

LIST OF TABLES

Table No.	Particulars	Page No
2.1	Critical energy and economic metrics in India.	08
2.2	Possible potential of renewable energy in India	09
2.3	Consumption of energy by sector during 2019 to 2020 of India	10
2.4	Cost comparison of solar thermal system and solar photovoltaic	11
2.5	Summary of RTS method and MCOM used for numerical analysis of STS.	14
2.6	Applications of solar energy in general and temperature information	18
2.7	Brief Summary of FPTR used for different STS	19
2.8	Summary of literature review of different methods to predict the value of N	32
4.1	Default specification of experimental setup	47
4.2	Classification of rays' interaction with FPSRS	51
4.3	Value of E_r (%) observed for the rays reaching to the BRS [min, max]	60
4.4	Distribution of total χ when $\angle A'OB' = 58^\circ$ and $\angle A'OB' = 62^\circ$ respectively	64
4.5	Solar radiation data for the location of Vadodara, Gujarat, India (April 2020)	65
5.1	Summary of different method based on its characteristic.	74
5.2	Description of PM for FPSRS	76
5.3	Different positions of grid at different instances of ray	77
5.4	Solar radiation data for Vadodara, Gujarat, India (April 2020)	78
5.5	Comparative study of conventional and proposed method	91
6.1	Default specifications of HTC based FPSRS used for numerical analysis	107
6.2	Default specifications of OTC based FPSRS used for numerical analysis	108
6.3	Comparative result of STC and HTC based FPSRS for SS and WS solar radiation condition.	112
A.1.1	Coordinates of the plane for calculating the unit vector	149
B.1.1	Distribution of rays under each case at different angle of incidence to FSRU	151
B.1.2	Top coordinates of ray considered for experiment and for CAD simulation	151
B.1.3	Coordinator for point P1	154
B.1.4	Coordinator for point P2	155
B.1.5	Coordinates of BRS observed for ray from CAD software for angle 30-90° and for (A-F) cases	156
B.1.6	Coordinates of BRS observed for ray from experimental model for angle	158

30-90° and for (A-F) cases

B.1.7 Distance travelled by ray which is reach to BRS

159
