

## ACKNOWLEDGEMENTS

In my long journey of life, I was supported immensely by many people in their unique ways. Their collective influence has left an indelible mark on my path, shaping it into a rich tapestry of experiences that I will cherish for a lifetime. At this pivotal juncture, I am compelled to express my deepest gratitude to all those who have played a role in supporting and guiding me in completing my doctoral journey of research and self-discovery.

I find myself at a loss for words when attempting to express my gratitude to my research guide Prof. C. Ratna Prabha, the Head of the Department of Biochemistry, under whose guidance I have had the privilege to conduct my doctoral research. It has been an immense honor to work under her mentorship. I am very grateful for her patience and understanding, which she generously extended to me throughout my research. Her willingness to provide me with the freedom to explore and experiment in the laboratory according to my vision has been invaluable, allowing me to grow both as a researcher and as an individual. Her influence will continue to resonate with me as I embark on the next chapter of my journey.

My heartfelt appreciation extends to my Doctoral committee, Prof. Anuradha Nerurkar, Dept. of Microbiology, Dr. Jayashree Pohnerkar, and Dr. Devesh Suthar for their invaluable guidance and scholarly insights that have enriched the depth and breadth of this work. Your feedback has been instrumental in refining my ideas and sharpening my analytical skills.

I would like to thank Prof. Sarita Gupta, Prof. G. Naresh Kumar, Prof. Rasheedunnisa Begum, Prof. Pushpa Robin, Dr. Shashikant Acharya, Dr. Sanjeev, Dr. Rajesh Singh, Dr. Laxmi Priya, Dr. Ravi Vijayvargia for their encouraging words, and scientific discussions and valuable feedback suggestions throughout the research tenure.

I am grateful to Prof. Yue Wang from IMCB Singapore for providing me with BWP17 Strain and thanks to Prof. Richard Canon from the University of Otago, New Zealand to provide me pRC2312 vector. In the beginning of the hard task of managing vectors and strain for research purposes, I want to thank Prof. Jia Ching Shieh from Chung Shan Medical University, Republic of China, who helped in my research to extend a significant level by providing plasmid pTET25MN-C, pTET25M. I

want to thank Prof. Sneha Sudha Kamath from the School of Life Science, Jawaharlal Nehru University for providing me BWP17 Strain after the Covid-19 pandemic. I also want to thank (IIT, Bombay) & GBRC Gandhinagar for allowing me to carry out my Proteomics and FACS study.

I am extremely grateful to Cell and Molecular Biology (Head) Prof. Pushpa Robin for providing me DBT-MSUB-ILSPARE facility, and Geology Dept. (Head) for providing me SEM instrumentation facility at The M. S. University of Baroda.

I am highly grateful to all the office staff of the Department of Biochemistry for their help and guidance in all the official matters whenever I needed them. I thank Neeta Madam and Komal Madam, Mayur Sir for their conducive and friendly support at university protocols.

I would like to extend my gratitude to Chirag Bhai (GCU section, The M. S. University of Baroda) for assistance in the UGC JRF fellowship.

I acknowledge my beloved lab family members, without whom the task was impossible. I thank my lab senior Dr. Ankita Doshi for becoming a base pillar of this research journey. I enjoyed scientific discussions with her and learned research tools and techniques. Dr. Prranshu, Dr. Brinda, Dr. Varsha, and Dr. Jinal have taught me good laboratory practices and made me understand scientific problems as and when required. Thanks to Other lab members Megha, Bhoomi, Anjali, Alex, Krishna, and Dimple making good friendly environment in the lab and joyful tea and tourism time to explore near places. Their friendly nature constantly helps in the research work. I would like to thank M.Sc students Tejas, Gopa, Rajal, Kunjan, Soumya, Payal, and Kalyani, who worked with me during the project teaching them and learning together was a good life experience.

It's the friends who make any journey lively, happy, and meaningful. I would like to extend my heartiest thanks to my friends Dr. Rabi, Dr. Pawan Thakur, Dr. Milton Roy, Dr. Dhruv Gohel, Dr. Shivani, Dr. Tanvi, Dr. Akash, Dr. Sejal, Raju Dhabi, Susmita, Dhruvi, Anjali, Fatima, Minal, Nisha, Shani, Shatakshi, Ananya, Dr. Nishant, Dr. Jayavardhan, others all the department research scholar for their unconditional support during scientific sessions as well as for other stuff

and consistent food supply. Specially I want to thank Prashant, Rajat Bhai, Abhishek, Shivani Bhave, Bhavya, Dhara, and Janki they stood behind me to support and encourage me.

This Journey is dedicated to my dear parents Kamala Devi & Shishram Ji and & my father's sister Anu Devi, Uncle Bhinwaram Ji, Words cannot express the depth of my gratitude for your unwavering love, support, and sacrifices throughout life from the earliest days of my education to the completion of this thesis, your steadfast encouragement and belief in my abilities have been my guiding light. finally, I, want to thank my champions my brother and sisters.

Sandeep Kumar Dantuslia
