List of Figures	xvi
Table of Contents	xix

Sr. No.	Particulars	Page No.
Chapter-1: Introduction		
	Overview	1
	References	4
Chapter-2: Review of Literature		
	Overview	5
2.1	Hygiene Textiles	6
2.1.1	Female Hygiene	6
2.1.2	Importance of Feminine Hygiene	8
2.1.3	Functioning of the vulvovaginal zone	9
2.1.4	Practices for Feminine Hygiene	13
2.1.5	Management of Hygiene during Period	15
2.1.6	Various absorbents utilized during menses	16

2.1.6.1	Reusable and washable cloth pads	16
2.1.6.2	Commercial sanitary pads	16
2.1.6.3	Tampons	17
2.1.6.4	Menstrual cups	18
2.1.7	Disease allied with inappropriate utilization of sanitary pads/napkins	18
2.2	pH-responsive polymers	19
2.2.1	Synthesis of pH-sensitive Polymers	25
2.2.1.1	Emulsion polymerisation	25
2.2.1.2	Group Transfer Polymerisation (GTP)	26
2.2.1.3	Reversible Addition-Fragmentation Chain Transfer (RAFT) Polymerisation	26
2.2.1.4	Atom Transfer Radical Polymerisation (ATRP)	27
2.2.2	Structures of pH-sensitive Polymers	29
2.2.2.1	Linear Copolymers	29
2.2.2.2	Star Polymers	30
2.2.2.3	Hydrogels (HGs)	30
2.2.2.4	pH-sensitive brush and comb copolymers	31
2.3	Microencapsulation	31
2.3.1	Classification of microcapsules	32
2.3.2	Methods of microencapsulation	32
2.3.3	Techniques for the core release	33
2.3.4	Application methods of microcapsules on textiles	33
2.3.5	Microcapsules application on textiles	35
2.4	Microencapsulated pH-responsive polymers (PCM) for textiles	36
2.5	Application of microencapsulation in hygiene textiles	42
2.6	Application of pH-responsive polymers (super absorbent polymers – SAPs) in hygiene textiles	45
2.7	The objective of the study	48
2.7.1	Research gap and motivation	48
2.7.2	Objectives	49
2.7.3	Methodology	49

2.7.4	Anticipated results/ Rational for the work	49
	References	51

Chapter-3: Materials and Methods

	Overview	81
3.1	Present scenario in the manufacturing of sanitary napkin	82
3.2	Materials	83
3.3	Procedure of Polymerization	84
3.3.1	General reaction scheme of polymerization	85
3.4	Synthesis of AA and ACN based Polymers [1A-1E]	87
3.4.1	Polymerization procedure for SAPs 1A - 1E	87
3.5	Synthesis of MMA and MAA based Polymers [2A-2E]	88
3.5.1	Polymerization procedure for SAPs 2A - 2E	89
3.6	Synthesis of AA and MMA based Polymers [3A-3E]	90
3.6.1	Polymerization procedure for Polymers 3A - 3E	90
3.7	Synthesis of MAA and ACR based Polymers [4A-4E]	91
3.7.1	Polymerization procedure for Polymers 4A - 4E	92
3.8	Synthesis of MMA and ACR based Polymers [5A-5E]	93
3.8.1	Polymerization procedure for Polymers 5A - 5E	93
3.9	Synthesis of AA and ACN based Polymers grafted with sodium acrylate [6A-6E]	94
3.9.1	Polymerization procedure for Polymers 6A - 6E	95
3.10	Synthesis of MMA, ACR and ACN based Polymers [7A-7E]	96
3.10.1	Polymerization procedure for Polymers-7A-7E	96
3.11	Preparation of pH-stimuli microcapsules	97
3.11.1	Preparation of pH-stimuli microcapsules with polymer [1C, 2C, 3D, 4B, 5B, 6C, 7C]	98
3.12	Characterization	100
3.12.1	Thermogravimetric analysis (TGA)	100
3.12.2	FT-IR Spectrometric Studies of Polymers	101
3.12.3	SEM and Particle Size Analysis	102

3.13	Application of prepared SAPs/mSAPs to Sanitary Napkin	103
3.14	Free Swell Capacity (FSC)	104
3.15	Absorption under load (AUL)	105
3.16	Absorbent capacity	106
3.17	Wet back	107
3.18	Strikethrough	108
3.19	Wiking height test	108
3.20	Determination of pH of the top layer	109
3.21	Antimicrobial activity	109
3.22	Physical Testing of SAP/mSAP-coated samples	110
3.23	Safety Assurance	110
3.23.1	Direct skin contact	111
3.23.2	Negligible skin contact	111
3.23.3	Quantitative exposure assessment	112
3.24	Effluent Analysis	114
3.24.1	Hardness (mg/l)	114
3.24.2	Alkalinity and Chloride (mg/l)	114
3.24.3	COD and BOD	114
	References	115

Chapter-4: Result and Discussion

	Overview	119
4.1	Polymerisation Reaction Mechanism	120
4.2	Characteristics analysis of SAPs and mSAPs	120
4.2.1	Thermogravimetric Analysis (TGA) of SAPs and mSAPs	120
4.2.2	Structure determination of SAPs and mSAPs	124
4.2.3	SEM and Particle Size Analysis of pH-sensitive Microcapsules	127
4.3	Free Swell Capacity (FSC) and Absorption Under Load (AUL) of SAPs/mSAPs coated Sanitary Napkins	129
4.4	Absorbent Capacity of SAPs/mSAPs coated Sanitary Napkins	134
4.5	Wet Back analysis of SAPs/mSAPs coated Sanitary Napkins	137

4.6	Strike Through analysis of Sanitary Napkins coated with SAPs/mSAPs	139
4.7	Wicking Height of SAPs/mSAPs coated Sanitary Napkins	140
4.8	pH analysis of SAPs/mSAPs coated Sanitary Napkins	141
4.9	Antimicrobial Properties of of SAPs/mSAPs coated Sanitary Napkins	142
4.10	Physical Testing of SAP/mSAP-coated sanitary napkins	144
4.11	Safety Assurance of SAPs/mSAPs coated Sanitary Napkins	145
4.12	Effluent Analysis of SAPs/mSAPs coated Sanitary Napkins	149
	References	151

Chapter-5: Conclusions

Overview	152
----------	-----

Scope for the Further Study	157
------------------------------------	-----

Reprints of Review and Research Publications

Certificates of Paper/Poster Presentation in Conference
