

List of Tables

Sr. No.	Table No.	Table Description	Page No.
1	2.1	Physiological characteristics of the vagina	10
2	2.2	pH-responsive polymer (Natural)	23
3	2.3	Formulation of pH-sensitive polymers	28
4	2.4	Classification of Microcapsules	32
5	2.5	Microencapsulation methods used in textiles	33
6	2.6	Functional textiles and ingredient used for preparing them	35
7	2.7	pH-sensitive polymers which can be micro encapsulated	37
8	2.8	Ingredient utilised for microcapsules	44
9	2.9	pH-responsive polymers with their application textiles	46
10	3.1	Components of monomers in reaction scheme-3.3	85
11	3.2	Chemicals and quantity are set to formulate polymers 1A-1E	88
12	3.3	Chemicals and quantity are set to formulate polymers 2A-2E	89
13	3.4	Chemicals and quantity are set to formulate polymers 3A-3E	91
14	3.5	Chemicals and quantity are set to formulate polymers 4A-4E	92
15	3.6	Chemicals and quantity are set to formulate polymers 5A-5E	94
16	3.7	Chemicals and quantity are set to formulate polymers 6A-6E	95
17	3.8	Chemicals and quantity are set to formulate polymers 7A-7E	97
18	3.9	Steps for Preparation of pH-Stimuli microcapsule	97
19	3.10	Chemicals and quantity are set to formulate polymers [1C, 2C, 3D 4B, 5B, 6C, 7C]	99
20	3.11	Parameters for measurable exposure valuation of sanitary napkin	112
21	4.1	The specific IR bands noted for the pH-responsive microcapsules	125
22	4.2	FSC and AUL values of prepared SAPs	130
23	4.3	Water absorbency of CAs, and SAPs/mSAPs coated sanitary napkins at different time interval	135
24	4.4	Saline solution absorbency of Cas and SAPs/mSAPs coated	136

		sanitary napkins at different time interval	
25	4.5	Decrement of Microbes (<i>E. coli</i>) in sanitary napkin coated with SAP/mSAP and CAs	143
26	4.6	Physical attributes of SAP/mSAP coated sanitary napkins and commercially available napkins	144
27	4.7	Hardness, Alkalinity and Chlorides results for effluent of SAPs/mSAPs coated sanitary napkins and CAs	149
