Acknowledgment	iv
Abstract	v
Content	vi
List of Figures	ix
List of Tables	xxiii
Nomenclature	xxv
1. Introduction	1
1.1 Preliminary Remark.....	1
1.2 Background.....	1
1.3 Motivation.....	2
1.4 Aim and Scope of Present Study.....	3
1.5 Objectives of Present Study.....	3
1.6 Thesis Outline.....	4
2. Literature Review	5
2.1 Preliminary Remark.....	5
2.2 Flow around Single Circular Cylinder.....	6
2.2.1 Flow Behaviour around a Cylinder.....	6
2.3 Flow around Multiple Circular Cylinders.....	11
2.3.1 Hydrodynamic Interaction in Real Flow.....	13
2.3.2 Hydrodynamic Interaction between Circular Cylinders in Potential Flow.....	17
2.4 Flow around Single Polygonal Cylinder.....	21
2.4.1 Polygonal Cylinder in real flow.....	21
2.4.2 Single Polygonal Cylinder in Potential Flow.....	26
2.5 Flow around Multiple Polygonal Cylinders.....	28
2.5.1 Real Flow around Multiple Polygonal Cylinders.....	31
2.5.2 Potential Flow around Multiple Polygonal Cylinder.....	37
2.6 Gaps Identified from Literature Survey.....	39
2.7 Closing Remark.....	40

3	Mathematical Modelling	41
3.1	Preliminary Remark.....	41
3.2	Complex Variable approach in Potential Flow.....	41
3.3	Potentials Flow around Single Circular Cylinder.....	42
3.4	Potential Flow around Single Polygonal Cylinder.....	45
3.4.1	Hypotrochoidal Mapping.....	45
3.4.2	Velocity and Pressure Field.....	47
3.5	Potential Flow around Two Circular Cylinders.....	48
3.5.1	Bilinear Mapping.....	48
3.5.2	Complex Potential Function.....	49
3.5.3	Velocity and Pressure Field.....	51
3.5.4	Hydrodynamic Forces.....	52
3.6	Potential Flow around Pair of Polygonal and Circular Cylinders.....	53
3.6.1	Mapping from Annulus to Polygonal-Circular Geometry.....	53
3.6.2	Complex Potential Function.....	54
3.6.3	Velocity and Pressure around the Cylinders.....	55
3.6.4	Hydrodynamic Forces.....	55
3.7	Flow around Polygonal-Polygonal Cylinder Pair.....	56
3.7.1	Mapping from Annulus to Polygonal-Polygonal Geometry.....	56
3.7.2	Complex Potential Function.....	57
3.7.3	Velocity around Cylinders.....	58
3.7.4	Hydrodynamic Forces.....	59
3.8	Closing Remark.....	59
4	Results and Discussion	60
4.1	Preliminary Remark.....	60
4.2	Stepwise Procedure to Obtain the Results.....	60
4.3	Potential Flow around Single Circular/Polygonal Cylinder.....	62
4.3.1	Uniform Potential Flow around a Cylinder.....	66
4.3.2	Effect of Corner Radius on Flow Parameters in Potential Flow.....	68
4.3.3	Potential Flow due to presence of Singularity (Doublet or Vortex) at Finite Distance from the Cylinder.....	77

4.4	Hydrodynamic Interaction between Two Circular Cylinders.....	81
4.4.1	Convergence Test.....	81
4.4.2	Velocity and Pressure distribution.....	84
4.4.3	Hydrodynamic Forces on Cylinders.....	98
4.5	Hydrodynamic Interaction between Circular and Polygonal Cylinder.....	102
4.5.1	Velocity and Pressure Distribution.....	103
4.5.2	Hydrodynamic Forces on Cylinders.....	118
4.6	Hydrodynamic Interaction between two Polygonal Cylinders.....	121
4.6.1	Velocity and Pressure Distribution.....	123
4.6.2	Hydrodynamic Forces on Cylinders.....	138
4.8	Closing Remark.....	144
5.	Conclusion and Future Scope	145
5.1	Summery.....	145
5.2	Conclusion.....	146
5.3	Limitations of Present Work.....	148
5.4	Future Scope.....	148
