

Contents

Chapter 1. General Introduction	1-33
1.1. Resources for polymer development	02
1.2. Vegetable oils (VOs): Renewable source for polymer development	04
1.3. Castor oil (CO) : NEVO source	08
1.4. Mahua oil (MO): NEVO source	10
1.5. Polyurethanes (PUs): Versatile class of polymers	10
1.5.1. Waterborne polyurethane polymers (WPU)	11
1.5.2. Chemistry of WPU	11
1.6. CO-based PUs and WPU	15
1.7. MO-based PUs and WPU	19
1.6. References	24
Chapter 2. Extraction and Physico-chemical Properties of Non-edible Vegetable oils	33-43
2.1. Extraction of NEVOs	35
2.1.1. Extraction of CO	35
2.1.2: Extraction of MO	36
2.2. Determination of physico-chemical properties of NEVOs	37
2.2.1. Acid value (AV) determination	37
2.2.2. Hydroxyl value (HV) determination	37
2.2.3. Iodine value (IV) determination	38
2.2.4. Saponification value (SV) determination	38
2.2.5. Specific gravity (SG) determination	39
2.3. Chemical analysis	40
2.4. References	42
Chapter 3. Development of Polyurethane (urethane-modified polyester amide) Polymers using Mahua oil and Castor oil	44-69
3.1. Introduction	45
3.2. Experimental	47
3.2.1. Materials	47
3.2.2. Methods	47
3.2.2.1. Synthesis of MFA	47

3.2.2.1. Synthesis of PEA	48
3.2.2.1. Synthesis of UmPEA	48
3.2.2.4. UmPEA film preparation	49
3.2.3. Characterization	49
3.3. Results and discussion	50
3.3.1. Physico-chemical properties	50
3.3.2. Structural analysis	51
3.3.2.1. ATR-FTIR	51
3.3.2.2. ¹ H NMR	52
3.3.3. Swelling behavior of UmPEA films	54
3.3.4. Chemical resistance performance of UmPEA films	55
3.3.5. Solubility behavior of UmPEA films	56
3.3.6. Thermal analysis	58
3.3.6.1. DSC	58
3.3.6.2. TGA	59
3.3.7. Morphological analysis	63
3.4. References	65
Chapter 4. Development of Waterborne Polyurethane Polymers using Castor oil	70-93
4.1. Introduction	71
4.2. Experimental	73
4.2.1. Materials	73
4.2.2. Methods	73
4.2.2.1. Synthesis of WPUC dispersions	73
4.2.2.2. Coating of WPUC on PE/C blend fabric	75
4.2.3. Characterization	76
4.2.3.1. Physical characteristic	76
4.2.3.2. Dispersion size distribution	77
4.2.3.3. Structural characterization	77
4.2.3.4. Fastness properties of WPUC on PE/C blend fabrics	77
4.2.3.5. Air permeability of WPUC on PE/C blend fabrics	78
4.2.3.6. Mechanical properties of WPUC on PE/C blend fabrics	78
4.2.3.7. Antibacterial activity of WPUC on PE/C blend fabrics	78

4.3. Results and discussion	78
4.3.1. Physical characterization of WPUC dispersions	78
4.3.2. Particle size distribution and zeta potential of WPUC dispersions	79
4.3.3. Structural characterization of WPUC films	81
4.3.4. Color fastness evaluation of WPUC on PE/C blend fabrics	82
4.3.5. Air permeability of WPUC on PE/C blend fabrics	84
4.3.6. Mechanical properties of WPUC on PE/C blend fabrics	84
4.3.6.1. Abrasion resistance	84
4.3.6.2. Bending modulus	85
4.3.6.3. Tensile strength	85
4.3.7. Antibacterial activity of WPUC on PE/C blend fabrics	87
4.4. References	89
Chapter 5. Development of Waterborne Polyurethane-urea Dispersion using Castor oil	94-114
5.1. Introduction	95
5.2. Experimental	97
5.2.1. Material	97
5.2.2. Methods	97
5.2.2.1. Synthesis of CO-based waterborne polyurethane-urea dispersions	97
5.2.2.2. Preparation of WPUU films	98
5.3.3. Characterization	98
5.3.3.1. Physical characteristic	98
5.3.3.2. DLS	99
5.3.3.3. Electrolytic stability	99
5.3.3.4. ATR-FTIR	99
5.3.3.5. Chemical and solvent resistance	99
5.3.3.6. Mechanical properties of WPUU	99
5.3.3.7. Morphological Properties	99
5.3.3.8. DSC	100
5.3.3.9. TGA	100
5.3. Results and discussion	100
5.3.1. Physical characteristics	100
5.3.2. DLS of WPUU dispersions	101

5.3.3. Electrolytic stability of WPUU dispersions	102
5.3.4. ATR-FTIR of WPUU Films	102
5.3.5. Chemical and solvent resistance of WPUU Films	103
5.3.6. Mechanical properties of WPUU Films	104
5.3.7. Morphological properties of WPUU Films	105
5.3.8. Thermal properties of WPUU Films	106
5.3.8.1. DSC	106
5.3.8.2. TGA	107
5.4. References	111
Chapter 6. Development of Polyurethane Polymers Composite Films using Castor oil	115-139
6.1. Introduction	116
6.2. Experimental	118
6.2.1. Materials	118
6.2.2. Methods	118
6.2.2.1. Synthesis of SiO ₂ NPs using rice husk	118
6.2.2.2. Preparation of CO-based PU and PUS composite films	118
6.2.2.3. Preparation of curcumin-incorporated CO-based PU and PUSC composite films	119
6.2.3. Characterization of SiO ₂ NPs and CO-based PU and its composite films	120
6.2.3.1. ATR-FTIR	120
6.2.3.2. DLS	120
6.2.3.3. XRD	120
6.2.3.4. EDX	120
6.2.3.5. Swelling and leaching behavior	120
6.2.3.6. AFM measurements	121
6.2.3.7. XPS analysis	121
6.2.3.8. Optical analysis	121
6.2.3.9. Wettability	121
6.2.3.10. Thermal behavior	121
6.2.3.11. Antibacterial activity	122
6.3. Results and discussion	122
6.3.1. Characterization of SiO ₂ NPs	122
6.3.1.1. ATR-FTIR	122

6.3.1.2. DLS	123
6.3.1.3. XRD	123
6.3.1.4. EDX	124
6.2.2. Characterization of PU and its composite films	124
6.2.2.1. ATR FTIR	124
6.2.2.2. Swelling and leaching behavior	125
6.2.2.3. AFM measurements	126
6.2.2.4. XPS analysis	127
6.2.2.5. Optical analysis	129
6.2.2.6. Wettability	131
6.3.3. Thermal behavior	131
6.3.4. Antibacterial activity	133
6.4. References	135
Chapter 7. Summary and Conclusions	140-147
<i>List of Research Publications</i>	148-150
<i>List of Research Presentations</i>	151-152
