

## List of Figures:

<b>Content</b>	<b>Page no.</b>
1.1 Obesity and its associated co-morbidities	11
1.2 AT Remodelling during obesity	15
1.3 Phenotypic and metabolic characters of M1 and M2 macrophages	34
3.1 Protocol for THP-1 differentiation into M1, M2 and MMe	48
3.2 Protocol for 3T3-L1 differentiation	49
4.1 Morphological characterization of THP-1 derived Macrophages differentiated into M1, M2 and MMe	63
4.2 Differential expressions of markers in THP-1 derived Macrophages differentiated into M1, M2 and MMe subtypes	65
4.3 Inflammatory markers in THP-1 derived macrophages polarized into M1, M2 and MMe	67
4.4 ER stress in macrophages	68
4.5 Autophagy-related gene and protein expression in THP-1-derived macrophage subtypes	70
5.1 Differential expressions of metabolic pathway markers in THP-1-derived macrophage subtypes	75
5.2 Effect of glycolytic inhibition using 2-deoxy-D-glucose (2-DG) on macrophage polarization	77
5.3 Effect of fatty acid (FA) uptake inhibition using Etomoxir (Eto) on macrophage polarization	79
5.4 Effect of PPAR $\gamma$ inhibition using GW9662 on macrophage differentiation	80

6.1 Effect of macrophage-conditioned media on the adipocyte	84
6.2 Influence of macrophage-conditioned media on Akt phosphorylation in 3T3-L1 adipocytes	86
7.1 Venn Diagram for overlapping and exclusive proteins among different macrophage subtypes	89
7.2 Bar graph of top pathways enriched in MMe	91
7.3 Clustergram based on input genes and enriched pathways in MMe	91
7.4 Bar graph of top pathways enriched in M1	92
7.5 Clustergram based on input genes and enriched pathways in M1	93
7.6 Bar graph of top pathways enriched in M2	94
7.7 Clustergram based on input genes and enriched pathways in M2	95
7.8 PPI network analysis of MMe	96
7.9 PPI network analysis of M1	97
7.10 PPI network analysis of M2	99
