

<b>Table 2A.1:</b> Transition temperatures (in °C) and associated enthalpy of transition ( $\Delta H$ ) in ( $\text{kJ mol}^{-1}$ ) of <i>I-n</i> .....	35
<b>Table 2A.2:</b> Transition temperatures (in °C) and associated enthalpy of transition ( $\Delta H$ ) in ( $\text{kJ mol}^{-1}$ ) of <i>II-n</i> .....	36
<b>Table: 2A.3:</b> Comparison of transition temperatures (°C) of present series <i>II-n</i> and structurally related series A.....	42
<b>Table 2A.4:</b> Quantum mechanical descriptors of the dimers calculated using B3LYP/6-31G level of theory.....	48
<b>Table 2A.5:</b> Optical properties and dimensional parameters of the dimers.....	50
<b>Table 2B.1:</b> Transition temperatures (in °C) and associated enthalpy of transition ( $\Delta H$ ) in ( $\text{kJ mol}^{-1}$ ) of NpAzOnBr.....	106
<b>Table 2B.2:</b> Transition temperatures (°C) of series <i>I-n</i> and NpAzOnBr.....	109
<b>Table 2B.3:</b> Refractive index and dielectric constant of NpAzO6Br by Ellipsometry technique .....	111
<b>Table 2B.4:</b> Quantum mechanical descriptors of compounds NpAzOnBr.....	113
<b>Table 2B.5:</b> Optical properties of compounds NpAzOnBr.....	115
<b>Table 2B.6:</b> Thermal parameters and dimensional parameters of the prepared compounds NpAzOnBr.....	116
<b>Table 3.1:</b> Transition temperatures (in °C) and associated enthalpy of transition ( $\Delta H$ ) in ( $\text{kJ mol}^{-1}$ ) of <i>III-n</i> .....	156
<b>Table 3.2:</b> Transition temperatures (in °C) and associated enthalpy of transition ( $\Delta H$ ) in ( $\text{kJ mol}^{-1}$ ) of <i>IV-n</i> .....	156
<b>Table 3.3:</b> Comparison of transition temperatures (°C) of present series <i>III-n</i> and structurally related series A.....	164
<b>Table 3.4:</b> Quantum mechanical descriptors.....	166
<b>Table 3.5:</b> Optical properties and dimensional parameters of the dimers.....	168
<b>Table 4.1:</b> Transition temperatures (in °C) and associated enthalpy of transition ( $\Delta H$ ) in ( $\text{kJ mol}^{-1}$ ) of <i>V-n</i> .....	239
<b>Table 4.2:</b> Transition temperatures (in °C) and associated enthalpy of transition ( $\Delta H$ ) in ( $\text{kJ mol}^{-1}$ ) of <i>VI-n</i> .....	240

<b>Table 4.3:</b> Comparison of transition temperatures ( $^{\circ}\text{C}$ ) of present series <i>VI-n</i> and structurally related series A.....	248
<b>Table 4.4:</b> Quantum mechanical descriptors.....	250
<b>Table 4.5:</b> Optical properties and dimensional parameters of the dimers.....	252
<b>Table 4.6:</b> <i>E-Z</i> and <i>Z-E</i> relaxation along with conversion efficiency.....	256
<b>Table 5.1:</b> Transition temperatures (in $^{\circ}\text{C}$ ) and associated enthalpy of transition ( $\Delta\text{H}$ ) in ( $\text{kJ mol}^{-1}$ ) of <i>VII-n</i> .....	337
<b>Table 5.2:</b> Transition temperatures (in $^{\circ}\text{C}$ ) and associated enthalpy of transition ( $\Delta\text{H}$ ) in ( $\text{kJ mol}^{-1}$ ) of <i>VIII-n</i> .....	338
<b>Table 5.3:</b> Quantum mechanical descriptors.....	350
