<u>Chapter 1</u>		
Introduction and literature review of transition metal complexes containing a derivative of pyrazolone ligands and their coordination chemistry		1-33
1.1	Introduction	2-5
	1.1.1 Transition metal chemistry and its characteristics	2
	1.1.2 Physical appearance and characteristics of Nickel and Copper metals	4
1.2	A pyrazolone chemistry	5-12
	1.2.1 Pyrazolone	7
	1.2.2 Acylpyrazolone	10
	1.2.3 Application of acylpyrazolone	11
1.3	Transition metals complexes based on derivative of pyrazolone ligand	12-19
	1.3.1 A brief review: Work done on Cu(II) and Ni(II) complexes	12
1.4	<i>In-vitro</i> Anticancer activity	19-24
	1.4.1 MTT assay	20
	1.4.2 Scratch assay/Wound healing assay	21
	1.4.3 Live-dead assay/Cell death analysis	22
	1.4.4 Gene Expression Study	24
	References	25-33
<u>Chapter 2</u>		
Synthesis, Crystal Features and Characterization of a series of acylpyrazolone ligands: Computational analysis		34-70
2.1	Introduction	35
2.2	Experimental work	36-39
	2.2.1 Materials and Methods	36
	2.2.2 Synthesis of ligands	36
	2.2.3 X-ray crystallographic study	39

Contents

2.2.4	Physical measurements and Characterization	39
2.2.5	Computational analysis	39
2.3	Results and Discussion	40-66
2.3.1	FTIR spectral analysis	40
2.3.2	¹ H-NMR spectral analysis	42
2.3.3	Single crystal X-ray diffraction analysis	43
2.3.4	DFT based computational analysis	50
2.3.4.1	A Frontier molecular orbital energy (HOMO-LUMO) analysis	50
2.3.5	Hirshfeld surface area analysis	56
2.4	Conclusion	66
	References	67-70

Chapter 3

Synthesis, Characterization and Structural assessment of biologically active square pyramidal Cu(II) acylpyrazolone complexes: DFT, Hirshfeld analysis	71-156
---	---------------

Chapter 3 (Part-a):

Square pyramidal Cu(II) acylpyrazolone complexes: Synthesis, characterization, crystal structure, DFT and Hirshfeld analysis; <i>in-vitro</i> anti-cancer evaluation	72-116
---	---------------

3a.1	Introduction	73-74
3a.2	Experimental Work	74-79
3a.2.1	Materials and Methods	74
3a.2.2	Synthetic route of complex-1 and complex-2	74
3a.2.3	X-ray crystallographic study	76
3a.2.4	Physical measurements and characterization	76
3a.2.5	Computational analysis	77
3a.2.6	<i>In vitro</i> anti-cancer activity	77
3a.2.6.1	Cell culture conditions	78
3a.2.6.2	MTT- Cell viability assay	78
3a.2.6.3	Live/Dead assay	78

Contents

3a.2.6.4	Scratch assay/wound healing assay	79
3a.3	Results and Discussion	79-108
3a.3.1	FTIR spectral studies	79
3a.3.2	Molar conductivity measurements	81
3a.3.3	Thermogravimetric analysis	81
3a.3.4	Electronic spectral analysis	83
3a.3.5	Single crystal X-ray diffraction analysis	84
3a.3.6	DFT based computational analysis	90
3a.3.6.1	Molecular electrostatic potential (MESP)	95
3a.3.6.2	Spin density plot analysis	95
3a.3.6.3	Natural bond orbital (NBO) analysis	96
3a.3.7	Hirshfeld surface area analysis	97
3a.3.8	ESR analysis (magnetic behaviour)	102
3a.3.9	Electro-chemical analysis (CV)	102
3a.3.10	<i>In vitro</i> Anticancer activity	103
3a.3.10.1	MTT assay	104
3a.3.10.2	Cell death analysis	105
3a.3.10.3	Scratch Assay/Wound closure assay	107
3a.4	Conclusion	108
	References	109-114
	Published Papers (Front page) from Chapter 3a	115-116
<u>Chapter 3 (Part-b):</u>		
Acyipyrazolone based square pyramidal Cu(II) complexes: Synthesis, structural characterization, DFT and antiproliferative properties		117-156
3b.1	Introduction	118-119
3b.2	Experimental section	119-123
3b.2.1	Materials and Methods	119
3b.2.2	Synthetic route of complex-3 and complex-4	119
3b.2.3	X-ray crystallographic study	121
3b.2.4	Physical measurements and Characterization	121

Contents

3b.2.5	Computational analysis	121
3b.2.6	Anti-cancer activity	122
3b.2.6.1	Cell culture conditions	122
3b.2.6.2	MTT- Cell viability assay	122
3b.2.6.3	Live/Dead assay	123
3b.2.6.4	Scratch assay/wound healing assay	123
3b.3	Results and Discussion	123-149
3b.3.1	FTIR spectral studies	124
3b.3.2	Thermogravimetric analysis	125
3b.3.3	Electronic spectral analysis	126
3b.3.4	Single crystal X-ray diffraction analysis	127
3b.3.5	DFT based computational analysis	134
3b.3.5.1	Natural bond orbital (NBO) analysis	139
3b.3.6	Hirshfeld surface area analysis & 2d fingerprint plots	140
3b.3.7	ESR analysis (magnetic behaviour)	143
3b.3.8	<i>In vitro</i> anticancer activity	145
3b.3.8.1	MTT assay	145
3b.3.8.2	Live/Dead assay (Cell death analysis)	147
3b.3.8.3	Scratch Assay	148
3b.4	Conclusion	149
	References	150-155
	Published paper (Front page) from Chapter 3b	156
<u>Chapter 4:</u>		
Synthesis of New Square planar Cu(II) complexes derived from acylpyrazolone ligand: Molecular structure Computational, Hirshfeld analysis and antiproliferative properties		157-238
Chapter 4 Part (a):		
Cytotoxicity assay and gene expression studies of acylpyrazolone-based square planar Cu(II) complexes: synthesis, characterization and computations		158-201
4a.1	Introduction	159-160

Contents

4a.2	Experimental work	160-165
4a.2.1	Materials and Methods	160
4a.2.2	Synthetic route of complex-5 and complex-6	161
4a.2.3	X-ray crystallographic study	163
4a.2.4	Physical measurements and Characterization	163
4a.2.5	Computational analysis	163
4a.2.6	<i>In vitro</i> anti-cancer activity	164
4a.2.6.1	Cell culture conditions	164
4a.2.6.2	MTT- Cell viability assay	164
4a.2.6.3	Live/Dead assay	164
4a.2.6.4	Gene expression study	165
4a.3	Results and Discussion	165-195
4a.3.1	FTIR spectral studies	165
4a.3.2	Molar conductivity measurements	167
4a.3.3	Thermogravimetric analysis	167
4a.3.4	Electronic spectral analysis	168
4a.3.5	Single crystal X-ray diffraction analysis	169
4a.3.6	Powder XRD study	175
4a.3.7	DFT based computational analysis	176
4a.3.7.1	Molecular electrostatic potential (MESP) & Spin density	182
4a.3.7.2	Natural bond orbital (NBO) analysis	183
4a.3.8	Hirshfeld surface area analysis	184
4a.3.9	ESR analysis (magnetic behaviour)	187
4a.3.10	Electro-chemical analysis (CV)	188
4a.3.11	<i>In vitro</i> Anticancer activity	190
4a.3.11.1	Cytotoxicity assay	190
4a.3.11.2	Cell death analysis	192
4a.3.11.3	Gene expression study by qRT-PCR	193
4a.4	Conclusion	195
	References	196-200
	Published paper (Front page) from Chapter 4a	201

Contents

Chapter 4 Part (b):		
Two new square planar Cu(II) complexes derived from a heterocyclic pyrazolone ligand: Synthesis, <i>in vitro</i> anticancer activity, DFT and Hirshfeld analysis		202-238
4b.1	Introduction	203-204
4b.2	Experimental Section	205-208
	4b.2.1 Materials and Methods	205
	4b.2.2 Synthetic route of complex-7 and complex-8	205
	4b.2.3 Study of X-ray crystallography	206
	4b.2.4 Physical measurements and Characterization	207
	4b.2.5 Computational analysis (DFT)	207
	4b.2.6 <i>In vitro</i> anti-cancer activity	207
	4b.2.6.1 Cell culture conditions	207
	4b.2.6.2 MTT- Cell viability assay	208
4b.3	Results and Discussion	208-232
	4b.3.1 FTIR spectral analysis	208
	4b.3.2 Thermogravimetric analysis	210
	4b.3.3 Electronic spectral analysis	211
	4b.3.4 Single crystal X-ray diffraction analysis	212
	4b.3.5 Computational analysis employing DFT	220
	4b.3.5.1 A correlation of biological study with HOMO-LUMO energy analysis	221
	4b.3.5.2 Spin density plot	224
	4b.3.5.3 Natural bond orbitals (NBOs) analysis	225
	4b.3.6 Hirshfeld surface analysis combined with a 2D fingerprint	226
	4b.3.7 ESR analysis (Magnetic behaviour)	230
	4b.3.8 Cytotoxicity assay	231
4b.4	Conclusion	232-233
	References	234-238

Chapter 5:

Chemical assessment of three Octahedral Ni(II) Complexes with heterocyclic acylpyrazolone ligand: Crystal structure, DFT-NBO analysis, Hirshfeld and Magnetic study **239-282**

5.1	Introduction	240-241
5.2	Experimental section	241-245
	5.2.1 Materials and Methods	241
	5.2.2 Synthetic route of complex-9, complex-10 and complex-11	241
	5.2.3 X-ray crystallographic structure determination	244
	5.2.4 Physical measurements and Characterization	244
	5.2.5 Computational measurements (DFT)	245
	5.2.6 Magnetic study	245
5.3	Results and discussion	245-274
	5.3.1 FTIR spectral analysis	245
	5.3.2 Molar conductivity	248
	5.3.3 Thermogravimetric analysis	248
	5.3.4 Electronic spectral analysis	250
	5.3.5 Magnetic study	252
	5.3.6 Structural properties	254
	5.3.7 Powder XRD study	262
	5.3.8 Computational analysis of compounds employing DFT study	263
	5.3.8.1 A Frontier molecular orbital energy analysis	264
	5.3.8.2 Natural bond orbital (NBO) analysis	268
	5.3.9 2D fingerprint combined with Hirshfeld surface analysis	269
5.4	Conclusion	274
	References	275-279
	Published paper (Front page) from Chapter 5	280
	Research publications	281
	Conferences	282
