

## List of Figures

<b>Figure 1.1:</b> Workflow Diagram of Data Retrieval and Analysis in Molluscan Research (1969-2024) .....	12
<b>Figure 1.2:</b> The figure depicting the Documents, Mean Total Count per articles, Mean Total Count per Year for the Year (1969-2024) .....	14
<b>Figure 1.3:</b> Comparative analysis of MCP and SCP .....	15
<b>Figure 1.4:</b> Comparative Chart of Total and Single Country Publications in Molluscan Research by Country .....	16
<b>Figure 1.5:</b> Distribution of Molluscan Research Articles by Scientific Discipline	17
<b>Figure 1.6:</b> Top 10 institutes according to the number of publications .....	24
<b>Figure 1.7:</b> Citation- Country analysis .....	25
<b>Figure 1.8:</b> Network Visualization of keywords used in Molluscan Research Studies .....	26
<b>Figure 1.9:</b> Trends in Molluscan Research Publications (2002-2018) .....	28
<b>Figure 1.10:</b> Comparative Analysis of Article Counts and Impact Factors Across Key Journals in Molluscan Research .....	29
<b>Figure 2.1:</b> Study area .....	37
<b>Figure 2.2:</b> Habitat of study area (A) Mangrol (B) Adri (C) Veraval (D) & (E) Quadrate sampling method .....	43
<b>Figure 2.3:</b> Displaying distinct intertidal zones:.....	48
<b>Figure 3.1:</b> Methodology for Molluscan diversity study .....	66
<b>Figure 3.2:</b> Molluscan species composition .....	133
<b>Figure 3.3:</b> Diversity Indices of Mollusca along different study sites .....	135
<b>Figure 3.4:</b> LWR of <i>Cerithium Caeruleum</i> .....	137
<b>Figure 3.5:</b> LWR of <i>Lunella coronatus</i> .....	139
<b>Figure 3.6:</b> LWR of <i>Peronia Verruculata</i> .....	140
<b>Figure 3.7:</b> LWR of <i>Trochus radiatus</i> .....	142
<b>Figure 3.8:</b> Mating behaviour of different Molluscan Species .....	144
<b>Figure 4.1:</b> Methodology for Species Distribution Modelling of Mollusc .....	153
<b>Figure 4.2:</b> The ROC curve and AUC values for machine learning models for potential zone distribution of Molluscs through SDM .....	160

<b>Figure 4.3:</b> The Figure. illustrating the likelihood of locating the species in relation to abiotic factors such as salinity, chlorophyll content, and temperature .....	162
<b>Figure 4.4:</b> Figure illustrates a correlation plot with various Bio-ORACLE data types .....	163
<b>Figure 4.5:</b> Projection for the species distribution model for <i>Cerithium caeruleum</i> using MaxEnt modelling .....	166
<b>Figure 4.6:</b> Projection for the species distribution model for <i>Lunella coronata</i> using MaxEnt modelling.....	166
<b>Figure 4.7:</b> Projection for the species distribution model for <i>Peronia verruculata</i> using MaxEnt modelling .....	167
<b>Figure 4.8:</b> Projection for the species distribution model for <i>Peronia verruculata</i> using MaxEnt modelling.....	167
<b>Figure 4.9:</b> Generation of Spatial Autocorrelation Matrix for the study area.....	169
<b>Figure 5.1:</b> Density of <i>Cerithium caeruleum</i> along different study sites from different zones .....	172
<b>Figure 5.2:</b> Abundance of <i>Cerithium caeruleum</i> along different study sites from different zones .....	173
<b>Figure 5.3:</b> Frequency of <i>Cerithium caeruleum</i> along different study sites from different zones .....	174
<b>Figure 5.4:</b> Density of <i>Trochus radiatus</i> along different study sites from different zones.....	175
<b>Figure 5.5:</b> Abundance of <i>Trochus radiatus</i> along different study sites from different zones .....	176
<b>Figure 5.6:</b> Frequency of <i>Trochus radiatus</i> along different study sites from different zones .....	177
<b>Figure 5.7:</b> Density of <i>Peronia verruculata</i> along different study sites from different zones .....	178
<b>Figure 5.8:</b> Abundance of <i>Peronia verruculata</i> along different study sites from different zones .....	179
<b>Figure 5.9:</b> Frequency of <i>Peronia verruculata</i> along different study sites from different zones .....	180
<b>Figure 5.10:</b> Density of <i>Trochus radiatus</i> along different study sites from different zones.....	181

<b>Figure 5.11:</b> Abundance of <i>Trochus radiatus</i> along different study sites from different zones .....	182
<b>Figure 5.12:</b> Frequency of <i>Trochus radiatus</i> along different study sites from different zones .....	183
<b>Figure 5.13:</b> Histological slide of the male gonad of <i>Lunella coronatus</i> from <b>March (Summer)</b> (10x) .....	184
<b>Figure 5.14:</b> Histological slide of the male gonad of <i>Lunella coronatus</i> from <b>January (Winter)</b> .....	184
<b>Figure 5.15:</b> Histological slide of the male gonad of <i>Lunella coronatus</i> from <b>August (Monsoon)</b> (10x) .....	185
<b>Figure 5.16:</b> Histological slide of the female gonad of <i>Lunella coronatus</i> from <b>March (Summer)</b> (10x) .....	186
<b>Figure 5.17:</b> Histological slide of the male gonad of <i>Lunella coronatus</i> from <b>January (Winter)</b> (10x) .....	186
<b>Figure 5.18:</b> Histological slide of the female gonad of <i>Lunella coronatus</i> from <b>August (Monsoon)</b> (10x) .....	187
<b>Figure 5.19:</b> Histological slide of the male gonad of <i>Cerithium Caeruleum</i> from <b>August (Monsoon)</b> (10x) .....	188
<b>Figure 5.20:</b> Histological slide of the male gonad of <i>Cerithium Caeruleum</i> from <b>January (Winter)</b> (10x) .....	188
<b>Figure 5.21:</b> Histological slide of the male gonad of <i>Cerithium Caeruleum</i> from <b>March (Summer)</b> (10x) .....	189
<b>Figure 5.22:</b> Histological slide of the female gonad of <i>Cerithium Caeruleum</i> from <b>March (Summer)</b> (10x) .....	190
<b>Figure 5.23:</b> Histological slide of the female gonad of <i>Cerithium Caeruleum</i> from <b>January (Winter)</b> (10x) .....	190
<b>Figure 5.24:</b> Histological slide of the female gonad of <i>Cerithium Caeruleum</i> from <b>August (Monsoon)</b> (10x) .....	191
