my opinion, he is the ideal supervisor for Ph.D. work. Working alongside someone who is so courteous, forthright, and receptive to new ideas is a fantastic experience that I highly recommend.*
