

## List of Figures

<b>S. No.</b>	<b>Title</b>	<b>Page no.</b>
<b>Figure 1.1</b>	<b>Human-sloth bear conflict recorded in different states of India.</b>	<b>5</b>
<b>Figure 2.1</b>	<b>Map of Gujarat state (India) with five sloth bear sanctuaries</b>	<b>15</b>
<b>Figure 2.2</b>	<b>Jessore and Balaram Ambaji sloth bear sanctuaries located in North Gujarat.</b>	<b>16</b>
<b>Figure 2.3</b>	<b>Ratanmahal &amp; Jambughoda wildlife sanctuaries located in central Gujarat.</b>	<b>19</b>
<b>Figure 2.4</b>	<b>Shoolpaneshwar wildlife sanctuary located in south Gujarat.</b>	<b>20</b>
<b>Figure 3.1</b>	<b>Location of two sloth bear sanctuaries with landuse landcover patterns in North Gujarat.</b>	<b>23</b>
<b>Figure 3.2</b>	<b>Drainage pattern of both sanctuaries by hydrological modelling.</b>	<b>25-26</b>
<b>Figure 3.3</b>	<b>Sloth Bear presence and absence in two different seasons (2019-2020) generated using R package</b>	<b>32</b>
<b>Figure 4.1</b>	<b>Map of Gujarat with an extent representing the study area</b>	<b>42</b>
<b>Figure 4.2</b>	<b>Variables used for identifying potential human sloth bear conflict zones</b>	<b>45-47</b>
<b>Figure 4.3</b>	<b>The output of Area Under the Curve to test the efficiency of model in the present study.</b>	<b>49</b>
<b>Figure 4.4</b>	<b>The graph shows the omission rate and predicted area averaged over replicated runs as a function of the cumulative threshold.</b>	<b>50</b>
<b>Figure 4.5</b>	<b>A Jackknife test of variable importance measured in regularised training gain.</b>	<b>51</b>
<b>Figure 4.6</b>	<b>The relative importance of six variables in modelling the predicted probability of occurrence.</b>	<b>52</b>
<b>Figure 4.7</b>	<b>Potential human sloth bear conflict zones in Gujarat state varying between the values 0 to 1.</b>	<b>54</b>
<b>Figure 5.1</b>	<b>Study area representing protected habitats inhabiting sloth bear in Gujarat State</b>	<b>60</b>

<b>Figure 5.2</b>	<b>Environmental and Anthropogenic variables used for estimating resistance layer</b>	<b>65-67</b>
<b>Figure 5.3</b>	<b>Habitat resistance for connectivity between the core habitats of sloth bears based on the weighted sum scores of all the variables.</b>	<b>68</b>
<b>Figure 5.4</b>	<b>Least cost paths identified between the core habitats of sloth bears</b>	<b>70</b>
<b>Figure 5.5</b>	<b>Centrality flow (in Amps) for each linkage</b>	<b>71</b>
