List of Tables

Table 3.1 Structural parameters, E_{HOMO} and E_{LUMO}, HOMO-LUMO gap (E_G) and dipole moment for C_{18} nanocluster……. (33)

Table 3.2 Adsorption energy (E_{ad}), HOMO and LUMO energies (E_{HOMO} and E_{LUMO}), HOMO-LUMO gap (E_G), change in E_G (ΔE_G), work function (φ), average adsorption distance (d) and dipole moment (D) of CO, NO and NH_3 adsorbed C_{18} nanoclusters, respectively …… (38)

Table 3.3 Calculated recovery time (τ_I, τ_Y and τ_U) of CO, NO and NH_3 adsorbed C_{18} nanoclusters at T = 300 K and T = 500K, respectively ……. (42)

Table 3.4 Chemical potential (μ), hardness (η), softness (S) and electrophilicity (ω) for CO, NO and NH_3 adsorbed C_{18} nanoclusters, respectively……..... (46)

Table 3.5 Comparison of CO, NO and NH_3 gas adsorption properties of C_{18} nanocluster with other carbon based nanomaterials …….. (47)

Table 4.6 Bond length and Angle, E_{HOMO} and E_{LUMO}, and E_G for $C_{17}X$ nanoclusters …… (55)

Table 4.7 E_{ad}, E_{HOMO} and E_{LUMO}, E_F and corresponding shift (δE_F), E_G and its relative change (ΔE_G), work function (φ), change in work function ($\Delta\varphi$) and adsorption distance (d) of CO, NO and NH_3 adsorbed $C_{17}X$ (X=B,N) nanoclusters, respectively ……. (59)

Table 4.8 Calculated recovery time of CO, NO and NH_3 adsorbed $C_{17}B$, $C_{17}N$ nanoclusters for T = 300 K, $\upsilon = 10^{12}$ s^{-1} …….. (61)

Table 4.9 Chemical potential (μ), hardness (η), softness (S) and electrophilicity (ω) for CO, NO and NH_3 adsorbed $C_{17}X$ nanoclusters, respectively … (62)

Table 5.10 Bond lengths, binding distances, binding energies for $C_{18}TM$ nanoclusters …….. (68)

Table 5.2 Adsorption energies, HOMO-LUMO energy levels, energy gaps, and Fermi levels following the adsorption of CO, NO, and NH_3 onto $C_{18}TM$ nanoclusters …….. (72)

Table 5.3 Electron density, Laplacian, total energy density, and the ratio |V(r)| / (G(r)) ……. (77)

Table 5.4 Sensing response and recovery times of $C_{18}TM$ nanoclusters for CO, NO, and NH_3 adsorptions ……. (85)

Table 5.5 Adsorption energies and distances of $C_{18}TM$ as compared to the Pristine and Doped C_{18} Nanoclusters ……. (86)

Table 6.1 Structural parameters (bond length and Angle), binding distance, binding energies of $C_{18}X$ nanocluster …… (94)

Table 6.2 HOMO and LUMO energies (E_{HOMO} and E_{LUMO}), HOMO-LUMO gap (E_G), Fermi level (E_F), change in E_G (ΔE_G), shift in Fermi level (δE_F) and dipole moment (D) of $C_{18}Al$, $C_{18}Si$ and $C_{18}P$ as compared to pristine C_{18} nanocluster …… (95)

Table 6.3 Adsorption energies (E_{ad}), HOMO and LUMO energies (E_{HOMO} and E_{LUMO}), Fermi level (E_F), shift in Fermi level (δE_F), HOMO-LUMO gap (E_G), change in E_G (ΔE_G), adsorption distance (d) and dipole moment (D) of HCN adsorbed $C_{18}Al$, $C_{18}P$, $C_{18}Si$, as compared to HCN adsorbed pristine C_{18} nanocluster …… (98)

Table 6.4 Work function(φ), change in work function ($\Delta\varphi$), recovery time (τ) of HCN adsorbed C_{18}, $C_{18}Al$, $C_{18}Si$, $C_{18}P$ nanoclusters respectively ..... (101)

Table 7.1 Adsorption properties of the C_{18} nanocluster both before and after the process of doping and decoration …….. (109)
